KIRAN KUMAR M

Mobile: 9000475004 **LinkedIn**: Kiran Kumar M
Email: muthyalakiran333@gmail.com

PROFESSIONAL SUMMARY:

Automation Test Engineer with over 4 years of experience in **manual** and **automation** testing. Skilled in **web** and **API testing** using **Selenium with Java**, **Rest Assured**, **TestNG**, and **BDD Cucumber**. Experienced in Agile environments with tools like **JIRA (Issue Tracking Tool)**, **HP ALM**, **Jenkins**, and **Bitbucket**. Strong in **test case design**, **regression testing**, and **performance testing** using **JMeter**. Proficient in creating and running performance tests to check application speed, scalability, and stability. Good at analyzing test results, finding issues, and working with development teams to improve system performance.

TECHNICAL SKILLS:

Java, Selenium WebDriver, TestNG, Cucumber (BDD Framework), Maven, Postman, Jenkins, Git, Bitbucket, JIRA, HP ALM, SQL, Manual Testing, Regression Testing, Test Case Design, Defect Tracking, Agile, JMeter, AccelQ, New Relic, Splunk APM, REST API Testing, and Backend Testing.

PROFESSIONAL EXPERIENCE:

Synechron Technologies, Bangalore, Karnataka. **MAY 2021 – Present**

Automation Test Engineer:

- 4+ years of experience in Software Testing with strong expertise in both **Manual and Automation Testing**
- across **Agile**, **Scrum**, and **Kanban** models.
- Skilled in **Web and API automation testing** using **Selenium with Java**, **Rest Assured**, and **Cucumber (BDD)** frameworks.
- Designed and maintained scalable **automation frameworks** using **TestNG**, **Maven**, and **Page Object Model (POM)** design patterns.
- Integrated automation suites with **Jenkins** for **CI/CD** (Continuous Integration/Continuous Deployment) execution and scheduled test runs.
- Performed diverse testing types: **Smoke**, **Sanity**, **Functional**, **Regression**, **Data-Driven**, **Unit**, and Integration Testing.
- Conducted end-to-end **API testing** using **Postman**, automated validations using **Rest Assured**, and managed test data effectively.
- Proficient in writing and maintaining **test cases**, **test scenarios**, and **BDD feature files** for improved traceability.
- Used **JIRA**, **HP ALM**, and **Octane** for **defect tracking**, **test management**, and **reporting**.
- Implemented **Advanced XPath** strategies to handle dynamic web elements in UI automation.
- Actively participated in Agile ceremonies like **daily stand-ups**, **sprint planning**, and **retrospectives**.
- Interacted directly with clients for **requirement discussions**, **defect clarifications**, and **status updates**.
- Provided **technical mentorship** to freshers and supported onboarding of new team members

- Recognized for proactive communication, timely delivery, and contribution to **team process improvements**.
- Designed and implemented comprehensive performance test plans using **JMeter** to evaluate application responsiveness, scalability, and reliability under varied load conditions.
- Developed and maintained reusable JMeter scripts to simulate real-world user traffic and business workflows for both **web** and **API** applications.
- Conducted **load**, **stress**, and **endurance testing** to identify system **bottlenecks**, memory leaks, and performance degradation over time.
- Analyzed test results and generated detailed performance reports to highlight critical metrics like response times, throughput, and error rates for key stakeholders.
- Collaborated with development and infrastructure teams to troubleshoot performance issues and recommend optimization strategies based on JMeter findings.
- Presented performance test results in sprint reviews, helping drive informed decisions on capacity planning and release readiness.
- Provided training and mentoring on JMeter and performance testing methodologies to team members, enhancing overall QA capabilities.
- Validated application for 1000+ concurrent users under peak load using JMeter.

PROJECTS:

Project 1: Cuscal – **OIF Fee**

Client: Cuscal | **Role:** Software Engineer – Test Analyst | **Environment & Tools:** Eclipse, Selenium WebDriver, Maven, TestNG, Jenkins, Bitbucket, SourceTree, JIRA, Confluence, Postman, AccelQ, JMeter

Project Description:

Cuscal introduced a new OIF calculation service, enabling opt-in/opt-out for Visa's fees. Clients can customize OIF rates by BIN, SUB-BIN, and transaction type. The system provides an intuitive interface with full audit trails and generates ABF files for OIF fees, which are processed for advice messages and financial statements. The EFTConnect portal displays and reports on OIF transactions distinctly.

Responsibilities:

- Developed automated test scripts for new sprint functionalities using AccelQ automation and Selenium WebDriver.
- Performed end-to-end web automation and ensured cross-browser and mobile browser compatibility.
- Designed, configured, and executed performance test plans using JMeter to validate application stability and responsiveness.
- Executed and maintained regression test suites to ensure application stability across legacy releases.
- Generated automation test reports and presented script execution and results during client demos and system reviews.
- Reviewed team members' test scripts to ensure proper coverage and validation checkpoints.
- Collaborated closely with developers and QA leads to align test coverage with sprint goals and project requirements.

- Provided training and technical support to new team members on automation frameworks and best practices.
- Ran and maintained regression suites and facilitated automation knowledge transfer within the team.

Project 2: Synchrony – **Digital Credit Card Application Platform**

Client: Cuscal | **Role:** Associate – Quality | **Environment & Tools:** AccelQ**,** Eclipse, Selenium WebDriver, Maven, TestNG, Jenkins, Bitbucket, SourceTree, JIRA, Confluence, Postman and JMeter.

Project Description:

Web-based platform for digital credit card applications, integrating front-end digital apply forms with backend systems for credit bureau checks and decision-making.

Responsibilities:

- Developed automated test scripts for new sprint functionalities using Selenium with Cucumber (BDD).
- Performed end-to-end web automation and ensured cross-browser and mobile browser compatibility.
- Executed and maintained regression test suites to ensure application stability across releases.
- Generated automation test reports and presented script execution during client demos.
- Reviewed team members' automation scripts to ensure proper coverage and validation checkpoints.
- Collaborated closely with developers and QA leads to align test coverage with sprint goals.
- Provided training and technical support to new team members on automation frameworks and best practices.

Project 3: Synchrony – **Vista Auth**

Client: Synchrony | **Role:** Associate – Quality Automation | **Environment & Tools:** IntelliJ, Eclipse, Selenium WebDriver, Maven, TestNG, Jenkins, JIRA, ALM, Postman, JMeter and Internal Applications.

Project Description:

Web-based Vista Auth platform used to validate and track authentications accumulation across multiple clients and modules in the Cards and Payments domain.

Responsibilities:

- Led QA efforts across multiple modules, managing end-to-end testing activities as a technical lead.
- Participated in requirement gathering and sprint planning for new client integrations.
- Performed release validation, including functional and regression testing.
- Designed and executed sanity and regression test scripts using **Selenium with Java**.
- Conducted functional testing for client-specific data and business workflows.
- Automated end-to-end web flows using the **Selenium-Cucumber BDD** framework.
- Collaborated directly with clients to ensure test coverage aligned with business requirements.
- Created and maintained test scenarios, test cases, and supporting manual test documentation.
- Delivered daily QA status updates and progress reports to clients and stakeholders.
- Reviewed automation scripts from team members and mentored freshers on testing best practices.
- Trained new joiners in Java, Selenium, and project-specific QA practices.

PROFESSIONAL ACHIEVEMENTS:

- Awarded with ‘Raising Star’ of the new block.
- Recognized as best contributor of the year.
- Received ‘Spot Award’ for consistent performer in the team.
- Received multiple client individual appreciations on PI calls

CERTIFICATIONS:

- Selenium with JAVA from Synechron and Udemy
- JMeter Performance Testing from Udemy
- Learn Cucumber BDD with java selenium Framework from Udemy
- Postman API Testing – step by step for Beginners from Udemy
- AI Tools Workshop Certificate from be10x

EDUCATION:

B.Tech in **Electronics and Communication Engineering** , 2016 – 2020

Jawaharlal Nehru Technological University, Anantapur.
