Gowtham Swaroop M

Objective:

To pursue a challenging career in an organization that fully utilizes my knowledge and skills in software engineering and provides a platform for career growth and learning.

Carrier Profile:

- ✓ 9+ years of experience in developing Java-based web applications with expertise in Telecommunication, Banking and Financial domains.
- ✓ Sound knowledge in Object Oriented Programming concepts.
- ✓ Hands on experience over Spring and Hibernate frameworks.
- ✓ Worked on Web services implementation using Restful & Soap.
- ✓ Hands on Experience over Design Patterns, Data Structures and Algorithms.
- ✓ Experienced in multithreading and concurrency.
- ✓ Contributed to the full lifecycle of Microservice Architecture, including design, development, deployment and ongoing maintenance to ensure scalability and performance.
- ✓ Proficient in integrating CI/CD pipelines for efficient and automated software delivery as well as deploying applications using Dockers & Kubernetes for scalable and reliable operations.
- ✓ Proficient in developing and managing real-time data streaming solutions using Apache Kafka, Kafka Streams, and KRaft mode; experienced in designing event-driven architectures, implementing stream processing pipelines, and ensuring high availability and scalability in distributed environments.
- ✓ Ensured timely delivery of projects within time and cost parameters.
- ✓ Ability to multi-task and work under tight deadlines with minimal supervision.
- ✓ Experienced in system design and architecture.
- ✓ Managed project estimates, helping the team plan and allocating resources effectively.
- ✓ Handled project deliverables, ensuring tasks were completed on time and with good quality.
- ✓ Coordinated scrum calls, making sure communication was clear and progress was tracked.

Professional Experience:

- ✓ Working as a Software Engineer Specialist in British Telecom(BT) from February 2019 to till date.
- ✓ Worked as a Senior Software Engineer in Tangoe India Softek Services Pvt Ltd from July 2016 to January 2019
- ✓ Worked as a Senior Software Engineer in GlobalLogic India Ltd from October 2015 to July 2016.

Education & Certificates:

- ✓ Bachelor of Engineering (B.E.) in Information Science & Engineering from **Siddaganga Institute of Technology**(**SIT**)
- ✓ Java, J2EE, Spring and Hibernate courses from Java Home Cloud Institute.
- ✓ ABB workshop on Secure ATM by image processing.
- ✓ Microsoft .NET course from Microsoft Organization.

Skill Set:

Contact no: +91 9632738869 **Email:mgowthamswaroop@gmail.com**
Gowtham Swaroop M

Programming Languages	Java, Project Reactor
J2EE Technologies	JSP, Servlets, JDBC
Framework	Spring Boot, Spring Cloud, Spring JPA, Spring Security
Relational Database Languages	SQL, PL/SQL
ORM Tool	Hibernate
Cloud-Native Technologies	Dockers, Kubernetes
Web Services	Soap, Restful
Monitoring & Visualization Tool	Prometheus and Grafana
Devops	Gitlab, Ansible
Web Related	Java Script, HTML, XML
IDE Tools	Eclipse, IntelliJ IDEA
Operating Systems	Windows Family, Linux
Servers	Jetty Server, Oracle WebLogic, Apache Tomcat
Database	Oracle 10g, Druid, MYSQL, Click House
MOM	Rabbit MQ, JMS, Kafka, Kafka Streams, KRaft
Testing Frameworks	TestNG, Junit, Mockito
Tools & Utilities	Maven, Gradle, ANT,SVN, Log4J

Project Profile:

Project #1

Martini

BT Global Services **July 2022-till date**

The Martini Super Admin and Reporting module provides a unified, role-based analytics platform enabling global administrators and users to manage thresholds, KPIs, and reports efficiently. Users can create, modify, and share custom reports, dashboards, and KPIs across vendors and technologies using dynamic data sources such as raw, hourly, daily, and weekly. Reports can be downloaded in multiple formats including PDF, CSV, and XLSB, or scheduled for automated email delivery. It includes flexible customization of table columns, chart labels, and busy-hour definitions for better data visualization. The upload utility allows node or site-based filtering across operators. Overall, the module ensures a seamless, centralized reporting experience combining flexibility, scalability, and user control.

Responsibilities:

- ✓ Implemented real-time data collection and processing for Starlink satellite metrics using Kafka Streams (KStreams) to ensure high-throughput, low-latency data ingestion.
- ✓ Contributed to the microservices architecture design, ensuring scalability, modularity, and fault tolerance across distributed components.
- ✓ Performed code reviews and provided technical guidance to fellow developers to maintain coding standards and best practice.
- ✓ Resolved priority and performance-related issues to enhance system responsiveness and data aggregation speed
- ✓ Collaborated closely with clients and stakeholders to gather business requirements and translate them into scalable technical solutions.
- ✓ Conducted knowledge transfer sessions and mentored new team members to ensure smooth onboarding and project continuity.

Environment: Java, Microservices, Kafka, Spring Boot, Hibernate, REST, Gitlab, Click House, MYSQL, Junit, Grafana, Dockers & Kubernetes, Sonar cube, Jacoco Reports.

Project #2

Future Voice

BT Global Services **February 2019-June 2022**

Future Voice's primary aim is to deliver professional, unified communications-led business solutions based on respect, commitment, and excellence. We provide true value to our customers by learning everything we can about them and supplying frictionless and Voice Quality solutions. VQ metrics and performance analysis shown across various dashboards including SIP error codes, capacity planning data, country level activity for Global SIP trunk and ICG inbound SIP services. We verify the end-to-end caller experience by measuring the "mean opinion score" (MOS), Jitter, Packets lost etc. Assess the end customers' perception of the call quality and automatically verify the call quality of service level.

Responsibilities:

- ✓ Designed Bulk load templates which make an actual call to the respective phone/landline numbers across the countries using CSG assure platform.
- ✓ Implemented the Restful Webservices to access external API's as well as to expose our Metric level services.
- ✓ Involved In implementing the Collector module which is the soul of project using Project Reactor.
- ✓ Developed Spring Boot project for future voice Scheduling Services.
- ✓ Designed Micro Services architecture.
- ✓ Fixing Priority and Performance related issues.
- ✓ Interacting with clients for the business requirements.
- ✓ Knowledge transfer to the new members of our team.

Environment: Java, JavaScript, Kafka, Microservices, Spring Boot, Hibernate, Project Reactor, Rest, Gitlab, Druid, MYSQL, Junit, Grafana, WebLogic, Sonar cube.

Project #3

Matrix R and D

Tangoe India **July 2016- January 2019**

Tangoe Matrix suite is an end-to-end solution for enterprises communication lifecycle management comprising Mobile Device Management, Assets Management, Expense Management, and Business Forecasting to name few. Matrix is a SaaS and Cloud based solution, built on a new innovative software architecture through a single solution, Matrix enables organizations to turn-on, manage, secure, and support various connections, while more effectively managing the strategy, risks, expense, productivity, visibility, and expanded potential of connections, and associated assets across the enterprise, and throughout the ecosystem (supply chain) including carriers, suppliers, partners, and customers.

Responsibilities:

- ✓ Involved in implementing Scheduling framework with respect to our application.

Contact no: +91 9632738869 **Email:mgowthamswaroop@gmail.com**
Gowtham Swaroop M

- ✓ Involved in R & D and implemented the same in Epics.
- ✓ Attending daily stand-up calls.
- ✓ Involved in Code refactoring.
- ✓ Implemented Spring and Hibernate Integration.
- ✓ Involved in Creating Stored Procedures, Functions, Materialized and Secure views.
- ✓ Implemented Restful Webservices for Asset and Order Services.

Environment: Java, JSP, Spring MVC, Hibernate, Micro Services, Rabbit MQ, SQL Developer, Maven, SOAP and REST.

Project #4

Secure Finance MEPS Payment Implementation
Globallogic India **Oct 2015-July 2016**

Payment System provides a functionality to transfer fund from one financial institute to another financial institute using financial institute deposits. This project is for maintaining the details of all large value transactions pertaining using MEPS under MAS (Monitory Authority of Singapore).Our Application moves all the transactions securely, flexibly, and efficiently .Our Solutions provide a competent advantage of processing the entire bank needs to satisfy esteemed customers and maintains data which bank can use for biasing customers and provide NBK a more convenient and efficient way of processing transactions. Our application takes care of monetary policy, supervision of the banking system, Facilitation of smooth functioning of the national payment system, development and administration of laws and regulations governing consumer credit.

Responsibilities:

- ✓ Interaction with the business analysts, infrastructure team, database team, testing team for understanding requirements, environment setup, interfacing with database respectively.
- ✓ Designed user interface using JSP, Servlets and HTML.
- ✓ Worked on service layer using Spring MVC & Hibernate.
- ✓ Implemented Validations for the beans using Validation Spring Framework.
- ✓ Involved in the preparation of functional and technical documents.
- ✓ Used Top- Bottom and Bottom-Top approaches to build Web Services.
- ✓ Maintenance of Participant Interface request & response provided by MAS.

Environment: Java, JSP, Spring MVC, Hibernate, Oracle 10g, IBM Websphere 7.

Personal Details:

Name	:	Gowtham Swaroop M
DOB	:	07/11/1990

I hereby declare that all the details furnished above are true to the best of my knowledge.
