Experienced Data & Voice Network Manager with a background in administration of Data network & contact center infrastructure, maintenance, monitoring, troubleshooting, resource Optimization & Team Management, Proven track record of managing projects and teams effectively.

## PROFESSIONAL SNAPSHOT

- An IT Professional with over 16+ years of experience in team management, network designing, implementation, Administration, monitoring, Troubleshooting, Optimization, troubleshooting of network & contact center infrastructure.
- Currently working with Movate Technologies Pvt. Ltd. as Operation Manager, managing network & contact center infrastructure, enablement and migration including capability, new feature enhancements, rich business services & customer experience.
- An effective communicator with excellent relationship building & interpersonal skills. Smart worker with Strong analytical, problem solving & organizational abilities.

## CORE COMPETENCIES

- Team Management
- Network IT Infrastructure
- Network Administration & Troubleshooting
- Network Implementation & Optimization
- Network Monitoring & Security
- Incident, Change & Problem management.
- Process Improvement.
- Audit, Compliance, Risk & Escalation.

## CAREER HIGHLIGHTS

- Presently working with Movate Technologies Pvt Ltd. (formerly CSS Corp Pvt Ltd), Chennai
  - Designation – Operation Manager.
  - Duration - Oct'20 to till date.

- Worked with Accenture Solutions Pvt Ltd.
  - Designation - Specialist (Team Lead)
  - Duration - 29th Aug'19 to Oct'20.

- Worked with BT-ESERV Pvt Ltd, Gurugram
  - Designation – L3 Network Engineer

- Duration: 23rd August 2016 to 21st Aug'2019

- Worked with IDC Technologies Pvt Ltd, Hyderabad
  - Designation - Lead Analyst - L4
  - Duration – 25th June 2015 to 9th Oct'15.
  - Project – Google India Pvt LTD.

- Worked with HCL Technologies Ltd., Noida
  - Designation - Senior Specialist
  - Duration - 13th May'13 to 15th Sep'15

- Worked with InterGlobe Technologies Ltd, Gurugram
  - Designation - Senior Engineer.
  - Duration - Aug'11 to April'13.

- Worked with Royal Bank of Scotland Group, Gurugram (on payroll of EBusinessware Pvt Ltd).
  - Designation – System Engineer (Telecom & Network Services)
  - Duration - Sep'08 to Aug'11.

---

**TECHNICAL SKILLS**

---

- Network & Voice Contact Center Services –
  - Cisco Router – 1800,3600,2800 Series
  - Cisco Switch - 2960, 3650, and 3850 series
  - Avaya CM 8.2, Avaya CMS R19, AES, ACD, G450 & G650 Media Gateway.
  - Call Recording – Verint 15.2, Nice perform.
  - CDR- Telesoft.
  - SBC – Oracle 3900
  - Monitoring Application – Prognosis, Zabbix, Solarwinds, PRTG Network Monitor, WhatsUp Gold.
  - Incident/Change Management applications – ServiceNow, HPSM, REMEDY, Codex, Sapphire.

## Roles and responsibilities: -

- Incident, Change Management, Problem and RCA management tasks on daily basis.
- Compliance for Network & Voice Operations - User Entitlement Review, Backup Management, Log Management, Patch Management, Data Retention policy, System capacity.
- Knowledge of Infra Feasibility, design analysis, requirements & availability of Infra along with capacity planning, Licensing and risk assessments.
- 100% Adherence & Quality on Change Management with NIL mistake always.
- IT Infra deployment for Business ramp-up, Application/Tool upgrade.
- Managed a team of 8+ network engineers responsible for maintaining a global infrastructure and ensured the timely completion of all tasks.
- Conducting monthly reviews of Services with Management/customers on various aspects of business & Weekly/monthly IT Dashboard.
- Managing process for communicating outage/emergency activities of the organization.

- Review survey feedback to improve services of tools and support/delivery experience.
- Client Engagement Performance analysis and improvement action plans.
- Update & track the activities against the scope of the project to achieve the milestones of the Project with cost effective modes.
- Own the change management process end to end (organizing, planning, and coordinating).
- Responsible for the identification, communication and mitigation of any risks associated with the project & deployment.
- Delivered insight on SOW, SLA, Technical Support Model, project support and delivery.
- Preparing Plan of action for planned activities & providing RCA of voice issues.
- Worked on the escalated issue and provide the resolution/root cause analysis.
- Act as a technical interface with business, vendor, end-users, and solution providers to ensure processes and tools are in place to support the environment & meet business requirements.
- Installation & configuration of network devices in contact center environment.
- Configured and maintained routers, switches, and firewalls to ensure secure network access.
- Developed and documented network policies and procedures to ensure compliance.
- Monitored network performance and identified areas for improvement.
- Generated and analyzed network reports to identify potential performance issues.
- Implemented cost effective network upgrades to ensure performances and scalability.
- Configured and maintained routers, switches, and firewalls to ensure secure network access.
- Oversee daily network operations, supporting 5000+ users and nodes to ensure optimal performance.
- Collaborate with vendors and corporate teams on project design, implementation, and support, enhancing service delivery.
- Developed action plans and assigned tasks to engineers, ensuring high-quality customer service and network reliability.
- Implemented, maintained and troubleshot a high-end network system for the organization.
- Proven track record of identifying and resolving critical network issues to maintain network stability.
- Expertise in network architecture, routing, switching, and firewalls.
- Managed the installation of multiple enterprise-level networks, including planning, configuration, and maintenance.
- Developed and implemented network security strategies to protect data and ensure network reliability.
- Monitored network performance and implemented disaster recovery procedures.
- Conducted system and network performance analysis and tuning.
- Conducted regular audits of network equipment, systems, and applications.
- Managed network resources, including hardware, software, and user accounts.
- Developed and maintained network inventory and documentation.
- Created and maintained network policies and procedures.
- Coordinated with vendors and suppliers to ensure timely delivery of network equipment.
- Oversee patch management and security audits, enhancing application and network security.
- Redesigned network architecture for improved security and scalability, facilitating future growth.
- Ensured 99% uptime of critical systems through effective monitoring and proactive issue resolution.
- Managing the routing, design, contact flow/IVR, prompts, create queues, hours of operations.
- Unser management & user creation, routing profiles, agent status etc.
- Planning & end to end migration of Data centre services to ensure 100% uptime of voice services to impacted customers by shifting them on ESS server.
- New capability enhancement and adding contact centre services to existing clients.
- Responsible for end-to-end mapping and routing of Toll-free numbers and DIDs including carrier porting of numbers.
- Admin & implementation of Avaya Media Gateway G650/G450, CM 8.2, ESS, CMS, AES, IX Messaging, Avaya Call Back Assist, WFM Verint Recording.

- Designing the inbound/outbound call flow/call routing for business processes.
- Work to fix the server vulnerabilities, P1, P2 issues and join the client MIM call to update the status of issues & provide fast resolution.
- Maintaining E1/T1 circuit, inventory, co-ordination with vendors for ISDN/PRI related issues.
- Managing the daily/weekly/monthly backups, capacity reports, DR testing & reporting activities.
- Installations/registrations of Avaya media Gateways (G430, G-450 & G-650) Port networks, Avaya Cards (IPSI, Med Pro, CLAN, Ds1, Analog and Digital) and configurations, troubleshooting.
- Configurations, Monitoring and troubleshooting of SIP, ISDN, H.323 and PSTN trunks (Trouble shooting on different PRIs, CAS, CCS, signalling group etc.)
- Performing & owning maintenance activities & outages with proper health check-up & monitoring of Voice systems Equipment.
- Managing VDN, Vector, Skill/Split, Dial plans, AAR, ARS, Network-region, audio codec. (Worked on call flow related requests for parameters like time-of-day, VRT table, and conditional clauses, Variables, stations, Agent IDs, VDN, Vector, Skills, Route-Pattern, ARS & AAR, off-pbx-telephone EC500 etc.
- Managing Avaya CMS server (Reports- Real-time, Historical, Integrated/designed reports).
- Avaya products Patch Management & Firmware upgrade of Media gateways and Avaya Cards.
- Configurations, Monitoring, and troubleshooting of SIP, ISDN, PSTN trunk groups.
- Managing Nice & Verint Recordings managing AES integration, mapping of channels/agents, Trunks & extensions, and trouble-shooting all Hardware & recording related issues.
- Maintenance and Patch management of Complete Avaya, Verint & Nice Infra Includes: Avaya Media gateways, Cards, AES, AEP & Verint WFM 15.2 servers.
- Managing Maintenance reboot & patch management of Network & Contact Centre windows, Linux based devices including hardware and VM platform.

## SCHOLASTICS

- 10th from Board of School Education, Haryana in 2003 with 1st division.
- 3-year Polytechnic Diploma in Computer Engineering from State Board of Technical Education, Chandigarh (Haryana).
- B.Sc. IT from Punjab Technical University Jalandhar with 1st division.

## PERSONAL DETAILS

Date of Birth - 15th September 1987
Gender - Male
Marital Status - Married
Nationality - Indian
