==========

PROFILE SUMMARY:

- I bring 5 years of experience in Java-based development, specializing in creating scalable Web and Enterprise Applications. My work primarily involves Java/J2EE, with a strong command of the Spring framework and Hibernate for ORM. I've contributed to full-stack development in Agile teams and have a track record of delivering robust and maintainable software solutions.
- Good exposure in OOPS concepts and collections handling.
- Strong hands on experience in implementing Design patterns like MVC, Singleton, Data Access Object, DTO, Service, Delegate and Factory.
- Experience in developing UI User Interfaces using Servlets,JSP, XML, HTML, CSS, Javascript, jQuery,Angular,React JS.
- Having experience with Configuration Management tools like GIT and Bit bucket.
- Hands on experience in Spring,Spring boot,Node JS,Microservices and Frameworks.
- Experience on various GOF design patterns like Singleton, Factory, DAO, BO,OOAD and design patterns.
- Experience with API automation test with selenium testing tools.
- Working experience in Apache Tomcat Web Server and Web Logic Application server.
- Having good experience in AWS cloud technology.
- Having good experience in multi threading with core and advanced java technologies.
- Hands-on experience in SQL and PostgreSQL databases.
- Implementing the hibernate and JPA components.
- Good experience of Kafka,Kubernetes and Kibana.
- Having good experience in building tools like Maven.
- Experience with iterative software development methodologies like Agile.
- Ability to handle multiple tasks and work independently as well as in a team.

SKILLSET:

Programming Language	Java
Web Technologies	React JS,HTML, Java Script, CSS, j Query,Angular
Design Patterns	Singleton, Factory
Frameworks	Spring, Spring-Boot,Micro Services,Node JS
Web Server	Tomcat,Web Sphere
Web Services (API)	Restful API
CI/CD	Maven,Jenkins,Jira
Version Control Tool	Bit bucket,GIT
IDE	Eclipse,IntelliJ
Other Tools	Multi Threading,Kubernetes,Kafka,Postman,Junit,Docker,Swagger
Database	SQL,PostgreSQL

EXPERIENCE SUMMARY:

Project 3:

Project Name : NetBank
Client : HSBC
Duration : June 2024 to till date.

Technologies : Java,Spring,Spring boot,Microservices,JPA,Angular(Node JS),Spring IOC,Docker,AWS,Rest API,Eclipse,Tomcat,Maven,Rest API,Multithreading,Jenkins,Jira,Junit,Bit bucket,PostgreSQL,Postman.

Description

NetBank is a secure and scalable online banking platform that enables customers to manage their bank accounts, transfer funds, apply for loans, and pay bills. It offers real-time account dashboards, multi-factor authentication, and robust transaction workflows. Customers can generate statements, download PDFs of transactions, and schedule future payments.

Responsibilities

- Working as a JAVA developer and coordinating with development to track the delivery of the module on time.
- Analyse requirements to define business objectives, Design implement and maintain applications that based on the requirement.
- Testing the developed modules to make sure everything working fine and prepare the documentation of test results.
- Implementing on Spring Boot and Microservices.
- Injected the Repository into service classes using Spring IOC pattern.
- Getting the Requirements from the requirement analysis and Bug Tracking tool JIRA.
- Implementing on Spring Data JPA and Restful web services.

- Good experience in developing the single-page applications using Angular.
- Experience in developing highly interactive web applications utilizing Angular.
- Implementing written Service and Repository interface along with their implementations.

Project 2:

Project Title : XCELYS(Healthcare)
Client : WELLCARE AND Connector
Duration : Aug 2022 to May 2024

Technologies: Java,J2EE,HTML,CSS,Javascript,Angular,Node JS,Hibernate,Spring ORM,AWS,Visual Studio,Eclipse,Kafka,Bootstrap,GIT,SQL..

Description:

Xcelys is an information system for managed health care. It's a Health Care Product. The features included are: Identifies member eligibility for claims processing, Prices claims based on prior arrangements (group or provider), Controls payment based on authorization and benefits, The government enabled programs Medicare and Medicaid administer complex payer arrangements. It is developed for health care or insurance organizations. The major modules in Xcelys are Customer Service, Premium billing, Correspondence and Xcelys Classic.

Responsibilities:

- Used Spring Framework for Dependency injection.
- Implementation of Web Pages in JSP using Spring Form Tag Library.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.
- Involved in developing Controllers using Spring ORM.
- Implementation of Web Pages in JSP using Javascript for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design and developed business logic.
- Develop the site and integrate the dynamic pages with the static designs.

Project 1:

Project Title : Cox Communications
Client : Cox Enterprises.
Duration : Sept 2020 to July 2022

Technologies : Java,Microservices,Spring boot,Spring,JPA,Eclipse,Tomcat,Bit bucket,Collections,Maven,Jenkins,Kafka,React JS,Kubernetes,Junit,Postman,SQL.

Description:

Cox Communication provides Telecom services to USA Residential and Business Customers like Telephony, Cable, Data, TV and streaming (streaming services like Prime video, Netflix, Disney), Home Life (security like Keep an eye on your home, Contour Voice Remote, Take control of your devices) and Wireless Services. Cox provides a wide range of services, packages, campaigns and price protection. Cox provides Install, Upgrade, downgrade, pending disconnect and pending reconnect of occurrence/services/price protection, discounts for current customers. Cox provides transfer services in intra and inter site (ex: with in city and state transfers).

Responsibilities

- Involved in Implement in Restful web services.
- Involved in writing the Spring boot, Spring Data JPA .
- Participated in discussions with the Onsite team.
- Involved in the designing of activities.
- Involved in analyzing and providing solutions to Data power issues.
- Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.
- Involved in business logic implementation code.
- Involved in deployment on DEV and ST, MODEL Environment.

EMPLOYMENT:

- Working as a Software Engineer in **Mphasis,** from Sept 2020 to till date.

EDUCATION:

- **B.Tech from GVVR Institute Of Technology,JNTUK.**
