Bhupati Samal

Expertise: Java Backend
Experience: 10+ years

Email: samal.bhupati@gmail.com
Mobile: +91-9986812120

Seeking an opportunity in a reputed organization where acquired skills and education are utilized towards continued growth and advancement while contributing to the organization's growth, along with the growth of profession.

Professional Summary

A seasoned professional with 10+ years of experience in Analysis, Design and Development of Client/Server and web based software applications using J2SE, J2EE, Struts, Spring/ Spring-Boot , Hibernate and with REST & SOAP Web Services. Also have hands on experience in to Microservices Architecture. Expert in implementing design patterns of Cache Pattern, Observer Pattern, Chain of Responsibility Pattern, and Publisher Subscriber Pattern. Implemented understanding of NON-Blocking IO and Asynchronous Programming for Completable Future. Experienced in implementing **Java multithreading**, **Data Structure & Algorithims** for different projects. Have architected applications using Java & JEE technologies. I exhibit good oral and written communication skills and a good team player. Also have work experiences with **Banking & Telecom** client projects.

Technical Skills

Operating System	Windows,Linux
Technologies	Java 8(Core java, JDBC, Servlets, JSP), Web Services, Micro Services,Azure Cloud,Jenkins(CI/CD), JMS, SQL
Frameworks	Spring, Spring-Boot 2.0, Spring Cloud, Web Services(SOAP & REST), Hibernate, Struts, EJB, AWT, Swing,Apache Camel, Mockito
Securities/Auth.	OAuth2.0,Kerberos,SSL,TLS
Application Server	IBM-WebSphere, Weblogic, JBoss, GlassFish
Web Server	Tomcat, Jetty
Databases	Oracle 11g, sqlServer, MySQL,Hadoop
Internet Tools	HTML 5, XHTML, CSS, JavaScript, XML, AJAX, XSLT, XSD, JSON
IDEs	Eclipse,STS,Intellij
Tools & Others	Maven, Ant, SVN, Log4j, Junit, SQL Developer, Toad, Putty, WinSCP, SecureCRT,GIT, Stash, AWS, shell scripting, cron job, Puppet, HP Quality Center, service-now, JIRA, SOAP UI,PostMan, Firebug, log4j,LDAP,Teamcity

Professional Experience

Project **: Digital Self Service**
Client : Verizon, USA
Duration : Sep 2022 to till date
Role : Senior Java Developer
Environment : Spring Boot, Microservices, Rest API, Maven, GIT, Postman, Aws, Kafka, Java (OOPS, Collection, Multithreading, Stream API, Lambda Expression), Data Structure, Unix

Description: Verizon is a prominent telecom service provider in USA. Digital Self Service is having microservices application based on data & service (for device) allocation for different customers in the address based on order applied from 4G Low Data to 4G or 5G service.

Responsibilities:

- ✓ To co-ordinate with clients/business users to understand the requirements, agree upon the task to be accomplished.
- ✓ Estimate the efforts needed to accomplish the tasks.
- ✓ Analyze and design based on the task and.
- ✓ Prioritize the tasks with clients, agree upon the delivery time frames.
- ✓ To assign the task among the team members, help them if needed.
- ✓ Convey the progress to clients/users, and managers.
- ✓ Prepare statistical reports on incident management and problem management.
- ✓ And, to provide the preventive measures (wherever applicable) to reduce the incident count.
- ✓ Communicating with clients & on-site coordinator to provide timely support needed to clients, team-players, managers.
- ✓ Prepare a performance improvement proposal and get it approved by clients, by explaining them.

Project **: FPH Cloud**
Client : Morganstanley, USA
Duration : Oct 2020 to Aug 2022
Role : Java Developer
Environment : Spring Boot, Micorservices, JDBC, Rest API, Maven, GIT, Postman,Azure, Kafka, Java (OOPS, Collection, Multithreading, Stream API, Lambda Expression), Data Structure, Unix

Description: Morganstanley is a prominent investment banking service provider in USA. FPH cloud is the project based on data & service migration of financial advisor(FA)s from mainframe system to AZURE cloud systems in permanent basis to minimize mainframe down issue. New application are being developed like 3D, UVE,PADT ,Grafana etc.

Responsibilities:

- ✓ To guide a team of 4 java developers.
- ✓ Analyze and design based on the task and prioritize the tasks with clients, agree upon the delivery time frames.
- ✓ To allocate assigned the task among the team members, help them if needed.
- ✓ Conduct status meetings, to check the progress and
- ✓ Convey the progress to clients/users, and managers.
- ✓ Prepare statistical reports on incident management and problem management.
- ✓ Provide preventive measures (wherever applicable) to reduce the incident count.
- ✓ Communicating with clients & on-site coordinator to provide timely support needed to clients, team-players and managers.
- ✓ To identify the scope of performance improvement in existing application and discuss the feasibilities of process improvement with leads and managers.
- ✓ Performance improvement proposal and get it approved by clients, by explaining them

Project **: Data Lake Implementation for SBI Card**
Client : SBI Card, India
Duration : July 2019 to July 2020
Role : Java Developer
Environment : Spring Boot, Micorservices, JDBC, Rest API, Maven, GIT, Postman, Hadoop, Kafka, Java (OOPS, Collection, Multithreading, Stream API, Lambda Expression), Apache Camel, Data Structure, Unix

Description: SBI Card is a prominent credit card service provider in India. SBI Card is the third largest corporation in the Indian region and one of the top10 financial services companies in India based on credit card market capitalization.

Responsibilities:

- ✓ Estimate the efforts needed to accomplish the tasks.
- ✓ Prioritize the tasks with clients, agree upon the delivery time frames.
- ✓ Integration with apache camel in springBoot for banking system
- ✓ To assign the task among the team members, help them if needed
- ✓ Conduct status meetings, to check the progress and convey the progress to clients/users, and managers
- ✓ Prepare statistical reports on incident management and problem management.
- ✓ provide the preventive measures (wherever applicable) to reduce the incident count.
- ✓ Communicating with clients & on-site coordinator to provide timely support needed to clients, team-players and managers.
- ✓ To identify the scope of performance improvement in existing application and discuss the feasibilities of process improvement with leads and managers.
- ✓ Performance improvement proposal and get it approved from clients, by explaining them the advantages of proposal, cost involved, and value add to the application.

Project **: Nordea Bank (FATCA and CRS Platform)**
Client : Nordea Bank, Sweden
Duration : Nov 2017 to June 2019
Role : Java Developer
Environment : Spring Boot, Hibernate, RestFull Web services, drools, Maven, GIT, Java (OOPS, Collection, Multithreading, Stream API), Data Structure

Description: Nordea is a prominent bank in Nordic countries. Nordea is the third largest corporation in the Nordic region and one of the top 10 financial services companies in Europe based on market capitalization.

Responsibilities:

- ✓ To manage a team of 4 java developers.
- ✓ To co-ordinate with clients / business users to understand the requirements, agree upon the task to be accomplished.
- ✓ Estimate the efforts needed to accomplish the tasks.
- ✓ Analyze and design based on task at hand.
- ✓ Prioritize the tasks with clients, agree upon the delivery timeframes.
- ✓ To assign the task among the team members, help them if needed.
- ✓ Conduct status meetings, to check the progress and
  Convey the progress to clients / users, and managers.
- ✓ To provide the preventive measures (wherever applicable) to reduce the incident count.
- ✓ Communicating with clients & on-site coordinator to provide timely support needed to clients, team-players and managers.
- ✓ To identify the scope of performance improvement in existing application and discuss the feasibilities of process improvement with leads and managers.
- ✓ Preparing a performance improvement proposal and get it approved by clients, by explaining them the advantages of proposal, cost involved, and value add to the application.
- ✓ To provide solution / work around for the incidents raised for FATCA and CRS applications within the SLA time. And to provide the permanent fix (if needed).

Project **: Cobe Reporting System(QlikView, nPrinting)**
Client : Goldman Sachs, USA
Duration : Oct 2016 to Apr 2017
Role : Java Developer
Environment : Java (OOPS, Collection, Multithreading), ElasticSearch, Spring Boot, RestFull, Kafka, Micoservices,Apache Camel, Data Structure

Description: This project was intended to make a cache to keep data of 88000 entities. First, we used eh-cache to solve this problem. But as eh-cache made the system slower, we moved to static HashMap.

Responsibilities:

- ✓ Integration with apache camel with springBoot for cobe reporting system
- ✓ Development of code as per the business requirements in Java and developed JUnit codes for unit testing.
- ✓ Providing fixes to the issues identified in testing phase.
- ✓ Ensure development is completed on schedule and Ensure quality delivery up to the client standards.

Project **: HLR Viewer 4G Solution - (Telecom-OSS)**
Client : Idea, India
Duration : Mar2016 to Aug2016
Role : Java Developer
Environment : Java (OOPS, Collection, Multithreading), JSP, Servlets, SOAP Web Services, Modular Pattern

Description: HLR Viewer application in terms of Idea 4G launch all the network HLR elements will be upgraded. As a result, HLR Viewer application will be impacted in terms of interfacing with HLRs to fetch the network information. HLR Viewer currently fetches the network information for an MSISDN by firing MML commands on to the HLR for all types of HLRs and displays the same on GUI. The HLR Viewer interface with HLRs will change for the 4 type of HLRs - Ericsson, Nokia, Huawei& ZTE. 4G related information such as 4G status & 4G speed will have to be displayed on GUI in addition to the current one. Now HLRs are migrated into new generation equipment's called as UDRs for LTE support.

Responsibilities:

- ✓ Analysis of assigned task to me and gather the information's required by meeting with the team and then with client.
- ✓ Did regular discussions with team for the approach and about the feasibility of the task.
- ✓ Reusable code in the applications like connection pool and write daily rotation of log as per user specification
- ✓ Unit testing and system testing after coding at local machine
- ✓ Prepare release note and share with the client.
- ✓ Actioning Peer Review for various releases of applications.

Project **: Q-Control Networx - (Telecom-OSS)**
Client : CenturyLink, USA
Duration : Mar 2015 to Mar 2016
Role : Java Developer
Environment : Core Java, JSP, Struts, EJB, Oracle 9i, Web Logic & Web Services

Description: Q-Control Networx is a proprietary Web-based application that provides the Networx customers complete management control over a broad range of Qwest services, including Asynchronous Transfer Mode (ATM), Business Dial, Dedicated Internet Access (DIA), Dedicated Hosting, Frame Relay, Managed Firewall VPN, Network VPN, Toll-Free, and Virtual Network Services (VNS).

The General Services Administration (GSA) Networx Universal is a broadly scoped acquisition with a comprehensive suite of services. Networx includes current services as well as those that anticipate the future needs of customers. Networx replaces the existing Federal Telecommunications Services (FTS) 2001 contract and establishes the opportunity to serve the largest customer in the telecommunications industry for the next ten years.

The GSA has envisioned Networx to provide a framework that will support cross-agency collaboration, transformation, and government wide technology improvement. Networx will maximize the use of government resources by providing a common procurement infrastructure and a performance-based approach that will embrace commercial technical and interface standards. Networx will require that service providers offer the most current security features and services to ensure a secure government operating environment.

Responsibilities:

- ✓ Task analysis , assign and gather the information's required by meeting with the team and then with client.
- ✓ Regular discussions with team for approach and about the feasibility of the task.
- ✓ Make reusable code in the applications like connection pool and write daily rotation of log as per user specification and spring implementation in the applications.
- ✓ Unit testing and system testing after coding at local machine then two phase of Linux machine before make the changes live.
- ✓ Peer Review for various releases of applications.
- ✓ Create database tables and generate ORM mapping using Hibernate

Project : ProQuest Content Technology
Client : ProQuest, USA
Duration : Oct 2014 to Feb 2015
Role : Java Developer
Environment : Java, AWT, Swing, Spring 3, Hibernate 3, Oracle 9i &KapaowRobosuite

Description: ProQuest Information & Learning is an online electronic content publishing company. ProQuest partners with various publishers to receive content from them in various formats reformat the same and store it in their own repository and generate revenue through subscription of the stored data either through Web or through various softcopy and hardcopy products. The main aim of ProQuest is to provide and share knowledge among all the students, professionals and researchers. ProQuest LLC is an account where several projects are running. From which I was involved in ICA Tool, ICA Backend, Statistical Report Tool and Robo server web interface. ICA Tool project is in both swing and web application where ICA Backend is a pure java application, Robo server web interface is a web application based on dojo and Statistical Report Tool is a web application which generates reports and graphs using jqplot. ICA Tool was used to request any service to start or stop a robot or domains and any other process. ICA Backend processes those requests and initiates robots which internally crawl's data from different vendor and process those data. And make conversion of these data to other vendors and deliver those. Robo server web interface was designed to track some logs and robots information and other details in history format so the user can assure that the robots are working fine and user can initiate the robot to live with promote to production functionality. Statistical Report Tool is generating reports, graphs and charts using jqplot

Responsibilities:

- ✓ Analysis of the tasks assigned to me and gather the information's required by meeting with the team and then with client.
- ✓ Preparing high level design documents and estimate the task and then coding the task.
- ✓ Have regular discussions with team for the approach and about the feasibility of the task.
- ✓ Optimized and make reusable code in the applications like connection pool and wrote daily rotation of log as per user specification and spring implementation in the applications.
- ✓ Doing unit testing and system testing after coding. In my Local machine then two phase of Linux machine before make the changes live.
- ✓ Create the release note and share with the client.
- ✓ Migrated Robo Server Web Interface project from Dojo 1.5 to Dojo 1.9. Performed Peer Review for various releases of applications.
- ✓ Created database tables and generated ORM mapping files using Hibernate in different applications in Content Technology applications.

Certifications

- Sun Certified Java Programmer
- RHCE PHP developer
- AWS cloud certified

Education

- KIIT(Kalinga Institute Of Industrial Technology) University, Bhubaneswar, Orissa, India, B.Tech in CSE in 2007.

Professional Organizations

- Working as a Tech Lead in Tech Mahindra from 13th Sep 2022 to till date .
- Worked as a Principal Consultant in Genpact from 16th Oct 2020 to 28th Aug 2022 .
- Worked as a Senior Consultant in Capgemini Technology Services from 27th Nov 2017 to 16th July 2020.
- Worked as a Senior Associate, Platform Level1 in Sapient Global Market from 03rd Oct 2016 to 10th Apr 2017.
- Worked as a Software Consultant in DynPro India Private Limited from 30th Oct 2014 to 01st Aug 2016

Personal Details

Father's name: Narayan Samal
Date of Birth: 26-07-1984
Present Position: Senior Consultant
Sex: Male
Marital Status: Single
Nationality: Indian
Language Known: English, Hindi, Odia
Present Address: Munekollal, Marathahalli, Bangalore – 560037, Karnataka

Declaration

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
