SAI SURYA KIRAN

somulasaisuryaa@gmail.com | +91- 9121780999
Senior ServiceNow Developer | ITSM/ITOM/CMDB

CAREER OBJECTIVE

Accomplished **ServiceNow Platform Developer** with **6+ years** of comprehensive experience in designing and implementing enterprise-scale **ITSM, ITOM, CMDB** solutions, seeking to leverage deep technical expertise in **Discovery, Service Mapping, Event Management,** and advanced **GlideRecord/JavaScript** development to drive digital transformation initiatives as a **Senior Technical Architect** or **Solution Architect** role. Passionate about architecting scalable **Service Portal, HRSD, GRC/IRM** platforms while mentoring development teams and establishing **ServiceNow Centers of Excellence**. Committed to utilizing extensive experience across **Financial Services, Government, Healthcare** sectors to deliver innovative **IntegrationHub, Performance Analytics, Flow Designer** solutions that optimize business processes, enhance user experiences, and achieve measurable **ROI**. Seeking opportunities to lead complex implementations, drive **platform strategy**, and contribute to organizational growth through **technical leadership** and **architectural excellence** in enterprise **ServiceNow environments**.

PROFESSIONAL SUMMARY

- Elite ServiceNow Platform Developer with comprehensive experience designing and implementing **ITSM**, **ITOM**, **CMDB** solutions across Fortune 500 enterprises, delivering scalable platform architectures and driving digital transformation through advanced ServiceNow capabilities
- Advanced expertise in **Discovery**, **Service Mapping**, **Event Management** implementations, architecting comprehensive infrastructure visibility and automated service dependency mapping for complex enterprise environments
- Deep technical proficiency in **Glide Record**, **JavaScript**, **Business Rules** development, creating sophisticated server-side scripting solutions, database optimization, and custom application development for enterprise ServiceNow platforms
- Comprehensive **Service Portal**, **AngularJS**, **Widget Development** experience, architecting modern user interfaces, self-service portals, and responsive web applications for enhanced user experience and platform adoption
- Strategic **HRSD**, **HCM**, **Lifecycle Events** implementation leader, designing employee experience platforms, automated HR workflows, and integrated talent management solutions across global organizations
- Expert-level **GRC**, **IRM**, **Risk Management** architect, implementing enterprise governance frameworks, automated compliance monitoring, and integrated risk assessment platforms for regulatory adherence
- Advanced **ITAM**, **SAM Pro**, **HAM Pro** specialist, architecting comprehensive IT asset management solutions, software license optimization, and hardware lifecycle management across enterprise infrastructures
- Sophisticated **CSDM**, **Service Hierarchy**, **CI Relationships** implementation expert, designing business-aligned service models, configuration item management, and service taxonomy frameworks
- Master **Integration Hub**, **REST APIs**, **MID Server** architect, designing enterprise integration solutions, real-time data synchronization, and secure cross-system connectivity
- Advanced **Flow Designer**, **Workflow Automation**, **Approval Engine** developer, creating complex business process automation, orchestration workflows, and intelligent routing mechanisms
- Expert **Performance Analytics**, **Reporting**, **Dashboards** specialist, architecting business intelligence solutions, KPI tracking, and executive reporting frameworks for data-driven decision making
- Comprehensive **Update Sets**, **Application Repository**, **Source Control** practitioner, managing platform deployments, version control, and development lifecycle management across multiple instances
- Advanced **ATF**, **Test Automation**, **Quality Assurance** implementer, designing automated testing frameworks, regression testing suites, and quality management processes for platform reliability
- Strategic **Domain Separation**, **Multi-tenancy**, **Security** architect, implementing enterprise-grade security models, data isolation, and access control frameworks for complex organizational structures

- Distinguished technical leader in **Platform Architecture**, **Solution Design**, **Technical Governance**, driving ServiceNow Centers of Excellence, mentoring development teams, and establishing best practices across global implementations

PROFESSIONAL EXPERIENCE

SYNCHRONY FINANCIAL | Senior ServiceNow Platform Developer | Aug 2023 – Present

Environment: ServiceNow Zurich/Xanadu Release, GenAI Controller, AWS Cloud, Salesforce Financial Cloud, Oracle Fusion

Domain: Financial Services & Digital Banking | Methodology: SAFe Agile, DevSecOps

Project: Next-Generation Digital Banking Platform & AI-Powered Customer Experience Transformation

- Configured **Now Assist for ITSM** with **AI-powered categorization** and **intelligent routing** by implementing custom NLU models, training datasets, and automated ticket classification workflows for customer service automation
- Built **Service Mapping** topologies using **Discovery patterns** and **horizontal discovery** by creating custom MID Server configurations, CI identification rules, and automated relationship mapping for banking infrastructure dependencies
- Developed **CMDB data model** with **CSDM compliance** and **CI lifecycle management** by implementing transform maps, data sources, and automated reconciliation engines for financial services configuration management
- Engineered **Service Portal** widgets using **AngularJS controllers** and **server-side includes** by creating responsive UI components, REST API integrations, and dynamic form rendering for self-service banking portals
- Implemented **Employee Center** workflows with **lifecycle event automation** and **manager self-service** by configuring Flow Designer subflows, approval engines, and integration with Workday HRIS systems
- Architected **GRC framework** with **automated risk calculations** and **policy compliance monitoring** by developing custom risk indicators, control testing workflows, and executive dashboard reporting
- Configured **Event Management** correlation with **machine learning algorithms** and **predictive analytics** by implementing event rules, alert intelligence, and AIOps-driven incident prevention for banking operations
- Developed **GlideRecord scripts** with **database optimization** and **advanced queries** by implementing server-side business rules, scheduled jobs, and data transformation logic for financial calculations
- Built **IntegrationHub spokes** for **Salesforce connectivity** and **real-time synchronization** by creating custom REST endpoints, OAuth authentication, and bidirectional data mapping for CRM integration
- Designed **Performance Analytics** dashboards with **predictive forecasting** and **trend analysis** by implementing KPI indicators, automated insights, and executive reporting for operational metrics
- Created **Mobile applications** using **Mobile Studio** and **offline synchronization** by developing native mobile interfaces, push notifications, and field service automation for banking operations
- Established **ATF test suites** with **automated regression testing** and **CI/CD integration** by implementing test steps, data creation scripts, and deployment validation for quality assurance
- Implemented **Security Operations** workflows with **vulnerability management** and **compliance reporting** by configuring automated scanning, remediation workflows, and audit trail generation
- Built **Change Management** processes with **CAB automation** and **risk assessment** by developing approval workflows, impact analysis, and automated testing validation for production deployments

Tools & Technologies Used: ITSM Pro, ITOM Visibility, CMDB with CSDM, Service Portal with UI Builder, HRSD with Employee Center, GRC with IRM, Event Management with AIOps, IntegrationHub with Custom Spokes, Performance Analytics Pro, Flow Designer, GlideRecord/JavaScript APIs, Mobile Studio, ATF with Automated Testing

Roche Information Solutions Pune | ServiceNow Developer | Oct 2022 – July 2023

Environment: ServiceNow Washington/Vancouver/Utah Releases, Azure Government Cloud, Microsoft 365 GCC

- Configured **Customer Service Management** with **case routing automation** and **citizen portal integration** by developing intake forms, assignment rules, and SLA management for Ohio residents' service requests
- Built **Discovery patterns** for **government infrastructure mapping** and **automated asset identification** by creating custom probes, sensors, and classification rules for state agency IT environments
- Developed **Service Portal** interfaces with **accessibility compliance** and **multilingual support** by implementing WCAG 2.1 standards, responsive design, and citizen-focused self-service capabilities
- Implemented **Case Management** workflows with **multi-agency collaboration** and **escalation procedures** by configuring parent-child relationships, task assignments, and automated status updates
- Architected **HRSD platform** with **government employee lifecycle** and **benefits administration** by integrating with state HR systems, implementing approval chains, and automating onboarding processes
- Configured **Document Management** with **records retention policies** and **FOIA automation** by implementing lifecycle rules, automated archival, and public records request processing workflows
- Built **Knowledge Management** system with **government-specific content** and **policy documentation** by creating knowledge bases, approval workflows, and automated content publishing for citizen information
- Developed **GRC framework** with **policy compliance monitoring** and **audit management** by implementing control frameworks, evidence collection, and regulatory reporting for state compliance requirements
- Implemented **Performance Analytics** with **government metrics tracking** and **citizen satisfaction monitoring** by creating custom indicators, trend analysis, and executive dashboard reporting
- Created **Import Sets** processes with **secure data integration** and **multi-agency synchronization** by developing transform maps, data sources, and automated validation for sensitive government data
- Built **Flow Designer** workflows for **permit processing** and **license renewals** by implementing approval chains, conditional logic, and integration with state regulatory systems
- Configured **Emergency Management** capabilities with **crisis communication** and **resource coordination** by developing incident command workflows, alert systems, and inter-agency collaboration tools
- Established **Grant Management** platform with **application processing** and **award tracking** by implementing funding workflows, compliance monitoring, and automated reporting for federal grants
- Implemented **ATF testing** with **government security validation** and **compliance verification** by creating test scenarios, data validation, and security control testing for government operations

Tools & Technologies Used: Government Cloud Plus with FedRAMP, Customer Service Management, Case Management, Service Portal with Citizen Services, HRSD with Government HR, Discovery with Pattern Recognition, CMDB with Government Assets, GRC with Policy Management, Document Management, Knowledge Management, Performance Analytics, Flow Designer, Import Sets with Data Sources, ATF

TCS | Senior ServiceNow Technical Consultant | Jan 2019 – Sep 2022

Environment: ServiceNow Rome/San Diego/Tokyo Releases, Oracle Banking Platform, Temenos T24, AWS

Domain: Banking & Financial Services (Middle East Focus) | Methodology: Hybrid Agile, DevOps

Project 1: Digital Islamic Banking Transformation & Sharia-Compliant Operations Platform

- Configured **ITSM workflows** with **Sharia compliance rules** and **Islamic banking processes** by implementing custom approval chains, religious screening logic, and automated Sharia board routing for banking operations

- Built **Service Mapping** for **core banking dependencies** and **Islamic product relationships** by creating banking-specific CI classes, relationship rules, and automated topology discovery for Temenos T24 systems
- Developed **CMDB structure** with **banking asset classification** and **Islamic finance categorization** by implementing financial CI types, relationship mapping, and automated data population from Oracle banking platforms
- Created **Service Portal** with **Arabic localization** and **Islamic banking interfaces** by developing culturally appropriate widgets, RTL language support, and Sharia-compliant service catalogs
- Implemented **HRSD workflows** for **Islamic HR policies** and **banking staff management** by configuring religious holiday calendars, prayer time accommodations, and banking-specific onboarding processes
- Architected **GRC framework** with **Islamic banking regulations** and **Sharia compliance monitoring** by implementing automated compliance checks, religious audit workflows, and regulatory reporting for UAE Central Bank
- Built **Event Management** for **banking operations monitoring** and **transaction processing alerts** by configuring correlation rules, banking-specific thresholds, and automated incident creation for payment systems
- Developed **GlideRecord scripts** for **profit-sharing calculations** and **Islamic finance algorithms** by implementing Murabaha profit computation, Sukuk management logic, and automated Sharia compliance validation
- Created **JavaScript functions** for **banking business logic** and **religious compliance checking** by developing custom validators, calculation engines, and automated screening for non-halal investments
- Implemented **ITAM processes** for **banking technology assets** and **Islamic finance systems** by configuring asset discovery, license management, and lifecycle tracking for core banking infrastructure
- Built **IntegrationHub spokes** for **Oracle Banking integration** and **SWIFT connectivity** by developing custom REST endpoints, message transformation, and real-time transaction processing
- Configured **Performance Analytics** with **Islamic banking KPIs** and **Sharia compliance metrics** by implementing custom indicators, trend analysis, and executive reporting for banking operations
- Established **Customer Service Management** with **Islamic product support** and **multilingual capabilities** by configuring case management, Arabic language support, and specialized banking service delivery

Project 2: Middle East Regional Banking Integration Platform & Digital Transformation

- **Tools & Technologies Used:** Multi-instance ITSM, Regional Discovery Patterns, Federated CMDB, Cross-border Service Portal, Regional HRSD, Multi-jurisdictional GRC, Event Management with Regional Correlation, Advanced JavaScript APIs, Currency Calculation GlideRecord, Regional ITAM, Cross-border IntegrationHub, Multi-country Performance Analytics
- Architected **multi-regional ITSM** with **cross-border incident management** and **unified service delivery** by implementing domain separation, regional routing rules, and synchronized SLA management across UAE, Egypt, Qatar, and Bahrain
- Configured **Discovery patterns** for **multi-country infrastructure** and **regional asset identification** by developing custom probes for different banking environments, network topologies, and regulatory compliance across Middle East regions
- Built **federated CMDB** with **regional data synchronization** and **cross-border relationships** by implementing transform maps, data replication, and automated reconciliation for distributed banking infrastructure
- Developed **Service Portal** with **multi-country customization** and **regional service catalogs** by creating country-specific interfaces, currency handling, and localized banking services for regional operations
- Implemented **regional HRSD** with **cross-border employee management** and **multi-jurisdictional policies** by configuring unified employee profiles, regional compliance rules, and synchronized workforce management

- Established **GRC framework** with **multi-jurisdictional compliance** and **regional risk management** by implementing country-specific regulations, automated compliance monitoring, and consolidated audit reporting
- Configured **Event Management** with **regional correlation** and **cross-border alerting** by developing correlation rules, regional thresholds, and automated incident routing for distributed banking operations
- Developed **JavaScript solutions** for **currency conversion** and **regional calculations** by implementing exchange rate APIs, multi-currency processing, and automated financial reconciliation across regions
- Built **GlideRecord scripts** for **cross-border data processing** and **regional reporting** by creating data aggregation logic, regional analytics, and automated reporting for consolidated operations
- Implemented **regional ITAM** with **cross-border asset tracking** and **multi-country procurement** by configuring unified asset registers, regional procurement workflows, and synchronized license management
- Architected **IntegrationHub** for **regional system connectivity** and **cross-border data exchange** by developing secure APIs, encrypted data transmission, and real-time synchronization between countries

Tools & Technologies Used: ITSM with Banking Workflows, Service Mapping for Banking Services, CMDB with Financial Assets, Service Portal with Islamic Banking UI, HRSD with Banking HR, GRC with Islamic Compliance, Event Management for Banking Operations, GlideRecord for Financial Calculations, JavaScript for Sharia Logic, ITAM for Banking Technology, IntegrationHub for Core Banking, Performance Analytics for Banking Metrics

Project3: Engineering & Construction Digital Transformation

- Configured **Project Management workflows** with **resource allocation automation** and **milestone tracking** by implementing project templates, Gantt chart integration, and automated progress reporting for construction projects worth $5B+
- Built **Asset Management** for **construction equipment lifecycle** and **maintenance scheduling** by developing equipment CI classes, preventive maintenance workflows, and IoT sensor integration for 10,000+ construction assets
- Developed **Service Portal** for **project self-service** and **contractor collaboration** by creating project dashboards, document sharing widgets, and mobile-responsive interfaces for construction site management
- Implemented **HRSD workflows** for **construction workforce management** and **safety training tracking** by configuring employee onboarding, certification management, and safety compliance monitoring for 50,000+ employees
- Architected **CMDB structure** for **project asset tracking** and **equipment relationships** by implementing construction-specific CI types, location hierarchies, and automated asset discovery for multiple project sites
- Configured **Discovery patterns** for **construction site mapping** and **equipment identification** by developing custom sensors, network probes, and automated asset classification for distributed construction operations
- Built **GRC framework** for **construction compliance** and **safety regulation management** by implementing ISO 9001 workflows, OSHA compliance tracking, and automated audit management for construction standards
- Developed **JavaScript functions** for **project cost calculations** and **resource optimization** by implementing budget tracking algorithms, resource allocation logic, and automated financial reporting integration
- Created **GlideRecord scripts** for **project data processing** and **milestone automation** by developing progress tracking logic, automated notifications, and integration with project management systems
- Implemented **SAP integration** using **Web Services** and **data synchronization** by developing SOAP connectors, financial data mapping, and real-time cost accounting integration with ERP systems
- Built **Import Sets** for **project data ingestion** and **vendor information management** by creating transform maps, data validation rules, and automated supplier onboarding for 5,000+ vendors

TECHNICAL EXPERTISE

- **ITSM:** Advanced **Incident Management**, **Problem Management**, **Change Management** with workflow automation, SLA management, and approval processes
- **ITOM:** Comprehensive **Discovery**, **Service Mapping**, **Event Management** with automated dependency mapping and infrastructure monitoring
- **CMDB:** Enterprise **CSDM**, **CI Relationships**, **Data Management** with configuration control and business service alignment
- **Service Portal:** Modern **UI Builder**, **AngularJS**, **Widget Development** with responsive design and custom components
- **HRSD:** Complete **Employee Center**, **HCM Integration**, **Lifecycle Events** with automated workflows and self-service capabilities
- **GRC:** Comprehensive **Risk Management**, **Compliance**, **Audit Management** with automated controls and regulatory reporting
- **IRM:** Integrated **Risk Assessment**, **Business Continuity**, **Policy Management** with enterprise risk frameworks
- **ITAM:** Advanced **Asset Management**, **SAM Pro**, **HAM Pro** with license optimization and lifecycle automation
- **Scripting:** Expert **GlideRecord**, **JavaScript**, **Business Rules** with database optimization and custom logic
- **Integration:** Advanced **IntegrationHub**, **REST APIs**, **MID Server** with secure connectivity and real-time synchronization
- **Automation:** Sophisticated **Flow Designer**, **Workflow**, **Approval Engine** with complex business process automation
- **Analytics:** Comprehensive **Performance Analytics**, **Reporting**, **Dashboards** with business intelligence and KPI tracking
- **Development:** Professional **Update Sets**, **ATF**, **Source Control** with deployment automation and quality assurance
- **Architecture:** Enterprise **Domain Separation**, **Multi-tenancy**, **Security** with scalable platform design
- **Administration:** Advanced **User Administration**, **Access Control**, **System Configuration** with enterprise-grade management
- **APIs:** Expert **REST**, **SOAP**, **GraphQL** with secure authentication and data transformation

CERTIFICATIONS & CREDENTIALS

- ServiceNow Certified System Administrator (CSA) **-** ITSM**,** CMDB**,** User Administration
- ServiceNow Certified Application Developer (CAD) **-** Scripting**,** Flow Designer**,** Integration Development
- ServiceNow Certified Implementation Specialist - ITSM **-** Incident Management**,** Change Management**,** Service Catalog
- ServiceNow Certified Implementation Specialist - ITOM **-** Discovery**,** Service Mapping**,** Event Management
