Profile

Highly experienced Full Stack Java/J2EE Developer with 5 years in Microservices and Spring Boot, seeking to drive innovative solutions. Proven ability to contribute to organizational growth through technical expertise and dynamic problem-solving.

Professional Summary

- ✓ Creative professional with 5 years of IT experience in Web based and Enterprise applications including requirement analysis, design, and implementation and testing with priority on Object Oriented, Java/J2EE and Client Server technologies.
- ✓ Experience in working with RESTFUL Web Services using JAX-RS APIS.
- ✓ Experience in using AJAX and JSON for implementing Web Services.
- ✓ Experience in Application Server Apache Tomcat.
- ✓ Worked extensively on spring frameworks (Spring Core Container, Spring Web MVC, and Spring Data Access/Integration) along with Hibernate, JPA.
- ✓ Factory Design Pattern, Abstract Factory Pattern, Model View Controller (MVC), Data Access Object, Business Object and Value Object.
- ✓ Having good experience in spring, spring boot, Micro services, and JPA and Hibernate frameworks.
- ✓ Good hands-on development and visual composition of UI applications, Responsive Page Designs and Layouts with React JS, Angular, Node JS, JavaScript, j Query, HTML, CSS.
- ✓ Experienced in using design patterns and J2EE design patterns like Singleton Design pattern,
- ✓ Experience in SQL and PostgreSQL database.
- ✓ Proficient in implementing and optimizing various data structures such as arrays, linked lists, trees, heaps, graphs, and hash tables.
- ✓ Strong understanding of algorithmic complexities and proficiency in analyzing algorithms for performance.
- ✓ Experience in designing and implementing efficient algorithms for various problem domains including sorting, searching, dynamic programming, and graph traversal.
- ✓ Familiarity with advanced data structures like red-black trees, AVL trees, B-trees, and various graph representations.
- ✓ Capable of working independently with excellent technical and communication skills.
- ✓ Self-motivated professional who achieves results and has superior ability to coordinate and perform several projects simultaneously.

Technical Proficiencies

Programming Languages	:	Java
J2EE Technologies	:	Servlets, JDBC, JSP
Web Technologies	:	HTML, CSS, Java Script, Angular, React JS
Frame Works	:	Spring, spring boot, Micro services, Angular (Node JS)
Framework Modules	:	Spring JDBC, Spring ORM, Spring MVC
ORM Tool	:	Hibernate, JPA
Database	:	MySQL, PostgreSQL
IDE	:	Eclipse, IntelliJ
Building Tool	:	Maven, Jenkins
Others	:	Rest API, GIT, Bit bucket, Postman, Kubernetes, Kafka

Education

St Mary's Group of Institutions, Guntur (JNTU Kakinada), Bachelor of Engineering

Experience

Working in NTT data as a Software Engineer, Bangalore, from July 2020 to till date.

Project Details

3. Project Title: ACSS -Agent Assist Chat Bot — Client: Verizon, USA

Project Overview: The ACSS (Agent Customer Support System) – Agent Assist Chat Bot project is focused on revolutionizing the customer service experience for Verizon by enhancing the capabilities of customer support agents through intelligent, AI-powered tools. The primary goal is to provide a seamless and efficient interface that empowers agents to respond to customer queries more effectively and reduce resolution times.

Responsibilities:

- Implementing on Spring Boot and Micro services.
- Implementing on Spring Data JPA and Restful web services.
- Wrote JUnit test cases to ensure the reliability and accuracy of the system.
- Participated in sprint planning, backlog grooming, and daily stand-ups to ensure clear understanding of feature requirements.
- Integrated Agent Assist BOT with backend services and third-party APIs to fetch customer data, suggest intelligent responses, and provide contextual help to agents.
- Good experience in developing the single-page applications using Angular.
- Experience in developing highly interactive web applications utilizing Angular.
- Implementing written Service and Repository interface along with their implementations.
- Injected the Repository into service classes using Spring IOC pattern.
- Contributed to CI/CD pipelines for automated deployment, testing, and monitoring using tools like Jenkins.

Technical Stack:

Java, Spring, Spring boot, Micro services, JPA, Spring IOC, IntelliJ, Tomcat, Angular, Node JS, AWS, Multithreading, Maven, Jenkins, Jira, Junit, GIT, Rest API, SonarQube, PostgreSql, Postman.

2. Project Title: Ceska Bank Application — Client: Ceska Bank, Czech Republic

Project Overview Ceska bank ATM application is the project of the reputed bank Ceska. It deals with all the banking transactions including the Cash Withdrawal, Balance Inquiry, Cash Deposit, Mobile Top Up, Payment Order, PIN change etc. All the functionalities have different behavior connected to the Nexo Host in the Bank's centralized network in Prague. The multi-transactions network is supported with the multi-currency like Czech Koruna (CZK) for the home country customers and EUR for the other country customer.

Responsibilities:

- Participated onsite discussion for the requirement gathering.
- Analyze the system requirements.
- Transaction logs checking using ISO8583 standard.
- Involved in the designing of activities.
- Responsible for Defect Tracking using Microsoft Team Foundation Server.
- Performing UAT, GUI Testing, Regression Testing & Functional Testing.
- Involved to implement the restful web services.
- Implemented micro services architecture applications using Spring Boot.
- Writing the Business logic for a given activity.
- Implemented hibernate components.
- Test the Developer test cases and doing the unit testing.
- Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.
- Working with Agile methodology using Jira tool.

Technical Stack:

Java, Spring, Micro services, Hibernate, Spring boot, React JS, Kafka, Kubernetes, Eclipse, Tomcat, Multithreading, Junit, Rest API, Maven, Jenkins, Jira, SQL, Postman.

1. Project Title: Walmart Seller Portal (Chile) Client: Walmart Chile

Project Overview Walmart Chile portal is Spanish locale web portal which enables sellers to create, update and manage the complete life cycle of items which are shown to buyer portal , maintaining order cycle , inventory management , item creation all sellers can be done through the portal , which internally interact with different system like OMS, IMS , FGW and more distributed systems.

Responsibilities:

- Implementation of Web Pages in JSP using Spring Form Tag Library.
- Created web modules using Spring ORM and Hibernate.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Framework for Dependency injection.
- Used Spring Hibernate for Querying data from the database.
- Involved in developing Controllers using Spring ORM.
- Implementation of Web Pages in JSP using JavaScript for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design developed business logic.
- Develop the site and integrate the dynamic pages with the static designs.

Technical Stack:

Java, J2EE, spring, Spring ORM, HTML, CSS, JavaScript, JSP, Eclipse, Visual Studio, Bootstrap, Junit, GIT, SQL, React JS, Kafka.
