CAREER OBJECTIVE:

To seek a long-term career in an organization where I can give my meaningful contribution by applying my knowledge and skills which helps me to grow professionally and achieve personal as well as organizational goals.

WORK EXPER I EN C E :

- Worked as **Automation Test Engineer** in **(Client: Agreeya) Agreeya solutions** ● from Oct-2023 to Sep 2025.
- Worked as **Software Engineer** in **(Client: INFOSYS)** fromSeptember-2021 to April-2023.
- Worked as **System Engineer** in **(Client: ZEPTO) Payroll Kiranakart teachnologies Pvt Ltd** from Oct-2020 toAug-2021.

EXPERIENCE SUMMARY:

- I have total around **5.0** years of experience **Software Testing that includes Manual, mobile, data base, Soup UI and Selenium Automation.**
- Good in using test automation tools such as **Selenium WebDriver** to develop automation testing scripts for web applications using **CORE JAVA** as Scripting language.
- Experience on **Web-Based Applications.**
- Experience in **Banking, Insurance and Energy Domains.**
- Converted manual test cases into automation scripts by using **Selenium**.
- Experience on Automating Test cases using **Element locators**, **WebDriver methods**, **Java programming features** and **TestNG Annotations**.
- Good Experience on **Page Object Model** & **TestNG** framework for testing.
- Good Experience on **API Testing** With **postman**.
- Good knowledge on **Cucumber BDD** framework for testing.
- Performing operations **CRUD** in **Restful API** Test script.
- Knowledge of **API Testing** with **Rest Assured**.
- Experience in defect reporting and tracking using **JIRA**.
- Good exposure to version control tool such as **GitHub**.
- Good understanding of **SDLC** & **STLC**.
- Identified **Test scenarios** & written **Test cases** by applying **Test Case Design Techniques.**
- Good in **Functional** and **Non-Functional testing.**
- Through knowledge in Functionality Testing, Integration Testing, System Testing, Regression Testing, Smoke Testing, Sanity Testing.

Technical Skills:

- **Automation Testing:** API Testing with Postman, UI Automation testing using selenium with java, TestNG, Maven, Jenkins.
- **Manual Testing:** Black box Testing Techniques, Functional and Non-functional Testing, Regression Testing, Retesting, Test Case Design, development and execution.
- Automation Framework-**Test NG and Cucumber**
- Version Control System: **GIT**
- Bug Tracking and Test Management Tool: **Jira**
- Functional Domain Area: Investment Banking Domain
- Basic Knowledge on Database: **MySQL**
- Basic Knowledge on API - **CRUD**
- Basic knowledge on **API Rest Assured**

PROJECTS UNDERTAKEN:

Project 1:

Company	**(Client: Agreeya)**
Project Name	**Wholesaled**
Domain	**E-Commerce**
Role	**Automation Test Engineer**
Testing Approach	**Manual And Automation Testing**
Tools Used	**Selenium WebDriver, TestNG, Core Java, Maven, GitHub, JIRA and SQL**

Description:

This project is an e-commerce Website. The scope of the Toolbox supply website is to focus the wholesale/retail customers for the products listed on the site. The Website targets the India customers along with all the overseas markets. In the Front office, it deals with online customers who buy the listed products and request a quote for bulk order.

Roles & Responsibilities:

- Analyzing the customer Requirements
- Understanding the functional part of the application.
- Involved In meeting of clarifying doubts in user stories.
- Preparing Test Cases and Execution.
- Developing the same manual test cases implemented as Test scripts using Selenium WebDriver.
- Involved in frame work development as Page Object Model with Testing.
- Involved in executing the scripts.

- Involved in defect Management activities to report the bug, track the bug and to close the bug with help of Jira.
- Attended daily scrum meeting and coordinated with developers.
- UI Automation using selenium web-driver, TestNG, Maven, API Testing Using Postman.

Project 2:

Company	**Client: INFOSYS**
Project Name	**Synchronized QA**
Domain	**Banking**
Role	**Software Engineer**
Testing Approach	**Manual And Automation Testing**
Tools Used	**Selenium WebDriver, TestNG, Core Java, Maven, GitHub, JIRA and SQL**

Description:

Synchronized QA is a comprehensive testing framework designed to seamlessly integrate both manual and automated testing processes. Our goal is to enhance software quality by creating a cohesive environment where human insight and automated efficiency work hand in hand.

Roles & Responsibilities:

- Understanding the Requirements.
- Involved in creation of the test cases.
- Involved in test case review as per the client guidelines.
- Involved in test cases execution.
- Involved in Issue triage and workshop sessions.
- Involving teaching, guiding and suggestions to the junior team members.
- Involved In Smoke, Sanity, regression, retesting and UAT testing.
- Involved in defect Management activities to report the bug, track the bug and to close the bug with help of TFS.
- Involved Daily Scrum meetings, Sprint review and Retrospective meetings.

Project 3:

Company	**(Client: ZEPTO)**
Project Name	**Atlantic Union Bank**

Domain	**Investment Banking**
Role	**System Engineer**
Testing Approach	**Manual And Automation Testing**
Tools Used	**Selenium WebDriver, TestNG, Core Java, Maven, GitHub, JIRA and SQL**

Description:

This project is under Investment Banking. It is a trading account module. Under this module various options are present for the users. Those options are Dashboard, Orders, Holdings, Positions, Apps, Profile & Watch list etc. Using this trading account module user can trade in the stock market. User can buy, sell the stocks, and it provides functionality to punch the different orders such as CNC, MIS, Regular and AMO.

Roles & Responsibilities:

- Analyzing user stories and/use cases/requirements for validity and feasibility.
- Verify the test cases by using test case design techniques.
- Attended Project meetings and interacted with other team members in order to resolve the problems.
- Collaborate closely with other team members and departments.
- Generating multiple types of test reports like Extent Report using Cucumber.
- Performed API testing using REST assured and cucumber BDD framework.
- Converting test case into automation script.
- Performed API testing using REST assured and cucumber BDD framework.
- Involved in identifying Test Scenarios for developing Automation Test Scripts.
- Developing Automation Test Scripts using Framework & Execution of test scripts using Selenium WebDriver and TestNG.

EDUCATIONAL PROFILE:

❖**B.E-B-Tech(Aeronautical,engineering)**

Bharath University in **2018** **DECLARATION:**

I hereby declare that the information furnished above is true to the best of my knowledge.
