Work experience

Senior Consultant
2024-05 - present

Capgemini INC.

- Led the migration of Hartford Insurance's technology system from classic Spring JSF to an Angular-Spring Boot-based system, enhancing system efficiency and modernizing the tech stack.
- Utilized Spring Boot to transition server functions to microservices, resulting in improved scalability and performance.
- Spearheaded the database migration from Oracle DB to MySQL, optimizing data management and reducing operational costs.
- Coordinated with cross-functional teams to ensure seamless integration and functionality of the new system architecture.
- Developed and implemented strategic plans for system migration, ensuring minimal disruption to business operations and maintaining data integrity.
- Maintained consistent communication with stakeholders, providing clear updates and addressing concerns throughout the migration process.
- Ensured all project documentation was accurate, comprehensive, and error-free, facilitating smooth knowledge transfer and system maintenance.
- Fostered a collaborative environment, encouraging team innovation and problem-solving to overcome migration challenges effectively.

Software Engineer
2022-07 - 2024-04

JP Morgan, Banglore, IN

Contributed to development of International Payments Application at JP Morgan
Chase, specializing in low-value payment processing.
Successfully addressed structure changes for credit transactions in Australia and New Zealand regions, ensuring compliance with regulatory reporting requirements.
Developed a utility for bulk repairing transactions, providing a contingency solution for production support team.
Led migration of MTS to ISO 2022 structure for both credit and debit transactions,
improving efficiency and standardization.
Managed multiple small projects concurrently, utilizing technologies such as Java 8,
J2EE, Spring Boot, microservices, and MySQL.
Collaborated with cross-functional teams to ensure seamless integration and delivery of software solutions.

Conducted thorough testing and debugging to ensure reliability and functionality of application.
Maintained clear and concise documentation, facilitating knowledge transfer and ensuring consistency in development processes.
Estimated work hours and tracked progress using Scrum methodology.
Updated old code bases to modern development standards, improving functionality
ex: Migration to Microservices Project.
Technologies Used- Java, Java8, Spring boot, Kafka, Gitlab, Maven, REST,
Hibernate, Junit 5, Mockito, MySql, MicroServices, Jpa

Software Engineer
2021-10 - 2022-06

NetCracker, Banglore, IN

Served as a backend developer for a telecom project at Netcracker Inc, contributing to the successful delivery of high-quality software solutions.
Technologies Used- Java, Spring, Gitlab, Maven, REST, Hibernate, Mockito,
MySql, Cassandra

Software Developer
2020-03 - 2021-10

Deloitte, Banglore, IN

Dell Supply Chain Management (Deloitte)
Developed an automated cost interlock management system for Dell Supply Chain Management, streamlining the management of the supplier ecosystem and improving cost efficiency.
Collaborated directly with the client team to develop Filter API's using JPASpecifications, simplifying data filtering processes for users.
Designed and implemented database objects using MySQL, ensuring efficient data storage and retrieval.
Created a reusable component for the Set Rules Methodologies module, enhancing modularity and scalability of the system.
Worked closely with QA and Product Management throughout the development lifecycle, ensuring high quality deliverables and meeting client requirements.
Maintained clear and concise documentation, facilitating ease of understanding and knowledge transfer.
Stayed updated with the latest technologies and industry best practices, continuously improving skills and knowledge.
Ensured consistency and clarity in all communications, avoiding complex technical jargon for better understanding.
Technologies Used- Java, Java8, Spring boot, Kafka, Gitlab, Maven, REST, Hibernate, Junit 5, Mockito, MySql, MicroServices, Jpa, Angular8

Software Engineer

2017-12 - 2020-03

Virtusa, Banglore, IN

British Telecom
Played a key role in defect fixes and testing, ensuring the delivery of high-quality solutions and minimizing downtime for clients.
Contributed to the understanding of different functional requirements, collaborating with cross-functional teams to develop effective solutions.

Developed and optimized stored procedures, improving database performance and enhancing overall system efficiency.
Led the design, development, and maintenance of multiple projects, ensuring adherence to project timelines and delivering high-quality results.
Utilized Java, Spring, Spring Boot, and Hibernate technologies to develop robust and scalable applications, enhancing functionality and user experience.
Expanded knowledge in coding, database management, and front-end development, continuously improving technical skills and expertise.
Conducted unit testing to ensure the reliability and functionality of developed applications, identifying and resolving issues in a timely manner.
Maintained clear and concise documentation, facilitating seamless knowledge transfer and ensuring effective collaboration within the team.
Technologies Used- Java, Spring, Spring boot, Kafka, Gitlab, Maven, REST, Hibernate, Junit, Mockito, MySql, MicroServices, Jpa, Jsp
