

Ashutosh Chandra Dipak

Phone No.: 6362853651

E-**mail Id**: ashutoshchandradipak123@gmail.com

I have 7**.5+ years** of experience in development of web-based application using Java **fullstack** and its related technologies. Currently working as **java full stack developers in Capgemini** .

- Worked on integration of Spring with Restful Service.
- Used testing tools like SOAP UI, Postman and Advanced Rest Client for testingWeb Services.
- Influential character with good technical & pioneering skills and can handle Software projectsefficiently.
- Ability to work creatively and effectively with staff and managers.
- Outstanding skills in analysis, strategy and planning.
- Enthusiastic, personable and professional in appearance and manner.

Domain	Web Application- Developer
Tools	Software IDE/Editor – Eclipse, STS Postman, Advance Rest Client, SoapUI, Maven, SwaggerUI2.0, Visual Studio Code, JIRA, BugZilla, Git,VSCODE.
DB	MySql, Oracle,H2 DB
Software Languages	Java, Core-Jave, Spring Boot, Microservices, Hibernate,Rest-API.
Web Technologies	**Angular2..5, ReactJS**, Bootstrap, Css, React Material,React bootstrap,Redux,Saga desine pattern,React toolkit

Company Name	**Synechron(BNP Paribas)**	Duration	1.5 years
DOJ		DOL	Untill
Project Name	**Workbench**	Team Size	25 people
Description			

Role & Contribution	**Role: Software Engineer.** Contribution: • Understanding the Business Requirement.
	Trading application where use can book the trade and do some kind of short selling.
Technologies	Java spring boot, Angular, Junit, React Material UI. Kafka avrò schema. Ag grid
Tools	**Eclipse IDE, Maven, GIT, JUnit, Tomcat Server,Jira, VSCode.**

Project5:

Company Name	**Capgemini(Mercedes Benz client)**	Duration	1.5 years
DOJ		DOL	Untill
Project Name	**GSEP,SIWOS,Utilities,Helpdesk**	Team Size	25 people
Description			
Role & Contribution	**Role: Software Engineer.** Contribution: • Understanding the Business Requirement.		

	• Invole to transform the existing apllication from java jsf to **java--> react.** • Desine the web page using the **react js MUI Bootstrap.** • Desine the project UI architecture and converted existing **HTML** to **reactjs, bootstrap, css.** • Created resposnsive **singlepage** application where content on- demand loaded. • Involve to fixing the security vulnaribilities for all existing applications, added the changes for UI/UX, like adding the **progressbar loading bar** desine UI, worked to improve the UX for existing screen. • Written **testcase**, involved new end point development for new usecases or feture developments. • **Authentication, Autherization, roles based autherizations ,I18N, ChartJs Integration.** • Involved to fixed the vulnaribilitie for **SonarScan, BlackDuck** related fixes.
Technologies	Java spring boot, React js, Redux, Junit, React Material UI, React bootstrap, css, React toolkit.
Tools	**Eclipse IDE, Maven, GIT, JUnit, Tomcat Server,Jira, VSCode.**

Project4:-

Company Name	**Capgemini (Mercedes Benze)**	Duration	1 year
DoJ	09-Jun-2021	DoL	Till now
Project Name	**Common data plateform**(CDP-EXCEL- SERVICE,Linkeddata-integrator, Orchatration,Qmate service)	Team Size	25 people
Description	UAE Exchange is a United Arab Emirates based company dealing primarily in remittances, foreign exchange and bill payment solutions.		
Role & Contribution	**Role: Software Engineer.** Contribution: • Understanding the Business Requirement and Designdocument. • Used Sprinboot to create the rest API. • OneAPI documentation for all API's. • Created CDP-excel excel service which consume the data from graphql and transform to different bit64 encoding and return return to UI, common service for all crreen with different response formate. • Create API for linkeddata integrator, which was taking the data from hasura platform and returning to particular format. • Asynchronronouse programing QMATE service, to optimize the		

	performance and redure the execution time, just converting the independents job to parallar processing.
Technologies	Java Rest API, Hasura GQL,Jolt transformation,One Api documentation, Docker ,Kubernate.
Tools	Eclipse IDE, Maven, GIT, JUnit, Tomcat Server,Nexus,Jira, Oracle11g.

Project 3:

Company	**IBM India Pvt Ltd.**	Duration	2.3 years
Date of joining	15-Feb-2019	Date of leaving	07-Jun-2021
Project Name	**TASA (Trust Accounting SystemAdministrator)**	Team Size	3 people
Description	Trust Accounting System Administrator (TASA) A web based online platform, which allows authorized users to update NAV's, Dividend and Unit Values on Funds Where prices are not provided to SIC or where late price adjustments is required. These rates, along with those provided by our Fund company partners and are used to determine valuations as part of the RP Nightly Trade Cycle.		
Role & Contribution	**Role: Full-stack developer.** Contribution: • Involved in gathering the requirements from BA's. • Did Development of the Code as per the System Requirements Specification. • Preparing positive and negative test cases for given requirement. • Developed Business classes and also implemented DAL layer. • Involved in coding DAO classes and mapping files using JPA. • Implemented Spring-Boot, Angular5. • Involved in creating the web pages using Angular. • Involved in performing Unit testing usingJUnit. • Involved in development of end-to-end use cases.		
Technologies	Java, Spring-Boot, Oracle, Angular5, Rest Web Services, Jboss server		
Tools	Pom Reposity (Nexus), Build typ (Maven),GIT, Eclips, VS Code**.**		

Project 2:

Company	**NIIT Technology Pvt ltd.**	Duration	5 months
DOJ	28-May-2018	DOL	12-Nov-2018

Project Name	NGC-COSYS	Team Size	100 people
Description	COSYS designed by SATS Cargo, winner of 16 AFSCA Best Air Cargo Terminal in Asia (Since 1990), is an integrated air cargo ground handling system which automates and simplifies air cargo ground handling while playing a vital role in the entire cargo chain from the Shipper to the Consignee.		
Role &Contribution	**Role: Senior Software Engineer** Contribution: • Involved in gathering the requirements fromBA's. • Did Development of the Code as per the System Requirements Specification. • Preparing positive and negative test cases for givenrequirement. • Developed Business classes and also implemented DALlayer. • Involved in coding DAO classes and mapping files using JPA. • Implemented Spring-Boot, Angular5. • Involved in analysed the defects, bugfixing. • Involved in performing Unit testing usingJUnit. • Involved in development of end-to-end use cases.		
Technologies	Java, Spring-Boot, MsSql, Angular5.		
Tools	JDK 1.8, log4j, Eclipse IDE, Maven, GIT, JUnit, Tomcat Server, DevTool.		

Project 1:

Project Name	**Magna infotech(Happiest Minds Technology)**	Team Size	6 months
DOJ	15/01/2018	DOL	5/25/2018
Project Name	UAE Exchange	Team Size	25 people
Description	UAE Exchange is a United Arab Emirates based company dealing primarily in remittances, foreign exchange and bill payment solutions.		

Role & Contribution	**Role: Senior Software Engineer.** Contribution: • Understanding the Business Requirement and Designdocument. • Used Struts framework to create this application. • Developed various actions and validate for the frontend. • Implemented DAO components in theapplication.

	• Involved in analysis the defects, bugfixing. • Used Struts, store procedure for performing Data baseoperation.
Technologies	Java, Spring boot, Rest Api, ReactJs.
Tools	JDK 1.8, log4j, Eclipse IDE, Maven, GIT, JUnit, Tomcat Server,Nexus,Jira, Oracle11g.

PG Diploma(C-DAC)	2016.
Qualification	Bachelor of Technology in Computer Science and Engineering from institute of technology Dr. RML avadhfaizabad up 2014
