Professional Summary

Data Engineer with 9+ years of experience building scalable ETL pipelines, data warehouses, and cloud-based data platforms across pharma, telecom, and retail. Proven track record of reducing pipeline runtimes by up to 75%, cutting infrastructure costs by $50K annually, and enabling real-time analytics for 1,000+ users worldwide. Skilled in SQL, Python, Snowflake, Redshift, Teradata, Informatica (PowerCenter, IICS, MDM), Matillion, AWS, and Azure, with expertise in data modeling, automation, and performance optimization. Adept at leading teams, mentoring engineers, and delivering high-value, business-driven data solutions.

Core Competencies

- Data Engineering & Warehousing: ETL/ELT pipelines, Data Modeling, Data Lakes, BI Solutions
- Cloud Platforms: AWS (Redshift, S3, Glue, EC2), Azure (Synapse, Data Factory)
- Programming & Automation: SQL, Python, Shell Scripting, PL/SQL
- ETL Tools & Orchestration: Informatica PowerCenter, IICS, MDM, Matillion, Control-M, IBM Tivoli
- Databases: Snowflake, Redshift, Teradata, Oracle, MySQL, Vertica
- Optimization & Quality: Query tuning, Data Validation, Automation Frameworks
- Leadership: Team mentorship, Agile delivery, Stakeholder engagement

Professional Experience

Axtria India Pvt. Ltd | Project Lead – Data Engineering

Nov 2020 – Aug 2025 | Pharmaceutical Domain

- Led a team of 4 engineers in building and maintaining Snowflake-based data warehouses, integrating data from Oracle, SAP, RMUS, and other enterprise systems to support global pharma analytics.
- Designed and optimized ETL/ELT workflows in Informatica PowerCenter, IICS, and Informatica MDM, processing millions of daily records with a focus on scalability and performance.
- Developed data pipelines leveraging AWS S3 and Redshift, reducing batch processing time from 8 hours to 2 hours and saving $50K annually in infrastructure costs.

- Automated workflow orchestration with Control-M, achieving 99% SLA adherence and reducing operational downtime.
- Delivered real-time sales performance dashboards by streamlining data ingestion pipelines, reducing reporting latency from 24 hours to 1 hour, empowering 1,000+ global sales reps with actionable insights.
- Implemented data validation and quality frameworks to ensure accurate and consistent reporting across multiple geographies and therapeutic areas.
- Mentored and upskilled junior developers on Snowflake best practices, Informatica mappings, and AWS data integration, improving team delivery velocity by 40%.

Tech Stack: Snowflake, Informatica PowerCenter, IICS, MDM, AWS (S3, Redshift), Oracle, SAP, RMUS, Control-M, Python, SQL, Shell

Alten Calsoft Labs | Senior Software Engineer – Data Engineering

Nov 2019 – Jul 2020 | Retail Domain

- Built and optimized Teradata ETL workflows to process 5M+ daily transactions, powering daily business-critical reports.
- Improved SQL performance by 25% through advanced indexing and query optimization techniques.
- Automated ETL orchestration with Control-M, ensuring 99%+ SLA adherence and reducing batch job delays.
- Partnered with BI teams to deliver data marts for executive dashboards used by 200+ business stakeholders.

Amdocs Development Center India | DWH/BI Test Engineer

Mar 2016 – Nov 2019 | Telecom Domain

- Implemented ETL pipelines with Matillion and Teradata utilities (BTEQ, MLOAD, TPT, FLOAD) to support multi-terabyte data warehouses.
- Designed and executed data validation frameworks that reduced defect leakage by 35%, increasing production stability.
- Automated recurring QA checks with Unix shell scripting, saving 15+ engineer-hours per week.
- Supported a near-real-time data warehouse initiative, enabling accurate sales data ingestion under sub-hour SLAs.

Key Projects

- Sapphire (Sanofi, Pharma) – Built and optimized Snowflake pipelines to integrate data from OMS and CRM systems, improving stability and cutting reporting delays by 80%. Mentored 4 engineers, increasing delivery efficiency by 40%.
- Sales Flash (Sears Holdings, Retail) – Developed Teradata ETL workflows and Informatica mappings to process 5M+ daily transactions, reducing batch runtime by 3 hours.

- HALO (AT&T, Telecom) – Designed automation pipelines in Matillion ETL that improved order capture accuracy, reduced manual intervention by 40%, and ensured 99% SLA compliance.
- ALLIANCE (AT&T, Telecom) – Implemented a near-real-time Teradata warehouse processing multi-terabyte sales data, achieving sub-hour ingestion and validation across critical business streams.

Education

- PGDAC (Post Graduate Diploma in Advanced Computing) – CDAC Pune (2016)
- B.Tech, Computer Science Engineering – Uttar Pradesh Technical University (2014)

Achievements

- Reduced ETL pipeline runtime by 75%, enabling near real-time analytics and accelerating decision-making across multiple domains.
- Cut infrastructure costs by $50K annually through migration of legacy workloads to AWS Redshift and Snowflake.
- Boosted team productivity by 40% by mentoring engineers, standardizing best practices, and improving onboarding efficiency.
- Saved 20+ hours per week of manual effort by implementing automation frameworks and workflow orchestration.
