Professional Summary

- Innovative Software Engineer with over 8 years of experience in designing, developing, and implementing enterprise-level applications and cloud-native solutions implementation, cutover, and support for improved stability and performance.
- Led business-critical solutions involving cross-functional stakeholders within stringent timelines, ensuring seamless implementation and performance improvements.
- Enhanced software development efficiency by integrating AI-powered tools throughout the SDLC, from analysis and design to implementation and maintenance.
- Proven leadership and mentoring skills, fostering a collaborative and innovation-driven environment.
- Extensive retail domain expertise with experience in RMS, OMS, WMS, Logistics, Pricing and Finance.

Seeking opportunities in cloud-native retail solutions leveraging Latest Technologies.

Skills

- **Programming:** Java, SQL, PL/SQL, Shell Scripting.
- **Technologies & Frameworks**: Spring Boot, Spring JPA, Spring Security, Microservices, Oracle, Postgres, Kafka, MongoDB, Ubuntu, CAWA, ORDS, Rabbit MQ.
- **Cloud & DevOps:** Azure, Oracle Cloud, CI/CD, Kubernetes, Docker.
- **Retail:** RMS, OMS, WMS, Logistics, Pricing and Finance.

Professional Experience

Landmark Group (Aug 2023 – Present) | Lead Engineer | Bangalore, India

- Led the modernization of a Purchase order application by migrating from a legacy Oracle Forms to a Spring Boot microservices architecture, enhancing scalability, performance, and cloud readiness.
- Coordinated cross-functional teams to deliver multiple business-critical solutions, including CEPA, Restricted Item, Marketplace Integration, and Merged Custom Invoice ensuring timely execution.
- Improved database performance and reduced size by 6TB by analyzing and purging legacy data.

GAP (Sep 2018 – Aug 2023) | Senior Software Engineer | Hyderabad, India

- Designed and developed SaaS Solution Upgrade projects, working on message integration both inbound to and outbound from SaaS for PO, Item, Transfer, Allocations, ASN, Receipt, Pricing, Hierarchy
- Delivered solutions for real-time & flat file integration of messages Kafka, Oracle AQ, and ORDS.
- Built and upgraded multiple reusable frameworks to automate the system, such as Archive & Purge Framework, Alert Framework, Dashboard Backend, Gather Stats Framework, and Mailing Framework, helping to reduce recurring support tickets by 30%.
- Implemented the Change Data Capture solution to publish delta and full feeds data to business-critical downstream systems, improving data consistency and reducing SLA breaches by 90%.
- Built microservice-based solutions for subscribing to thin events and publishing item and order data to SaaS and downstream via REST and Kafka solutions.

TCS (Aug 2016 – Aug 2018) | Client: Lifestyle India Pvt Ltd | Bangalore, India

- SME for Warehouse Management Systems, responsible for business-critical operations.
- Worked as a developer in Multiple Ecom Omni channel and Logistics Projects such as Put to Light, Pigeonhole sorting, Multiple virtual warehouses leading to WH Operational efficiency.

Certifications & Award

🎓 **Microsoft Certified: Azure Fundamentals (AZ-900)**

🏆 **GAP Excellence Award** for exceptional performance

🏆 **Early Promotion** to Senior Software Engineer at GAP

Education

Techno India, Salt Lake, Kolkata | B-Tech (Electronics & Communication Engineering) | (Aug 2012 – July 2016)
