katikaeranna051@gmail.com, erannakmsc@gmail.com

Years of experience: 14

PROFESSIONAL SUMMARY:

- Around 14 Years of experience in developing enterprise applications in different domains like Education domain. Good in analyzing, designing, and developing technical solutions using Java/J2EE technologies.
- Strong hands-on experience in developing Web applications on N-tier Architecture using Java/J2EE and java- based technologies such as Spring, Servlets, JSP, Hibernate, Web services, XML, JPA, JDBC, Spring MVC, Spring Boot, Microservices.
- Hands on experience in building projects using popular IDEs such as Eclipse, IntelliJ and Visual Studio Code.
- Experience in Agile software development process, Test Driven Development and Scrum methodologies.
- Extensive work experience in all phases of Software Development Life Cycle (SDLC) including Analysis, Design, Coding, Testing and Implementation in Agile (Scrum), TDD Environment.
- Extensive experience in data processing and interfacing (Back-end/Front-end connectivity) skills using Oracle 9i/10g/11i (SQL, PL/SQL, Stored procedures), MySQL.
- Implemented Java SE8 features like Lambda, Streams and Predicates to reduce the line of code.
- Used GIT for Source Control, Version Management and used log4j for logging.
- Involved in CI/CD process using GIT, Jenkins creation and Maven Build.
- Maintenance experiences of Continuous integration build engines such as Jenkins.
- Experience in Build, Package and Deploy to all the environments.
- Experience in tools like Trello and JIRA.
- Hands on experience with building tools like Maven.
- Understanding the requirements and functional specifications of the assigned module.
- Responsible for adding the UI Interface with the given html prototypes.
- Coding and Programming in accordance with the Program Specifications.
- Responsible for executing and Unit testing the developed module with provided test cases before releasing to QA.
- Handled all the requirements related to Coding (Java/JavaScript), SQL and User Interface.
- Proven ability to troubleshoot and identified the root cause of issues.

EDUCATIONAL QUALIFICATION:

- MSC (Computer Science) from Rayalaseema University in 2008, Kurnool.

TECHNICAL EXPERIENCE:

Area	Systems
Technologies and Architectures	• Spring MVC, Spring Boot, Microservices. Kafka
Development Methodologies	• Agile & Scrum/ Sprints, TDD, DevOps, AWS
Programming Languages	• Java/Java EE/Java8 • SQL, My-SQL Server
Java EE Technologies	• Servlet/JSP, JPA/ORM (Hibernate), JDBC • JUnit (Mockito)
Web Technologies	• HTML5, CSS • JavaScript, jQuery, AJAX
Web/Transport Protocols	• HTTP(S), SSH/FTP
Continuous Integration/Development	• Jenkins • Maven, JIRA, Confluence, Sonar, Git/GitHub

PROFESSIONAL EXPERIENCE:

Company: Bristlecone India Pvt. Ltd **Feb 2025 to Till Date**
Client: Renaissance software solutions

Description:
The Student Portal, SchoolCity's online assessment management system, through which students can access and take and submit the scheduled assessment through online. This online assessment is internally connected with STARS Suite from where teachers will control the online assessment such as scheduling, setting online tools, exam duration, pin to start the exam.

Role: Senior Software Engineer
Responsibilities:

- Understanding the requirements and functional specifications of the assigned module/functionality.
- Responsible for complete development like coding, testing and development.
- Attending Daily Stand-up with team regarding the ticket status/assignments, ongoing enhancements, and build/deployments.
- Involved in requirement gathering and understanding ticket work in progress using JIRA.
- Optimize the code deployment and implement necessary infrastructure changes.
- Creating the clear documentation for deployment pipelines so that we can record which all the changes are deployed for the current release.
- Ensure that CI/CD pipelines are always running smoothly.
- Ensure that the pipeline processes the build successfully for compiling managing dependencies and generating the build artifacts (e.g., JAR files, Docker Images etc.)
- Ensure that smooth merging of code from different developers or feature branches into the main branch and setting up automated testing to detect and resolve the merge conflicts.
- Designed and deployed cloud-native applications on **AWS services** (EC2, S3, RDS, ECS)
- Migrated on-premise applications to **AWS cloud** ensuring scalability, availability, and cost optimization.
- Set up **monitoring and alerting** using CloudWatch and AWS CloudTrail for system health and auditing.
- Developed and maintained **real-time data streaming pipelines** using Apache Kafka.
- Implemented **event-driven microservices architecture** leveraging Kafka topics and consumer

groups.

- Managed Kafka clusters for **high-throughput, fault-tolerant message processing**.
- Integrated **Kafka with Spring Boot applications** for asynchronous communication.

Environment: Java, Spring Boot, Microservices, Kafka, Aws, JavaScript, IntelliJ, GIT, GitLab, Jenkins, Sonar, MySQL.

Company: Bristlecone India Pvt. Ltd **Apr 2022 to Feb 2025**
Client: Renaissance software solutions

Description:
The Student Portal, SchoolCity's online assessment management system, through which students can access and take and submit the scheduled assessment through online. This online assessment is internally connected with STARS Suite from where teachers will control the online assessment such as scheduling, setting online tools, exam duration, pin to start the exam.

Role: Lead Software Engineer
Responsibilities:

- Conducting Daily Stand-up with team regarding the ticket status/assignments, ongoing enhancements, and build/deployments.
- Involved in requirement gathering and understanding ticket work in progress using JIRA.
- Handling the Service Now tickets and assigning the tickets to the team and provides KT if required based on the complexity of the issue.
- Conducting sprint planning, Task estimation, Retrospective and tracking the progress to meet the deadlines.
- Developing the Code and supporting the Incident management tool.
- Identifying the issues/bugs in production environment and fixing them in time.
- Designed and deployed cloud-native applications on **AWS services** (EC2, S3, RDS, ECS)
- Migrated on-premise applications to **AWS cloud** ensuring scalability, availability, and cost optimization.
- Set up **monitoring and alerting** using CloudWatch and AWS CloudTrail for system health and auditing.
- Developed and maintained **real-time data streaming pipelines** using Apache Kafka.
- Implemented **event-driven microservices architecture** leveraging Kafka topics and consumer groups.
- Managed Kafka clusters for **high-throughput, fault-tolerant message processing**.
- Integrated **Kafka with Spring Boot applications** for asynchronous communication.

Environment: Java, IntelliJ, GIT, Oracle Development tool, Hibernate, Spring framework and Spring Boot, Microservices, Kafka, Aws.

Company: Bristlecone India Pvt. Ltd **Oct 2020 to Apr 2022**
Client: School City Learning India Pvt. Ltd

Description:
The Student Portal, SchoolCity's online assessment management system, through which students can access and take and submit the scheduled assessment through online. This online assessment is internally connected with STARS Suite from where, teachers will control the online assessment such as scheduling, setting online tools, exam duration, pin to start the exam.

Role: Software Engineer
Responsibilities:

- Understanding the requirements and functional specifications of the assigned

module/functionality.

- Design and develop the application using HTML5 and JavaScript framework.
- Developed using new features of Java 1.8 annotations, Generics.

- Implemented the associated business modules integration using Spring and Hibernate data mapping.
- Implemented jQuery to develop the widgets and to perform the client-side validations, UI centric Ajax behavior.
- Using GIT for Source Control and Version Management and using log4j for logging.
- Wrote SQL queries, stored procedures to enhance performance.
- Responsible for adding UI interface with given HTML prototypes.
- Coding the programs in accordance with Program Specifications.
- Responsible for executing and Unit test the developed module with provided test cases before releasing to QA.
- Handled all the requirements, issues related to Coding (Java/JavaScript), SQL and User Interface.

Environment: Spring boot, Spring MVC, Java, Hibernate, GIT, GITHUB, JIRA, MS-SQL Server stored procedures, jQuery, AJAX, HTML & CSS.

Company: EdTech Illuminate education (SchoolCity) **Apr 2010 to Sept 2020**
Project Name: STARS Staff Portal

Description:
The Student Portal, SchoolCity's online assessment management system, through which students can access and take and submit the scheduled assessment through online. This online assessment is internally connected with STARS Suite from where teachers will control the online assessment such as scheduling, setting online tools, exam duration, pin to start the exam.

Role: Software Engineer
Responsibilities:

- Understanding the requirements and functional specifications of the assigned module/functionality.
- Design and develop the application using HTML5, CSS3 and JavaScript.
- Developed using new features of Java 1.8 annotations, Generics.
- Implemented the associated business modules integration using Spring and Hibernate data mapping.
- Using GIT for Source Control and Version Management and using log4j for logging.
- Wrote SQL queries, stored procedures, triggers, and views to enhance performance.
- Responsible for adding UI interface with given HTML prototypes.
- Coding the programs in accordance with Program Specifications.
- Responsible for executing and Unit test the developed module with provided test cases before releasing to QA.
- Handled all the requirements, issues related to coding (Java/JavaScript), SQL and User Interface.

Environment: Spring MVC, Spring boot, Hibernate, Java, GIT, GITHUB, JIRA, Trello, MS-SQL Server stored procedures, jQuery, AJAX, HTML & CSS.
