Rishave Kashyap

Senior Data Engineer

rishavkshp007@gmail.com | +91 8709320511| http://linkedin.com/in/rishave-singh-kashyap-926575175/ | Bangalore, India

PROFESSIONAL SUMMARY

Senior Data Engineer with 6+ years of experience designing scalable data architectures across both **on-premises and cloud environments (GCP)**. Skilled in building and optimizing **end-to-end ETL pipelines** processing terabytes of data using **PySpark, Kafka, Hive, and Apache Airflow**. Led critical data platform modernization initiatives, including **Hadoop-to-GCP migrations** and **Data Mesh implementations**, driving improved performance and reduced costs.

Experienced in **developing RESTful APIs using Java and fastapi**, and collaborating with **Data Science teams on MlOps workflows** for efficient model deployment and monitoring. Passionate about learning and applying emerging technologies, with a growing interest in **Machine Learning** and **Agentic AI** to build intelligent and adaptive data-driven systems.

SKILLS

Programming Languages: Python, Java, SQL, Shell Scripting **Big Data Technologies:** Apache Spark, PySpark, Apache Hive, Apache Kafka, Hadoop, MapReduce **Cloud Platforms:** Google Cloud Platform (GCP), BigQuery, Dataproc, Cloud Composer, Vertex AI **Data Engineering:** ETL, Data Lake, Data Warehouse Architecture, Data Modeling, Data Integration, Data Migration, Cloud Migration, Data Governance **Workflow & Orchestration:** Apache Airflow, Oozie **Development & DevOps:** REST APIs, Docker, CI/CD, Agile **Analytics & Tools:** Looker, Great Expectations **Emerging Technologies:** MLOps, Prompt Engineering

PROFESSIONAL EXPERIENCE

Senior Data Engineer
Lowe's

Bangalore, India | 09/2021 - Present

- Architected and implemented Data Mesh framework for CI and PROMO domains, creating Centralized Data Store (CDS) using Kafka, PySpark, and Hive , serving 20+ downstream applications with 99% Service Level Agreement (SLA).
- Directed Proof of Concept (POC) and led team for migrating TB+ on-premises Hadoop infrastructure to Google Cloud Platform, utilizing Dataproc, BigQuery, and Cloud Composer, reducing infrastructure costs by 40-50%.
- Transitioned complex ETL workflows from Oozie to Apache Airflow, improving workflow orchestration efficiency by 60% and reducing manual intervention by 75%.
- Led a team of 4 developers focused on development and maintenance of PROMO data products, managing project planning, stakeholder communication, and driving successful delivery of 3 critical data products.
- Designed and implemented an automated data comparison framework to support migration from on-prem Hadoop to GCP, reducing manual effort and cutting development time by 50%. Enabled faster validation across systems, ensuring data consistency and accelerating migration timelines.
- Designed scalable data pipelines processing 10TB+ daily data volume with Real-time data processing, implementing data quality checks using **Great Expectations** and monitoring systems to ensure data integrity across multiple business domains.
- Developed, maintained, and optimized REST APIs using Java and Spring framework, serving 1000+ concurrent users .

- **Collaborated closely with Data Scientists and business stakeholders to gather requirements and translate ML model needs into scalable, production-ready data pipelines**, defining technical specifications and delivery timelines to streamline ML model deployment and monitoring.

Software Engineer

Persistent Systems

Pune, India | 08/2019 - 09/2021

- Developed and maintained ETL processes using big data technologies for data transformation and loading operations supporting business intelligence and reporting systems.
- Contributed to the design and development of scalable data pipelines for various client projects.
- Participated in code reviews and testing to ensure high-quality deliverables.
- Collaborated with cross-functional teams to understand data requirements and implement effective solutions.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Techno India Salt Lake, MAKAUT

Kolkata | 01/2015 - 01/2019

- CGPA: 8.15/10

CERTIFICATIONS

SPOT AWARD

Lowe's | 12/2023

SPOT AWARD

Lowe's | 06/2024

KEY PROJECTS

- Hadoop to GCP Migration (09/2023 - 08/2024): Led comprehensive migration of legacy Hadoop infrastructure to Google Cloud Platform. Migrated 500TB+ of historical data with zero data loss and minimal downtime. Implemented cost optimization strategies resulting in 40% reduction in infrastructure costs. Technologies: GCP, Dataproc, BigQuery, Cloud Storage, Apache Spark.
- Data Mesh Architecture Implementation :-Designed and implemented Data Mesh framework for decentralized data management. Created domain-specific data products with self-service capabilities. Established data governance policies and quality standards across domains. Technologies: Kafka, PySpark, Hive, Airflow, Data Governance Tools, Big query
- **Built a monitoring tool and Looker dashboard to track Airflow pipeline performance across Data and ML workflows**, providing real-time visibility into DAG runs (success, failure, delays). Integrated with GCP Composer, BigQuery, and centralized logging to automate failure detection and alerting. Improved pipeline reliability, reduced debugging time by 60%
