CAREER SUMMARY

Results-driven **Quality Assurance Engineer** with **8+ years** of experience in manual and automation testing across **web, mobile (iOS & Android)**, and **API** platforms. Proven ability to design test frameworks, develop reusable test cases, and ensure high test coverage in Agile environments. Strong collaborator with cross-functional teams to ensure product quality and timely delivery.

KEY HIGHLIGHTS

• Proficient in designing, writing, and executing comprehensive test scenarios and test cases with focus on reusability, traceability, and coverage.
• Strong skills in performing automation and manual testing across smoke, sanity, functional, regression, integration, system, and backend testing.
• Expertise in UI and API automation using Python, Selenium, Robot Framework, and Pytest; experience with BDD and Postman for API validation.
• Good knowledge of test management and tracking tools including JIRA, RTM (Requirements Traceability Matrix), TestLink, and TestRail.
• Strong understanding of software testing techniques: positive/negative testing, boundary value analysis, equivalence partitioning, verification and validation.
• Hands-on experience in mobile testing across iOS and Android devices covering functional, usability, compatibility, and performance validations.
• Familiar with CI/CD and deployment integration using Jenkins, CircleCI, Rundeck, Putty, and Docker.
• Working knowledge of SQL (MySQL, Oracle) and NoSQL (MongoDB) for backend validation and test data management.
• Exposure to analytics and event-tracking tools such as Mixpanel and CleverTap for validating instrumentation and metrics.
• Actively participated in Agile ceremonies (daily stand-ups, sprint planning, backlog refinement, retrospectives) to improve quality and delivery.
• Strong collaboration experience with Business Analysts, Developers, and cross-functional teams to baseline requirements and define acceptance criteria.
• Solid knowledge of the bug life cycle and defect management practices: logging, triage, severity/priority assignment, RCA, and tracking to closure.

TECHNICAL SKILLS

Testing Types: Functional, Regression, Integration, Web, Mobile (iOS & Android), API, Backend, Sanity, SIT
Automation & Frameworks: Selenium WebDriver, Robot Framework, Pytest, BDD
Programming & Tools: Python, Git, Docker, CircleCI, Jenkins, Putty, Rundeck
API & Test Tools: Postman, REST, GraphQL
Test Management: JIRA, RTM, TestRail, TestLink
Databases: MySQL, Oracle SQL Developer, MongoDB
Analytics: Mixpanel, CleverTap
Domains: Telecom, Telematics, E-Commerce, Seafood SCM, Agriculture

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer – Jiva Ag Services (Aug 2022 – Sep 2025)
• Led QA efforts for web and mobile applications (Android & iOS) and owned test strategy for multiple releases.
• Delivered MVP testing and managed end-to-end mobile app releases including release validation and post-release monitoring.
• Designed and implemented API automation suites using Robot Framework and Pytest; validated REST and GraphQL endpoints.
• Performed backend data validation and SQL queries for test data setup and verification; collaborated with DB team for data integrity.

• Worked closely with product and engineering teams during sprint ceremonies to ensure requirement traceability and acceptance criteria.

Senior Test Engineer – Captain Fresh (Infifresh Foods) (Nov 2021 – Aug 2022)
• Managed functional, regression, and system testing for seafood supply-chain and logistics applications.
• Developed reusable Selenium-based automation scripts and integrated them into CI pipelines for nightly runs.
• Handled mobile app testing (iOS & Android) for vendor and buyer apps; validated end-to-end ordering, inventory, and tracking flows.
• Collaborated with cross-functional teams to triage defects, perform root cause analysis, and reduce production incidents.

Senior Software Engineer – ATMECS (Jun 2021 – Nov 2021)
• Worked on web automation using Selenium and implemented API validation checks for SaaS projects.
• Enhanced test frameworks to support data-driven tests and improved maintainability of automation suites.
• Supported CI/CD integration for test execution and reporting.

Associate Development Senior Analyst – Accenture (Feb 2021 – Jun 2021)
• Executed end-to-end test cases for enterprise clients and participated in requirement reviews and RTM updates.
• Performed defect triage, severity assessment, and coordinated with development for timely fixes.

Quality Engineer – Azuga Telematics (Nov 2018 – Feb 2021)
• Tested telematics web and mobile applications focusing on GPS data validation, event accuracy, and API automation.
• Developed detailed test cases for functional and integration testing and validated telemetry data flows across environments.
• Integrated analytics validation for event tracking and collaborated with backend teams for data reliability.

Software Test Engineer – IBM India Pvt. Ltd. (Aug 2017 – Nov 2018)
• Performed functional and integration testing for enterprise telecom solutions and validated complex workflows.
• Managed defect reporting, regression cycles, and requirement traceability using JIRA and RTM.

PROJECT HIGHLIGHTS

Dealer Sales Management (DSM) – Idea Cellular
Web-based system to manage sales and distribution hierarchy, automate order processing and provide visibility into distributor performance.

Azuga Telematics
Connected vehicle platform turning fleet data into actionable intelligence for operations, safety, and cost optimization.

Shell Energy
Enterprise-level platform supporting energy operations, analytics, and sustainability initiatives across global operations.

Captain Fresh
Digital seafood marketplace connecting suppliers and buyers, with logistics and inventory orchestration for perishable goods.

Jiva Ag Services
Agri-tech platform focused on crop yield enhancement, soil health, and sustainable farming with data-driven product insights.

EDUCATION

Bachelor of Engineering – Electronics & Instrumentation (2016)
Gates Institute of Engineering College, Gooty, Andhra Pradesh

AWARDS & ACHIEVEMENTS

• Best Performer Award for outstanding project performance and delivery.
• Successfully led MVP testing and releases for two mobile apps across Jiva and Captain Fresh.
• Adapted quickly to startup work culture and consistently delivered under tight timelines.

ATS KEYWORDS

Test scenarios, Test cases, Test management, JIRA, RTM, TestLink, TestRail, Positive testing, Negative testing, Boundary Value Analysis, Equivalence Partitioning, Verification, Validation, Unit Testing, Integration Testing, System Testing, UAT, Agile, Sprint planning, Retrospectives, Backlog refinement, Bug life cycle, Defect management, Automation testing, Selenium, Robot Framework, Pytest, API testing, Postman, Mobile testing, iOS, Android, SQL, MongoDB, Jenkins, CircleCI, CI/CD
