RAMASESHAN N P

FRONT END DEVELOPER

Pursue opportunities as a front-end developer eager to evolve into full-stack roles, leveraging a solid background in computer science and a keen interest in developing AI-enhanced applications..

EDUCATION

B.Tech. in Computer Science, 2017

CORE COMPETENCIES

- User Experience Design
- Agile Development Methodologies
- Responsive Web Design
- System Integration
- IoT Solutions
- Data Visualization Techniques
- Cross-Functional Collaboration
- Performance Optimization
- API Development
- Project Management

TECHNICAL SKILLS

- Semantic HTML
- CSS
- TailwindCSS
- JavaScript
- Vanilla.js
- Typescript
- React
- Git
- Figma
- Python
- Django

OTHER SKILLS

Music Composer | Sound Designer | Foley Artist | Percussionist | Music Programmer

SOFT SKILLS

- Communication
- Problem-Solving
- Leadership
- Team Player
- Time Management

PROFILE SUMMARY

- With over **5.1 years of experience in front-end development**, specialized in React, JavaScript, and crafting user-centric interfaces for IoT technologies.
- Leading the development of an AI-driven project utilizing Retrieval-Augmented Generation (RAG) to build a system capable of answering questions based on PDF documents.
- Transitioning from a **sound design background in 2019**, rapidly mastered web technologies, UI design, and system integration.
- As a **UI/UX Developer at Teqard Labs,** engineered dynamic, engaging interfaces and optimized user experiences.
- Spearheaded the **successful execution of multiple high-impact projects**, driving increased user engagement and satisfaction.
- Leveraged modern frameworks like **React.js and Tailwind CSS** to build responsive, high-performance applications, most recently leading a project that integrated advanced features into an IoT product, significantly enhancing both operational efficiency and user satisfaction.
- Excelled in **Agile methodologies**, ensuring projects were completed on schedule without sacrificing quality.
- Architected and developed a comprehensive hardware-software solution for managing **hydroponic farms, delivering low-to-high fidelity** prototypes and wireframes, and utilizing React to streamline operations and elevate the user experience.

WORK EXPERIENCE

SAYONE TECHNOLOGIES | Front End Developer | 2022 - Present
Technologies: React, JavaScript, Typescript , HTML, CSS, Figma, Vanilla.js, Redux

- Designing and developing a comprehensive POS solution for managing all aspects of a pet business in the **U.S., offering significant benefits to both retailers and end-users**.
- Spearheading the front-end development of retailer and customer interfaces, ensuring seamless user experiences.
- Analyzing design workflows to identify pain points and implementing solutions that align with user needs in dynamic dashboards for both retailers and customers.
- Orchestrating the development of a dynamic appointment system with recurring functionality, **leveraging Redux for optimal state management**.
- Integrating Full Calendar for in-app appointment booking, enhancing scheduling efficiency. Optimizing UI elements like dropdowns with advanced techniques such as pagination and debouncing.
- Employing Formik for streamlined **form handling and Moment.js with Moment-Timezone** for precise timezone management.
- Boosting performance by implementing lazy loading for faster load times and a smoother user experience. **Collaborating on API integrations** and creating Figma mockups for new features and enhancements.
- Developed an advanced appointment booking system with a retailer interface using React and a lightweight customer interface powered by Vanilla JavaScript.
- Engineered the retailer **dashboard with the React Calendar package** to display appointments, including time, service, and

AWARDS & ACHIEVEMENTS

- **State Level Selection in SV.CO** program organized by Startup Village.
- Selected in **GITEX Global 2022, World's largest Tech** show.
- Best Performer of the year - 2021
- Successfully developed a farming automation system for optimal productivity per unit area by utilizing sensor inputs and crop-specific databases.
- Contributed to the creation of an all-in-one retail point-of-sale platform for pet businesses.

PERSONAL DETAILS

Address: Kochi, Kerala
D.O.B.: 3rd December 1994
Languages known: English, Tamil, Malayalam

attendants.
- Implemented filtering for pet services and attendants via **React Redux for efficient state management** and backend integration, optimizing data handling through debounce & pagination techniques. Utilized Async Paginate for smooth data fetching.
- Designed a blocking mechanism enabling retailers to restrict bookings for specific time slots or entire days. Integrated a dynamic appointment editing page using React Router, with forms built through **Formik and intuitive time/date selection** via React Dropdown**, rc-timepicker, and react-datetimepicker**.
- Enhanced UI smoothness with React Custom Scrollbars and applied React Bootstrap and SCSS for styling.
- Built a lightweight **customer booking system** using Vanilla JavaScript, ensuring seamless user experience with efficient API integrations for real-time data display.

TEQARD LABS | UI/UX DEVELOPER | 2019-2022
Technologies: React, JavaScript, HTML, CSS, Figma, After Effects

- Developed an advanced IoT-based Farming Automation System optimized for maximum productivity per unit area by leveraging sensor data from environmental factors such as **temperature, pH, EC, and humidity**. Integrated these inputs with a crop-specific database to dynamically adjust parameters, boosting crop yields.
- Engineered a comprehensive React-based dashboard utilizing Material-UI, Tailwind **CSS, and Redux to manage hydroponic operations**.
- Designed and developed reusable components such as buttons, sidebars, modals, dropdowns, and cards, ensuring consistency and scalability across the application.
- Managed **key functionalities like watering, lighting, and environmental control** systems by integrating REST APIs for real-time data fetching.
- Optimized performance with React Hooks, React.memo, and React Router, ensuring a seamless and efficient user experience.
- Collaborated closely with **product managers, engineers, and QA teams** to gather requirements, troubleshoot technical issues, and ensure the timely delivery of features. Delivered high-quality, well-documented code, adhering to best practices and development standards.
- Crafted detailed **UI mockups and interactive prototypes** through storyboards, process flows, and sitemaps to visualize functionality and communicate design concepts. Engaged stakeholders through iterative design reviews to ensure alignment with user needs and project goals.

Achievements:

- Selected for **GITEX Global 2022**, the world's largest tech show
- **Awarded Best Performer of the Year - 2021**

ANNEXURE

PROJECTS

Project 1: Hydroponic Farm Management System (2019)
Role: Product Developer

- Spearheaded the design and **development of an integrated hardware** and software solution for managing hydroponic farms, enhancing efficiency through IoT technology.
- Led the creation of low to high-fidelity prototypes and wireframes, ensuring seamless user experiences for both consumers and administrators.
- Developed and optimized an intuitive **front-end application using React, Redux, and React Hooks**, enabling easy management of farming systems.
- Integrated advanced functionalities, including an Automated Watering System, Lighting Control, Temperature Regulation, and Planting Management, streamlining farm operations for users.
- Implemented a robust **Alert System to notify users** about system malfunctions and required actions, minimizing downtime.
- Designed and implemented secure authentication and seamless communication between hardware and

software for improved user engagement and farm management.
- **Technologies: React, Redux, CSS, React Hooks, Git, Django, IoT Integration**

Project 2: Pet Store Platform Enhancement (Current Role)
Role: Front End Developer

- Led the development and enhancement of a **dynamic pet store platform catering** to retailers, consumers, and administrators, improving user satisfaction and operational efficiency.
- Revamped the appointment management system, enabling users to book, edit, reschedule, and cancel appointments for pet-related services with ease.
- Designed and implemented advanced features for **managing pet and service categories**, allowing for efficient customization and seamless integration across various user roles.
- Developed a critical timezone management system, ensuring accurate and region-specific scheduling for retailers and consumers across time zones.
- Optimized platform performance by leveraging **high-performance libraries and maintaining a smooth**, responsive user interface.
- Collaborated closely with cross-functional teams to ensure seamless feature integration and enhance platform functionality for varied user needs.
- **Technologies: React, Redux, CSS, Vanilla JavaScript, Git, Libraries for performance optimization.**
