Professional Summary

Overall **7+ year experience** in ETL Tools, Data warehouse and Database.Informatica PowerCenter Developer with 5 years of hands-on experience in **ETL development, data warehousing, Data migration**. Proven ability in designing, developing, and optimizing complex ETL workflows using Informatica PowerCenter and ensuring data quality across enterprise systems. Proven success in **data migration, performance tuning, data quality assurance, ETL automation and end- to-end data integration**. Strong collaborator with cross-functional teams to deliver scalable, business-driven data solutions.

Core Skills

- **ETL & Data Integration:** Informatica PowerCenter (9.x/10.x), Informatica IICS (basic)
- **Databases:** Oracle, SQL Server, Teradata, DB2, Flatfile
- **Programming & Scripting:** SQL, PL/SQL, Unix Shell Scripting
- **DWH :**Star/Snowflake Schema, Fact & Dimension Table, SCD Type1& 2
- **Scheduling & Monitoring:** Control-M, Workflow Monitor
- **Other Tools:** GIT, JIRA, ServiceNow

Professional Experience

UST Global , Client: DELL technology, – ETL / Informatica Developer
Bangalore | Feb 2022 – July 2025
Project: Sales and Procurement Digi score dashboard (informatica + Power BI)

- Designed, developed, and optimized **ETL mappings, sessions, and workflows** for enterprise data warehouse solutions.
- Performed **data extraction, transformation, and loading (ETL)** from relational databases, flat files, and legacy systems.
- Applied **performance tuning** techniques (partitioning, caching, pushdown optimization) to improve ETL runtime efficiency.
- Implemented **data validation, cleansing, and error handling** to maintain high-quality data delivery.
- Scheduled and monitored production jobs using **control-m and Power BI** dashboard.
- Prepared **knowledge transfer documents and migration runbooks** for production teams.

Environment : Informatica PowerCenter, Oracle, SQL Server, Control-M, Power-BI.

UST Global , Client: DELL technology, – ETL / Informatica Developer
Bangalore | July 2020 –Jan 2022
Project: Business Data Lack (BDL) to DELL Data Lack(DDL) (informatica +SQL)

- Extracted data from legacy Oracle systems and migrated to SQL Server-based data warehouse.
- Developed Informatica PowerCenter mappings & workflows to load staging, transform, and populate SQL Server targets.

- Created SCD Type 2 dimension tables and fact tables for reporting requirements.
- Converted Informatica mappings to SQL procedures for future decommissioning of PowerCenter.
- Tuned SQL queries by creating indexes, partitioning strategies, and statistics updates.
- Supported UAT, regression testing, and production deployment with zero data loss.

Environment: Informatica PowerCenter, Oracle, SQL Server, Control-M.

DXC Technology, – SQL Developer
Bangalore | Nov 2015 – feb 2020
Project: VFS (Visa Facilitation Service)(DWH +SQL)

- Designed and optimized **complex SQL queries, stored procedures, triggers, and functions** to support application and reporting needs.
- Conducted query **performance tuning** and indexing strategies to reduce query runtime by up to 50%.
- Worked closely with business analysts to understand requirements and deliver accurate reporting solutions.
- Provided **L2/L3 production support**, analyzing and fixing ETL job failures within SLA.
- Coordinated with **QA teams** for test planning, data validation, and UAT support.

Environment: SQL Server, ServiceNow

Education & Certifications

- Master of Computer Application (MCA), Anna University -- 2015
- Bachelor of Science in Computer Science (BSC), Madurai Kamaraj university -2012
- POWER BI Certification

Key Highlights

- **Performance Optimization:** Reduced ETL load time by 50% through performance tuning mapping level and source and target level.
- Implemented **enterprise data warehouse integration** scheme across multiple domains to reduce the complexity.
- successfully do the **data migration** projects with minimal downtime.
- ETL **job scheduling** and **monitoring**, reducing SLA breaches and manual intervention.
- Supported **Power BI dashboards** with optimized SQL scripts for real-time analytics.

Thanks,

DEVAKI S
