Shubham Suradkar

E-mail: ssuradkar3698@gmail.com **Mobile: +91 7447793279**
iOS Application Developer **LinkedIn: linkedin.com/in/shubhamsuradkar**

Experience Summary:

- iOS Developer with 3.4 years of experience, specializing in Swift, SwiftUI, UIKit, and architecture patterns like MVVM, MVC for building scalable, secure, and high-performance mobile applications.
- Currently contributing to the Bluestone Lane mobile app, focusing on feature development, UI/UX optimization, and performance enhancements for a seamless ordering experience.
- Skilled in SwiftUI and UIKit, delivering intuitive, visually appealing, and responsive user interfaces aligned with accessibility and performance best practices.
- Proficient in RESTful API integration, ensuring efficient data handling and seamless communication with backend systems.
- Skilled in debugging, unit testing, and resolving production issues to maintain application stability and reliability.
- Experienced in collaborating with designers, product managers, and backend developers in Agile environments to deliver high-quality features.
- Consistently learning and applying the latest iOS technologies to enhance application performance, maintain code quality, and improve user experience.
- Followed industry best practices for clean code, SOLID principles, modular architecture, and reusable components to ensure maintainable and scalable application development.
- Experienced in app performance optimization, memory management, and App Store submission processes, ensuring adherence to Apple's guidelines and smooth release cycles.

Technical Skills:

Languages & Frameworks: Swift, SwiftUI, UIKit, Combine
Tools & Technologies: Xcode, Git, GitHub, CoreData, SwiftData, SQLite, Instruments
Architectures: MVVM, MVC
Others Skills: RESTful APIs, JSON, Auto Layout, Storyboards, Unit Testing with XCTest, Concurrency (GCD, async/await), Push Notifications, Localization

Education Details:

- PG Diploma in Advanced Computing**,** CDAC Pune
- Bachelor of Engineering, Dr. Vitthalrao Vikhe Patil College of Engineering, Ahmednagar

Work Experience:

Cybage Software Private Limited –Pune, India | June 2022 – Present

1. **Project Title: Bluestone Lane ODC**
Industry domain: Restaurants/Ordering
System Platform: iOS, SwiftUI
Project Overview:
An iOS application for ordering coffee and products, enabling users to browse menus, customize orders, choose pickup, delivery, or dine-in, and track orders in real-time. Integrated with secure payments, location services, loyalty programs, and push notifications for enhanced engagement.
Responsibilities:

- Built and optimized SwiftUI components to ensure smooth user interactions and modern app design.
- Developed the Order Placement Module supporting self-pickup, dine-in, and delivery workflows.

- Integrated RESTful APIs for secure data transactions and real-time updates.
- Resolved client-reported issues promptly, contributing to continuous app improvement
- Collaborated with cross-functional Agile teams to deliver high-quality features on schedule

2.Project Title: FRHI Royal Service (Accor Group)
Domain: Hotel Operations
Platform: iOS, UIKit
Project Overview:
An internal iOS application used by hotel staff to manage guest requests, housekeeping tasks, maintenance issues and interdepartmental communication across luxury hotels under Accor's FRHI brands. Designed to uphold luxury service standards with efficient, real-time task management.
Responsibilities:

- Designed and implemented UI components using UIKit and Storyboards to provide a seamless, intuitive user experience.
- Built modules for task management, guest request tracking, and status updates.
- Integrated REST APIs to synchronize with hotel management backend system
- Implemented push notifications to ensure staff receive real-time alerts for assigned tasks and guest requests.
