Swapna

Mobile No : 8904559967
Mail ID : yswapna8104@gmail.com

Professional Summary:

- Over having 4 years of experience in developing and maintaining Client/Server, Web based applications using JAVA and J2EE technologies.
- Strong hands-on experience with Spring, Node JS,Spring boot, Microservices and Design Patterns
- Experience in core Java technologies OOPS, Multithreading, Abstraction and Polymorphism.
- Having experience in front-end technologies like HTML,CSS,Javascript,Angular,React JS.
- Expert in developing components using Spring and Hibernate,JPA and managing the life cycle.
- Strong Programming experience in Java, Lambda, Data Structures, Java Beans.
- Extensive working knowledge on design patterns like Singleton, Factory, MVC and DAO.
- Good Exception Handling skills and Debugging of Runtime Errors in the application code.
- Well-versed in all phases of software development and working with all stakeholders like QA, Dev, UAT and Production control teams and and resolving issues of an application.
- Well versed with Continuous Integration, Continuous Deployment and Agile methodologies.
- Clear understanding over the web and application servers like Apache Tomcat
- Excellent knowledge on implementing restful web services.
- Good hands-on experience in SQL and PostgreSQL database.
- Enthusiastic learner who quickly grasps concepts and technical skills
- Experience of working in the complete Software development life cycle involving development, documentation, testing and maintenance
- Good understanding of product development life cycle and client customization .

EDUCATION:

- **BSc** from **SGS Arts College,Sri Venkateswara University.**

TECHNICAL SKILLS:

Languages	Java
J2EE Technologies	Servlets,JSP,JDBC
Frame works	Microservices,Spring,Spring boot,JPA,Hibernate,Node JS
Frame Work Modules	Spring MVC,Spring Security,Spring ORM
Web Technologies	Javascript,CSS, HTML,React JS,Angular
Web Server	Tomcat
IDE	Eclipse,IntelliJ
Testing tool	Junit
Databases	SQL,PostgreSQL
Build & CI/CD Tool	Maven & Jenkins
Version Control	GIT,Bit bucket
Other Tools	Postman,Multithreading,Jira,Kubernetes,Kafka

WORK HISTORY:

Duration	Organization	Designation
Aug 2021 to Till date.	**Infosys**	**Software Engineer**

PROJECTS

1.Project	**NetBank – Digital Retail Banking Portal**
Client	**HSBC – UK**
Duration	**June 2024 to Till date**
Environment	**Java,Spring,Spring boot,Microservices,Hibernate,IntelliJ,Tomcat,Angular,Node JS,AWS,Jira,Maven,Jenkins,Jira,Junit,Rest API,SonarQube,Multithreading,GIT,PostgreSQL,Postman.**

Description: NetBank is a secure and scalable online banking platform that enables customers to manage their bank accounts, transfer funds, apply for loans, and pay bills. It offers real-time account dashboards, multi-factor authentication, and robust transaction workflows. Customers can generate statements, download PDFs of transactions, and schedule future payments.

Roles & Contribution:

- Writing the business logic for a given activity.
- Implemented hibernate components.
- Participated onsite discussion for the requirement gathering .
- Analyse the system requirements.
- Involved in the designing of activities.
- Involved in implementing restful web services.
- Doing the code reviews.
- Test the developer test cases and do the unit testing.
- Experience in developing highly interactive web applications utilizing Angular.
- Good experience in developing the single-page applications using Angular.
- Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.
- Working with Agile methodology using Jira tool.

2.Project	**Digital Transformation (DT)**
Client	**Motorola Solutions**
Duration	**Jan 2023 to May 2024**
Environment	**Java,J2EE,HTML,CSS,Javascript,Bootstrap,Spring,Spring ORM,Hibernate,React JS,Kafka,Kubernetes,Eclipse,Visual Stuido,Bit bucket,Junit,SQL.**

Description :MOTOROLA SOLUTIONS produces and sells communications products and services to public safety and government agencies (law enforcement, fire, emergency medical services, and national government security) as well as private entities including utilities, mining, energy, manufacturing, hospitality, retail, transportation and logistics. Motorola designed and sold wireless network equipment such as cellular transmission base stations and signal amplifiers. Motorola's home and broadcast network products included set-top boxes, digital video recorders, and network equipment used to enable video broadcasting, computer telephony, and high-definition television..

Responsibilities :

- Implementation of Web Pages in JSP using Javascript for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design and developed business logic.
- Develop the site and integrate the dynamic pages with the static designs.
- Used Spring Framework for Dependency injection.
- Implementation of Web Pages in JSP using Spring Form Tag Library.
- Involved in developing Controllers using Spring ORM.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.

3.Project	**Clinical Project Management**
Client	**Parkway Hospitals, Singapore**
Duration	**Aug 2021 to Dec 2022**
Environment	**Java,Spring boot,Microservices,Spring,Eclipse,Algorithms,Collections,Data structures,JPA,Jira,Junit,GIT,Postman,SQL,Rest API.**

Description : Clinical Project Management (CPM) caters for clinical needs such as clinical setup, clinicians and patient enroll. It also facilitates the integration of insurance companies and Pharmacies. The highlighted feature of CPM is it streamlines the patient scheduling. The project can be used by a single clinic or can be used as a CPM center in which multiple clinics can be enrolled.

Responsibilities :

- Develop reusable, modular, and scalable backend components using JavaApply object-oriented programming (OOP) principles, design patterns and best practices in clean code.
- Design and implement RESTful APIs using Spring Boot.
- Break down monolithic functionality into independent microservices.
- Implement API versioning, rate limiting, and gateway routing using Spring Cloud Gateway.
- Implementing on Spring Boot and Microservices.
- Getting the Requirements from the requirement analysis and Bug Tracking tool JIRA.
- Implementing on Spring Data JPA and Restful web services.
- Wrote JUnit test cases to ensure the reliability and accuracy of the system.
- Implementing written Service and Repository interface along with their implementations.
- Injected the Repository into service classes using Spring IOC pattern.
