DEEPAK YADAV

Mobile: +917531884560 ~ E-Mail: erdeepak920@gmail.com

- A dynamic professional with 11+ years of valuable experience in Java full stack and Backend developer, Web based, SOA architecture and micro service based applications development and deployment. Worked in various stages of Software Development Life Cycle like analysis, coding, debugging, documentation, build and deployment.
- Proficient in Micro-services, Web application and Web-service (SOAP/Rest) development **JAVA, Spring Boot/MVC/Security/Validator, AWS, Hibernate/JPA, Junit, Mockito, Kafka, Oauth2, React and Angular.**
- Experience in Cloud base Microservices developments and Deployments using **Spring Cloud, Docker, Kubernetes.**
- Well versed with the entire software development life cycle using **Agile methodology, CICD methodology, Waterfall model, SOA architecture** and bug-fixing cycle.
- Good hands-on **Jira, version one, Git, Jenkins, Repository.**
- Client meetings for requirement discussion and status updates.
- Have been a team SPOC for some of my projects.
- Experience of mentoring team during different phases of the project.
- Highly motivated team player, proactive, quick learner and proven record of capability to work under deadlines.

PROFESSIONAL EXPERIENCE

- 20-Dec-2024 – 30-Sep-2025 **Corporate Infotech Pvt. Ltd. (CIPL)** as **Senior Technical Lead.**
- Oct-2021 – 06-Dec-2024 **HCL Technologies, Noida** as **Senior Technical Lead.**
- July'2017 – 15-Oct-2021 **INFINITE COMPUTER SOLUTION, Gurgaon** as **Technical Lead.**
- Mar'2014 – Jun'2017 **QUALTECH CONSULTANTS PVT LTD, Noida** as **Senior Software Analyst.**

TECHNICAL KNOWHOW

- **Java Technologies**: J2EE, J2SE.
- **Frameworks**: Micro services, Spring(Boot/MVC/Security/Validator), WebService(SOAP/Rest), Oauth2,Angular, React.
- **ORM Tool**: Hibernate, JPA.
- **Cloud**: AWS (EKS, EC2, S3, SQS, RDS, SNS, Lemda, Elastic Beanstalk etc.)
- **Messaging Tool**: Kafka, Rabbit MQ, AWS SQS.
- **Application Servers**: JBoss, WebLogic.
- **Web Servers**: Apache Tomcat.
- **SSL/TLS**: 1.2 version implemented on Tomcat, JBoss and WebLogic.
- **Databases**: MySQL, Oracle, MariaDB.
- **Tool and API**: Maven, Docker, Kubernetes, PCF, Jenkins, Jira, ouath2, Grafana, Kibana.
- **Repositorie**s: SVN, GIT, JFrog Repository.
- **Operating Systems**: Windows 7/XP/10/. Linux.
- **Tools and IDE**: Eclipse, Postman, Kafka, S3 Bucket.

PROJECT DETAILS

CIPL **Client: NIC**

1 eForms

Technologies: Spring boot, Micro services, Oauth 2, Java, JPA, Oracle, Rabbit MQ, Angular etc.

Description: eForms is a Government of India e-Governance initiative under NIC that provides a unified online platform for citizens to access and submit government service forms digitally. The platform was originally built as a monolithic system and later re-engineered into a scalable microservices-based architecture to enhance performance, maintainability, and integration with other digital platforms.

❒ **Responsibilities:**

- Led a team of 18 members in the migration of the legacy monolithic application to a microservices architecture.
- Oversaw end-to-end design, development, and deployment of core services like user management, form processing, and workflow handling.
- Personally contributed to complex modules and core logic development using Java, Spring Boot, and Hibernate.
- Implemented inter-service communication using REST APIs and message queues (Rabbit MQ).
- Designed and integrated Aadhaar e-KYC, eSign, and role-based access control for secure identity validation and submission.
- Used Spring Cloud components such as Eureka and API Gateway for service discovery and routing.

HCL **Client: FedEx**

2 ALPS (AMEA Lead Program System) Microservice

Technologies: Spring boot, Java, JPA, Oracle, Kafka, Okta, S3 bucket, Splunk, Grafana,Email API,Angular etc.

Description: ALPS courier domain project developed for FedEx. The core functionalities of this projects cover new lead prospect, Existing account upload and mapping, Customer request handling, reporting and other power user management capabilities. Supporting functions are the enablers to achieve business functions with authentication/authorization, notification and monitoring. Business Information would provide required information in terms of account creation, account details etc. to the application.

This project contains 2 microservice project alps-lead and alps-account for support mobile device (Flutter app) and web application (Node JS). This service has various role like, Courier, Manager, Senior Manager, MD, VP, SVP, Admin and support. According to role it provides the functionality for each role.

❒ **Responsibilities:**

- Requirement gathering and LLD creation.
- Coding using Spring boot, java, Junit, JPA, S3 Bucket, Kafka, Okta, Jenkins, Oracle.
- Code committing and merging on git server
- Jenkins pipeline creation and Jenkins build creation.
- Deployment on PCF.
- Test case preparation and execution Using Junit 5.
- Release notes Preparation.
- Deployment and supports in different environment.

3 Product: SQM (Service Quality Manager) **Domain : Telecom**

Description: Sqm is a Nokia Product Which is basically used for monitoring and maintenance of end-to-end services for example, voice and data services in 2G, 3G and LTE networks specific customers or developed by the operator.

SQM has different tech packs for different technologies like voice, 2g,3g, LTE etc. These tech pack contains rules that trigger the problem/alarms in SQM based on the condition provided by the customer. It takes inputs like Service name, KPIs, event name, sender DN etc and executes the rule and based on defined condition in rule it raised the problems/alarms with severity (Critical, Major, Minor, Warning) for different problems like fault, Performance, retainability, accessibility etc. SQM can take input via Rest Web service, SOAP Web service and via different Collectors provided by SQM like CSV file (csv Collector), database (DB Collector) etc.

Projects Handled in SQM:

1) **SQM Vodafone Egypt**
2) **SQM MTN Nigeria**
3) **SQM MTC Touch Lebanon**.
4) **SQM Zain Kuwait**
5) **SQM Telefonica -UK**

❒ **Responsibilities:**

- Requirement gathering
- Rules Customization in SQM
- Create Microservices and deployed it using git, Jenkins, Docker and Kubernetes.

- Create Java based utility for topology (Working Set and E2E) automation and deployed it using git, Jenkins, Docker and Kubernetes.
- Java based adapter developed to convert incoming data from UFM, UPM or any other third-party system into SQM readable format.
- Create java Adapter to push the polygon Geo JSON coordinates in SQM for different pack.
- Create java adapter for FM and PM events Simulator for different tech using customer input file.
- Customized and configured different Collector like CSV, Inventory, DB collectors provided by SQM.
- LLD creation.
- Test case preparation and execution.
- User manual and MOP.
- Deployment and supports in different environment.

Infinite Computer Solution, Gurgaon **Client: Nokia**

4 Product: NIAM **Domain: Telecom**

Description: NIAM (Netguard Identity and Access Management) is a framework design act as centralized security gateway that allow to control monitor and secure access to Telecom NEs (Switch, Router, NMS clients), NIAM has facility to configures the NEs details like IP, interfaces & properties and live node credentials detail and provide to prevent security to telecom service-based company.

❒ **Responsibilities:**
- Requirement gathering
- Create various CLI adapter for various Network element for 1 hope and 2 hope related to vendors like Huawei, Ericsson, Oracle techleck etc.
- Create various GUI adapters using AutoIt for 1 hope and 2 hope for various Vendors.
- Configure adapters in NIAM and test them.
- Test case preparation and execution.
- Preparing release note documents
  Production supports.

Qualtech Consultants Pvt ltd **Client: Vastu Housing Finance**

5 Project: miFIN HL Service **Domain: Banking and Finance**

Technologies: Jersey Rest API, JSON, Java, JDBC, Oracle 10g

Description: miFIN HL Service developed for Vastu Housing Finance, this web service developed for android app for mobile and tablet. This application handles all the request and response for coming request for Home loan and Loan against Property etc.
It takes request json from client and produce response json according to request.

Main Module:
- New Loan module, Applicant Details module, Upload Document module, Pending Details Module.
- Deviation Module, Verification Module, Valuation Module

❒ **Responsibilities:**
- Design Rest web service architecture with JDBC and JSON for mobile application.
- Codding for all module,
- Unit testing and debugging to controlled real situations.
- Provide support to android team to consuming the service
- LLD creation.
- Test case preparation and execution.
- User manual and MOP.
- Deployment and supports in different environment.

Qualtech Consultants Pvt ltd **Client: My Money Mantras**

6 Project: Lead Management System **Domain: Banking and Finance**

Technologies: Java, Spring (MVC/Core/AOP/Security), Tiles, Hibernate, ajax, jQuery, JS, Oracle 10g

Description: Lead Management System is a web-based application that developed for the client My Money Mantra. it also works as Rest web Server for mobile app. This application provides a platform for My Money Mantra helpdesk users to

generate/capture leads based on detail provided by customer over phone. It is a highly parameterized & configurable system to manage the whole process of credit card, home loan, loan against property, personal loan, vehicle loan etc. It provides flexibility to manage business process workflow through the system.

Main Module:

- New Lead Module, Quick Lead Module, Work List Module, Product Module, Documents Module etc.

❒ **Responsibilities:**

- Design Dynamic web Project architecture by using Spring (MVC/Security/Core/AOP), Java, JSP, CSS, Hibernate, Tiles, validator, Ajax, jQuery, java Script.
- Codding.
- Assign task and follow-up in team and update the status to my manager.
- Unit testing and debugging to controlled real situations.
- LLD creation.
- Test case preparation and execution.
- User manual and MOP.
- Deployment, UAT and Production supports.

ACADEMIC DETAILS

❒ **Master of Computer Application** from **IGNOU**, Noida
❒ **Bachelor of Computer Application** from **IGNOU**, Allahabad
❒ **Diploma in Java Programming** from **NIIT,** Noida

PERSONAL DETAILS

Languages Known:	Hindi and English
Date of Birth:	10 March 1992
Current Address:	583C Shipra Sun City Indirapuram
Permanent Address:	Gorakhpur U.P. -273409
