Senior QA Automation Engineer | 5+ yrs | Cypress (JS) & Manual Testing

OBJECTIVE

Senior Software Automation Test Engineer with **5.6 years** of experience in designing, developing, and maintaining automation frameworks using **Cypress** with **JavaScript**. Strong expertise in Web Automation, API Testing (Cypress, Postman) and Agile methodologies. Skilled in implementing scalable automation solutions and ensuring end-to-end software quality. Adept at working in Agile teams, collaborating with developers/product owners, and delivering high-quality releases on time.

SUMMARY

- 5.6+ years of experience in Manual and Automation Testing across Healthcare, E-commerce, and Banking domains.
- Strong expertise in **Cypress Automation**, API Testing (Postman), and Agile methodologies.
- Hands-on experience in building scalable test frameworks for functional and regression testing.
- Proficient in debugging, defect management, and shift-left testing approaches.
- **ISTQB Certified** Software Tester with proven problem-solving and analytical skills.

KEY SKILLS

- **Testing Tools :** Cypress, Postman
- **Frameworks:**, Mocha, BDD, POM
- **Languages:** JavaScript
- **Project Management Tool :** JIRA
- **Other Skills:** Manual Testing, CI/CD Integration, HTML, CSS, MySQL n8n, Web Scraping, Git, GitHub Actions, Jenkins

PROFESSIONAL EXPERIENCE

Senior Automation Test Engineer
Taliun Solutions, Pune | Dec 2022 – Aug 2025
Silicon Valley-based company delivering data-driven software innovation in healthcare.

Projects: Point Click Care (Healthcare Platform)

Responsibilities

- Built and maintained Cypress automation frameworks for UI and API testing using JavaScript.
- Automated **functional, regression, and integration test scenarios**, improving coverage and reducing release defects.
- Utilize Page Object Model (POM) design patterns for creating scalable and maintainable test scripts.
- Collaborate with QA and development teams to define and refine test strategies and test plans.
- Conducted code reviews, debugging, and optimization ensuring framework scalability and stability.

Key Achievement: Enhanced automation coverage by 60%, reducing manual effort and accelerating release cycles by 25%

Automation Test Engineer
Western Ocean Software Solutions, Pune | Feb 2020 – Nov 2022
Software development and product distribution firm.

Projects:
Apana Store (E-Commerce Platform):
Responsibilities
- Performed **manual testing** of dealer/customer management, product listings, and admin workflows.
- Designed and executed detailed **test cases, test scenarios, and regression cycles** to ensure functional accuracy.
- Reported and tracked defects, collaborating with developers to resolve issues and improve product quality.

HDFC Bank (Home Loan App)
Developed automation scripts for loan account summaries, payment details, disbursement tracking, and certificate generation. Reduced production bugs through early API testing.
Responsibilities
- Designed and executed end-to-end test suites (automation & manual) for web and mobile apps.
- Collaborated in Agile ceremonies, test planning, and requirement analysis.
- Performed manual testing for edge cases and critical functionalities.
- Documented and tracked defects, improving closure time by 20%.

Key Achievement: Delivered a robust regression suite that reduced testing cycle time by 30%, enabling faster releases.

EDUCATION

Bachelor of Engineering, Sinhgad Institute of Technology – Solapur University (2018)
Percentage: 70.75%

LEADERSHIP s INTERPERSONAL SKILLS

- Strong collaboration skills with developers, business analysts, and product owners.
- Ability to manage multiple tasks, deliver under deadlines, and adapt to new tools quickly.
- Flexible and committed to continuous learning and innovation.
