- Good Team player with Excellent communication skills
- Experience in Client Focused Environment

Career Profile:

ORGANISATION	DESIGNATION	DURATION
Optum	Sr. Jira Administrator	4.10 Years
Wipro	Sr. System Administrator	3 years

Educational Qualifications:

Particular	Year of Passing	College/University	Aggregate
MBA	2017	CMR College of Engineering & Technology	71%

Technical Skills:

Administration Tools	:	Jira Service Desk, JIRA, Confluence, Crowd.
Application Servers	:	Tomcat 8.0, JBOSS and WebLogic
RDBMS	:	Oracle 10g/12C, MS-SQL Server 2012/2014, MySQL
Operating System	:	Windows and Linux.
Version Control Tools	:	GIT, GITHUB, SVN and TFS

Work Experience:

CGI FINANCIAL ACCOUNTING: 1

Client	:	X2R FAS, Texas.
Team Size	:	3
Operating system	:	Windows 7, Linux
Software's used and Crowd.	:	Jira Agile, Tomcat 8, Confluence, Jenkins, Bitbucket, GIT, SVN, Linux

PROJECT DESCRIPTION

X2R FAS is an integrated suite of accounting modules that provide effective tools for accountants to administer oil and gas financial and operations data, as well as joint venture

Public

accounting of oil and gas and trust organizations. This modern platform was purpose built for these functions by experienced oil and gas and IT professionals, informed by a broad client base. The solution streamlines the management and sharing of data between organizational departments (e.g., production, marketing, accounting and land). Its key modules are designed to handle accounts payable, accounts receivable, joint interest billing (JIB) and revenue distribution, including the receipt and distribution of both external sources of revenue and calculated sales revenue. Immediate owner splits are determined when transactions are posted versus waiting for the JIB process.

CONTRIBUTION

- Troubleshooting and resolving issues in JIRA and Confluence as users.
- Providing solutions to the users in using Jira.
- Troubleshooting production issues.
- Upgraded Jira from 6.0.7 to 6.4.4 version
- Installing Jira gadgets on request.
- Responsible for creation of custom workflows and adding post functions when required.
- Responsible for configuring custom fields for the requested issues types in the Jira projects
- Re-indexing the Jira instance when required.
- Communicating with the onsite counterpart.
- Frequent team scripts review to avoid redundant functionality.
- Participate in Release reviews meetings.
- Creating Jira projects with custom schemes like issue type schemes, workflow schemes, field config schemes, screen schemes, permission schemes and Notification schemes.
- Troubleshooting end user issues and resolving them before SLA breeches.
- Resolving Agile board issues.
- Re-indexing Jira on timely basis.
- Restricting users for confluence pages.
- Prepared projects, dashboards, reports and questions for all JIRA related services.
- Restarting Jira when required.
- Configuration/Permissions and Notification schemes for all projects.
- Created customized Versions/ Components for all projects.

Ruckus Wireless: 2

Client : Brocade Ruckus Wireless, California
Operating system : Linux
Team Size : 4
Environment : Jira Software 7.4.2, Jira Service Desk 3.2, Tomcat 8, Bitbucket, MySQL

PROJECT DESCRIPTION

Ruckus offers a complete line of high-performance access network infrastructure, including Wi-Fi controllers and access points, wired Ethernet switching and OpenG in-building cellular and

Public

small cell, combined with network security, analytics and management software, and professional services and support.

Our commitment to technology innovation is one of the bedrock values of the company. And today, we innovate across both wireless and wired technologies to meet the needs of enterprises and organizations of all stripes and sizes. With our OpenG technology, we are pioneering an ecosystem that will enable organizations to self-deploy LTE coverage in the same way they deploy Wi-Fi today. Our deep history of technical innovation means superior, dependable connections for our customers. Everywhere, all the time.

CONTRIBUTION:

- Analyzing user requirements and setting up of Jira Projects and creation of Confluence Spaces Responsible for maintaining the Applications on Linux servers.
- Responsible for creation of custom workflows and adding post functions when required.
- Responsible for configuring custom fields for the requested issues types in the Jira projects
- Re-indexing Jira on timely basis
- Restricting users for confluence pages
- Prepared projects, dashboards, reports and questions for all JIRA related services.
- Restarting Jira when required.
- Jira, Confluence, Bitbucket up gradation
- SSL and SSO Implementation
- Configuration/Permissions and Notification schemes for all projects
- Created customized Versions/ Components for all project
- Troubleshooting and resolving issues in JIRA and Confluence as users.
- Monitoring the health checks of the applications and reporting.
- Creation of Dashboards, Filters and updating the ownership of shared filters & dashboards
- Installing plugins and maintaining the licenses
- Addressing production application issues in a timely manner and resolving them before SLA breaches
- Configuring Scrum boards and Kanban Boards using complex JQL queries
- Creating service desk projects with specific Request Types
- Implementing automation rules for service desk projects
- Restarting Applications when on need basis.
- Create comprehensive JIRA workflows including project workflows, screen schemes, permission schemes, notification schemes etc.

Public

- Assisting End users on advanced features of Jira
- Triggering notifications to concern users through workflow post-functions.
- Creation of reports and providing metrics on the support requests by weekly basis.
- User authentication using LDAP Directories**.**
- Creating Project permission schemes and providing required permissions based on the requests.
- Configuring Notification scheme and adding requested people to be notified for Issue events.
- Developing confluence pages.
- Provide support for the application and infrastructure including troubleshooting, performance tuning.
- Integrate User with Microsoft Active Directory.
- Integrate Jira with Crucible.

Astromechs/Din-Grogu:

Client : Sony
Operating system : Windows
Team Size : 12
Environment : Jira Software V.9.12.0, Confluence 8.5.4, Wrike, Trello, DocuSign.

CONTRIBUTION:

- Creating Jira Tickets, Managing the Service Now Tickets, and
- Analyzing user requirements and setting up of Jira Projects and creation of Confluence Spaces Responsible for maintaining the Applications on Linux servers.
- Responsible for creation of custom workflows and adding post functions when required.
- Responsible for configuring custom fields for the requested issues types in the Jira projects
