- Prepared data dictionary, KT documents, and data migration-related sheets and worked on Apex Data Loader to perform various data migration activities.
- Responsible for writing Visual Force pages for building the wizard.
- Implemented and delivered projects in Agile Development and Test-Driven Environments with large and small Team Projects.

PROJECT: 2 **FEBRUARY 2022- MARCH 2024**

Client: Sallie Mae Sales & Service App (AWCo - CRM)
Role: Salesforce Developer
Environment: Salesforce CRM, Apex, Lightning Web Component, Community Cloud

Description:

Sallie Mae is a consumer bank that offers private student loans and other financial products like credit cards. Sallie Mae needs an online personal loan application form. That is one step away from checking your loan options. Develop an online personal loan registration form in Lightning by Aura framework, store loan information in the custom object (Personal Loan Registration), and stamp/map the same data with the lead. That means a new lead must be generated when a sales rep submits a personal loan request.

Roles & Responsibilities:

- Analysed requirements and developed detailed design documents for many components.
- Created pick lists, dependent pick lists, lookup fields, junction objects, master-detail relationships, custom buttons, validation rules and formula fields, Force pages, and Visual Force Custom Controllers to customise the view and functionality of the page according to the organisational needs.
- Developed Apex classes and Apex Triggers on the Force.com platform to customise applications according to functional needs.
- Developed JSON callouts.
- Developed Inline VF pages as a Tree structure for Asset Hierarchy.
- Developed workflow rules for various business requirements.

PROJECT: 1 JUNE 2017- DECEMBER 2021

Client: NetApp SaaS Backup
Role: Salesforce Developer
Environment: Salesforce CRM, Apex, Trigger, Integration, Sales Cloud, Service Cloud

Description:

NetApp SaaS Backup is a reliable, secure, and scalable service that protects your mission-critical data from accidental deletion, corruption, or malicious intent. The service, offered on a license per seat, per year basis, requires no installation and is easy for any business to use.

Roles &Responsibilities:

- Working closely with the Engineering team to provide solutions to develop all the product requirements.
- Providing Technical Training to the Product development team and the Quality assurance team about the Salesforce ecosystem and its features.
- Providing Detailed technical help to Sales Executives.
- Presentation about a product to customers and partners.
- Sales and support training to ISR, DSR and the Support team.
- Ability to plan, outline, scope technical projects, drive projects to closure, and deliver on time.

Work Experience Details:
