Profile Summary:

- Having 5+ years of total technical experience focused on development of software applications, responsive web design with java and J2EE technologies.
- Good experience in developing various applications using JAVA/J2EE technologies like Java, JDBC, Servlets, Jsp, Spring IOC, Spring MVC ,Spring boot, Hibernate, Restful Services, Design Patterns .
- Experience in developing front-end User Interfaces using JSP, HTML, CSS, JavaScript,Angular,React JS,J Query .
- Having experience in using and implementing Design Patterns.
- Having good experience in Spring boot,Micro Services and Spring frameworks.
- Ability to Manage and deliver results on multiple tasks by effectively managing time and priority constraints.
- Interacting with the users for system study, requirements gathering, analysis and scoping.
- Contributes to the productivity of the organization through on-time completion of projects associated with meeting departmental objectives.
- Having Experience in SOAP,REST Web Services using JAX-RS API.
- Having knowledge in Object Oriented Programming.
- Having hands-on experience in implementing MVC architecture.
- Working experience in Apache Tomcat Web Server and Web Logic Application server.
- Working exposure on IDEs like Eclipse,IntelliJ.
- Good experience in multi threading with core java and advanced java.
- Exposure to Agile Methodologies and JIRA.
- Having good work experience with SQL,PostgreSQL database.
- Zeal to take challenges and an organized professional with excellent communication and interpersonal skills.
- Keen to learn new technologies and adopt them to improve the productivity.

Education

Course	Institution / University
MSc	S.D.H.R Degree & P.G College,S.V University

Experience:

Designation	Company	Duration
Software Developer	Capgemini	July 2020 to Till date

Project Summary:

#3:

Project Name : IB- Internet Banking Solutions **Client : I & M Bank**

Duration : Jan 2024 to till date

Description : IB-Internet Banking Solution is a strategic electronic delivery channel, which allows Banking institutions to provide continuous Internet-based services to their customers of Retail and Small business market sector in a manner that is personalized, cost effective, efficient and most significantly, secure. IB effectively allows a bank to serve the clients with heterogeneous core systems across branches. Comprehensive services like Accounts, transfers, Credit card and payments modules give your customer complete control of transactional financial information with secure channels and online.

Environment :

- Java,Spring boot,Spring,Microservices
- JPA,Spring Secuity,IntelliJ,Tomcat,Angular
- Maven,Jenkins,Jira,Multithreading,SonarQube
- Node JS,AWS,Rest API,Junit,GIT,PostgreSQL,Postman.

Responsibilities:

- Implementing on Spring Boot and Microservices.
- Working as a JAVA developer and coordinating with development to track the delivery of the module on time.
- Analyse requirements to define business objectives, Design implement and maintain applications that based on the requirement.
- Testing the developed modules to make sure everything working fine and prepare the documentation of test results.
- Getting the Requirements from the requirement analysis and Bug Tracking tool JIRA.
- Implementing on Spring Data JPA and Restful web services.
- Wrote JUnit test cases to ensure the reliability and accuracy of the system.
- Good experience in developing the single-page applications using Angular.
- Experience in developing highly interactive web applications utilizing Angular.
- Implementing written Service and Repository interface along with their implementations.
- Injected the Repository into service classes using Spring IOC pattern.

2:

Project Name : MediBridge Client : GlobalCare Hospitals Network

Duration : Apr 2022 to Dec 2023

Description :

MediBridge is a comprehensive, secure, cloud-native telemedicine and digital health platform designed to enable seamless interaction between patients and healthcare providers across multiple regions. Developed for GlobalCare Hospitals Network, the platform aimed to modernize patient engagement, reduce hospital footfall, and enhance accessibility to primary and specialized care—especially for patients in remote or underserved areas.

Environment :

- Java,J2EE,Spring,Hibernate,Javascript
- Spring ORM,JSP,HTML,CSS,React JS
- Eclipse,Visual Studio,Bootstrap,SQL
- Kafka,Kubernetes,Bit bucket,Junit.

Responsibilities:

- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.
- Involved in developing Controllers using Spring ORM.
- Implementation of Web Pages in JSP using Javascript for validations.
- Used Spring Framework for Dependency injection.
- Implementation of Web Pages in JSP using Spring Form Tag Library.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design. Developed business logic.
- Develop the site and integrate the dynamic pages with the static designs.

#1:

Project Name : EuroMart – Online Retail Client : EuroRetail GmbH (Germany)

Duration : July 2020 to Mar 2022

Description :

EuroMart was conceived as a comprehensive, cloud-based e-commerce platform tailored for EuroRetail GmbH, a Berlin-based retail technology company serving both B2C (Business-to-Consumer) and B2B (Business-to-Business) clients across Germany, Austria, and the Netherlands. The platform aimed to provide a seamless, localized shopping experience that could support a broad range of user profiles — from individual consumers to large wholesale buyers.

Environment :

- Java,Hibernate,Spring boot,Spring,Microservices
- Eclipse,Tomcat,Collections,Algorithms,Agile,Maven
- Jenkins,Jira,Eclipse,Tomcat,Junit,Bit bucket,SQL,Postman,Rest API.

Responsibilities:

- Participated onsite discussion for the requirement gathering .
- Analyze the system requirements.
- Involved in the designing of activities.
- Involved to implement the restful web services.
- Implemented microservices architecture applications using Spring Boot.
- Writing the Business logic for a given activity.
- Implemented hibernate components.
- Test the Developer test cases and doing the unit testing
- Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.
- Working with Agile methodology using Jira tool.

Technical Skills:

Languages	:	Core Java
Web Technologies	:	HTML,CSS,Javascript,Angular,React JS
J2EE Technologies	:	Servlets,JDBC,JSP
Frame works	:	Spring,Microservices,Spring boot,Node JS
Frame works Modules	:	Spring MVC,Spring ORM,Spring Security
ORM Frame Work	:	Hibernate,JPA
Database	:	SQL,PostgreSQL
Application Servers	:	Tomcat,Web Sphere,Web Logic
IDE	:	Eclipse,IntelliJ
Build & CI/CD	:	Maven & Jenkins
Verison Control	:	GIT,Bit bucket
Other Tools	:	Postman,Jira,Multithreading,Kafka,Kubernetes
