SUMMARY

To work in a competitive environment that effectively utilizes my analytical, interpersonal, leadership, and organizational skills to conceive and achieve solutions that help the organization not only meet its targets but also allow it to grow, thereby enhancing my own skills as an individual and as a key player in the organization's development.
Experienced Software Engineer with 9 years of expertise in test automation, tooling, and framework development using JavaScript, Node.js, Karate, CodeceptJS, Selenium, MongoDB, and Java. Skilled in building, maintaining, and enhancing automated test frameworks to validate performance, scalability, and optimization. Proficient in CI/CD pipelines, including Jenkins, with experience in service-oriented architecture, and cloud platforms. Strong hands-on experience in Agile (Scrum) methodology, and the Software Development Life Cycle (SDLC). Expertise in web, mobile, system, regression, and user acceptance testing (UAT) through both API and UI automation, as well as manual testing. Well-versed in defect tracking and reporting using PLM and Jira, along with test management in TestRail. Proficient in handling user stories, sprint planning, task estimation, risk assessment, and dependencies in Agile environments. Skilled in creating test scenarios, functional test cases, and test plans, while supervising and tracking test execution to measure and report test coverage. Strong communication and analytical skills, with the ability to collaborate effectively in globally distributed teams, to drive automation improvements and enhance tooling efficiency.
Analytical Software Development Engineer in Test (SDET), known for high productivity and efficiency in task completion. Specialize in automated testing frameworks, continuous integration processes, and debugging complex software solutions. Excel in teamwork, problem-solving, and adaptability, ensuring seamless collaboration with developers to enhance product quality.

SKILLS

- UI Test Automation
- API testing
- Test case development
- Regression testing
- Sprint planning
- Java
- Continuous integration
- Functional testing
- Technical documentation
- Jira
- CodeceptJS
- Selenium
- TestNg
- Maven
- Allure
- Karate
- Accelq
- Git
- RestAssured
- Jenkins

EXPERIENCE

SDET II

Monotype Solutions India Pvt. Ltd./ Jul 2018 to Jul 2024

- Mosaic is an E2E solution for enterprises to manage and share the fonts in their company
- It provides different roles and solutions to users for sync, download and to manage their fonts

- It is a web-based application in which we have used codeceptjs for UI automation
- We have used Karate for API testing
- Inventory Management: This feature powers the search page of the Mosaic web application where the user can search for multiple fonts and family according to his requirement
- This feature uses Elastic Search and alogia search to provide the results to the user as per the filters available on the browse page
- Have worked on the ETL testing for this feature using accelq scripts
- UI automation of the full browse page using condeceptjs/Javascript and accelq
- Family Page: On the family page, there are details about a family of fonts which includes Type tester, sync and download button, inline search, font styles, information about designers, classifications public and private tags
- I have worked on this page from scratch and did incremental release in every sprint
- Third Party Fonts Management Page: Using this page users can upload non-monotype fonts and on the fly its family and font pages will be created
- This page has been a great attraction for our customers
- Its addition has been a great success for Monotype
- I have worked on this page and tried to follow ATDD and did its automation with the story itself
- I have also done its localization testing via automation
- We have covered approximately 90% of use cases via UI automation
- Font Management Page: This page helps users manage and share family/fonts by using fontsets, web projects, folders and digital ads
- Users can share these assets with their team members
- We have added family and font rows on these asset pages
- I have worked on this page and tried to follow ATDD and did its automation with the story itself
- My Library Page: This page helps use create different assets
- Major responsibility includes managing the team with their queries on Automation Working as a subject matter expert for UI Automation
- Understanding Business requirements/ User stories
- Participating in Sprint Grooming and Planning meetings
- Done the UI Automation with Codeceptjs/Javascript
- Done UI and API automation using ACCELQ
- Used Karate for API automation
- Involved in Functional, UI, Regression Testing and Sanity Testing
- Prepared and Executed Test Cases as per System Requirements
- Updating/ Addition in Automation Framework when needed
- Identifying Bugs and Reporting in JIRA
- Doing incremental release after each sprint
- Deployments of different pipelines on different environments using jenkins and testing end to end
- Handling multiples releases and hotfixes

QA II

Monotype Solutions India Pvt. Ltd./ Jul 2017 to Jun 2018

- MLS is a desktop application which provides a single platform for users to browse and install fonts
- It provides an integrated view to the users where they can browse as well as install fonts
- Developed the Selenium Automation Test Scripts using Java programming and TestNG
- Involved in functional, UI, regression testing and sanity testing
- Prepared and Executed Test Cases as per System Requirements
- Updating/ Addition in automation framework when needed
- CI/CD using Jenkins

QA Engineer
Monotype Solutions India Pvt. Ltd./ May 2016 to Jun 2017

- SkyFonts is a desktop app that was used by our customers to install fonts to their system
- This application was based on dot.net
- Functional, regression, automation and performance testing
- Application Testing, across different platforms and Operating systems
- Performing high-class debugging
- Checking for product scalability, reliability, consistency, and performance

QA Trainee
Monotype Solutions India Pvt. Ltd./ May 2015 to May 2016

- WFP was a single page application that allowed user to upload a font/family to site and allowed user to get the preview of how that font/family will appear if applied to their advertised page
- Involved in functional, UI, regression testing and sanity testing
- Prepared and Executed Test Cases as per System Requirements
- This project used Trello for logging the bug, tracking and feature implementation

PROFESSIONAL HIGHLIGHTS

Monotype Solutions India Pvt. Ltd., 05/01/15, 07/31/24, Mosaic, SDET II, 07/01/18 - Present, 8, Mosaic is an E2E solution for enterprises to manage and share the fonts in their company. It provides different roles and solutions to users for sync, download and to manage their fonts. It is a web-based application in which we have used codeceptjs for UI automation. We have used Karate for API testing., Understanding Business requirements/ User stories., Participating in

Sprint Grooming and Planning meetings., Done the UI Automation with Codeceptjs/Javascript., Done UI and API automation using ACCELQ., Used Karate for API automation., Involved in Functional, UI, Regression Testing and Sanity Testing., Prepared and Executed Test Cases as per System Requirements., Updating/ Addition in Automation Framework when needed., Identifying Bugs and Reporting in JIRA., Doing incremental release after each sprint., Deployments of different pipelines on different environments using jenkins and testing end to end., Handling multiples releases and hotfixes., MLS App, QA II, 07/01/17 - 06/30/18, 4, MLS is a desktop application which provides a single platform for users to browse and install fonts. It provides an integrated view to the users where they can browse as well as install fonts., Developed the Selenium Automation Test Scripts using Java programming and TestNG., Involved in functional, UI, regression testing and sanity testing., Prepared and Executed Test Cases as per System Requirements., Updating/ Addition in automation framework when needed., CI/CD using Jenkins., SkyFonts App, QA Engineer, 05/01/16 - 06/30/17, 14, SkyFonts is a desktop app that was used by our customers to install fonts to their system. This application was based on dot.net., Functional, regression, automation and performance testing., Application Testing, across different platforms and Operating systems., Performing high-class debugging., Checking for product scalability, reliability, consistency, and performance., Web Font Platform, QA Trainee, 05/01/15 - 05/31/16, 6-8, WFP was a single page application that allowed user to upload a font/family to site and allowed user to get the preview of how that font/family will appear if applied to their advertised page., Involved in functional, UI, regression testing and sanity testing., Prepared and Executed Test Cases as per System Requirements., This project used Trello for logging the bug, tracking and feature implementation.

ACHIEVEMENTS PARTICIPATIONS

- Got Kudos for doing UI automation of the whole page in one sprint.
- Got Kudos for setting up UI automation for the project from scratch.
- Got Kudos for doing localization automation for all the scenarios.
