WORK EXPERIENCE

- Managed the implementation of automation by equipping the team with detailed functional insights, resolving queries, and verifying scripts to ensure smooth and effective integration into the overall workflow.
- Have knowledge in using Rally and Jira to manage tasks, track defects, log effort estimates, and oversee release management activities, including compiling progress reports and coordinating with team members for status updates for efficient project delivery.

Expertise Across HCM Modules:

- **Core HR:** Configured enterprise structures including legal entities, business units, and departments. Executed and validated key employee lifecycle processes from hire to termination.
- **Compensation:** Managed salary structures and grade hierarchies to ensure accurate compensation alignment across roles. Reviewed and implemented changes within ESS/MSS platforms to optimize functionality and ensure data accuracy.
- **Absence Management:** Worked on Absence types and absence reasons.
- **Payroll:** Handled element entries for earnings and deductions, ensuring accurate payroll processing and compliance with organisational policies.
- **Time and Labor:** Oversaw the complete time card workflow—from employee submission to managerial approval—and ensured seamless integration with payroll for accurate compensation.
- **Talent Management:** Supported goal setting, performance evaluations, feedback cycles, succession planning, and talent reviews. Managed persona-based configurations, bulk data uploads, and generated talent review reports.
- **Security:** Created roles and security profiles, assigned access appropriately, and ensured Area of Responsibility (AOR) configurations aligned with business requirements.

Package Specialist - Oracle Cloud HCM
Client: MetLife

NOV 20 - DEC 22

Contribution:

- Worked on HCM Extract for outbound interfaces for various HCM modules.
- Managed various reports using BIP.
- Worked on Fast Formulas, Data Models, uploading, and creating Value Sets using HDL.
- Have created Payroll Flow Pattern for BI Reports.
- Worked on creating Independent and Dependent DFFs
- Executed end-to-end regression cycles for Oracle Cloud releases (21A–22D) using automation tools to ensure system stability and performance.
- Built automation scripts for Payroll, Core HR, and Benefits interfaces (inbound/outbound) leveraging Selenium, TestNG, and Maven.
- Designed and implemented a data-driven automation framework using Java, TestNG, and Selenium to streamline validation processes.
- Conducted KT sessions to client regarding HCM Extract, BI Reports, Fast Formulas, Value Sets, Lookups, etc.
