Career objective

Experienced Cloud and Data Engineer with a strong background in designing scalable data pipelines and modern cloud platforms across AWS Azure, and GCP. Proven track record in real-time data processing, big data solutions, and cloud-native architecture. Seeking to drive impactful, data-driven innovation within a fast-paced, technology-focused organization.

Profile Summary

Versatile Cloud and Data Engineer with **8.7+** years of experience in delivering scalable, cloud-native data solutions across AWS, Azure, and GCP, combining strong software development and data engineering expertise.

- **Cloud Expertise:** Proficient in **AWS** (S3, Glue, Athena, Lambda, RDS, EMR, DynamoDB, Redshift, Kinesis, CloudFormation, OpenSearch, EC2, Snowflake, Databricks, CloudWatch, CloudTrail, X-Ray, Guard Duty, IAM, FSx, EFS, SQS, SNS, API Gateway, Step Functions, Secrets Manager, Code Pipeline – CI/CD workflows), Security best practices in AWS and hands-on experience with **GCP** services including GCE, Cloud SQL, GCS, Pub/Sub, IAM, and Stack driver monitoring.
- **Big Data & ETL:** Strong command of bigdata technologies like **Apache Spark**, **Hive**, **Hadoop** and **SQL** with practical experience using ETL tools like Apache **NiFi** and **Apache Airflow, Apache Kafka** for processing large-scale datasets.
- **Programming & Development:** Skilled in **Python**, **PySpark, Core Java**, and **web technologies** (HTML, CSS, JavaScript, AngularJS) for full-stack and data-focused application development.
- **DevOps & Methodologies:** Hands-on experience with **Terraform**, **AWS CDK, AWS EKS** (Docker/Kubernetes), **Azure data bricks** and **Azure DevOps** tools and strong familiarity with **Agile/Scrum** practices for efficient project execution.
- **Soft Skills:** Excellent communication and interpersonal skills with a strong ability to collaborate across teams, ensuring smooth and timely project delivery.

Certifications

- AWS Certified Cloud Practitioner.
- AWS Cloud Management Tools from Cloud Academy.
- Server less Computing on AWS for developers from Cloud Academy.
- Building Deploying Running Containers in Production from Cloud Academy.
- AWS Big Data Specialty Certification from Cloud Academy.
- AWS Developer Services for CICD certification from Cloud Academy.
- AWS Certified Developer Associate from Udemy.
- Solving Infrastructure Challenges with Terraform from Cloud Academy.
- Certification in Google Cloud-Fundamentals, Core Infrastructure and Compute engine solutions From Plural sight.
- Azure Devops Certification
- Certification in Core Java and SQL from Jspiders.

Education

KLS Gogte Institute of Technology - VTU Belagavi Electronics and Communication engineering (Aggt – **70.4%)**	**2012-2016**
SKE's Govindaram Seksaria PU College Belagavi – PUC (**86.5%)**	**2012**
SKE's M.R Bhandari School Belagavi – SSLC (**88.8%)**	**2010**

Professional Experience

1. AWS Data Engineer 2 at Eli Lilly and company (Bengaluru) Apr 2021-Present

Project: OFG Dir
Role: Technical Lead
Project Description: Data Engineering and analysis of OFG molecule for tablets, capsules data and creating automated stability tables, documents, reports and plots for FDC documentation for regulatory approval, supporting faster go-to-market for combination drug formulations.
Impact : Helping hundreds of scientists and researchers by significantly reducing their manual time more than 100hrs and accelerating the medicine formulation process.
Technology Stack: Python, Boto3, PySpark, AWS services like S3, Lambda, Glue ETL, Cloud watch, SNS, SQS, EC2, IAM, Redshift, RDS, SQL, Databricks.

Responsibilities:
Technical Ownership: Led end-to-end design, development, and delivery of scalable solutions.
Stakeholder Collaboration: Worked closely with Product Owners, BAs, and QA for requirement clarity and validation.
Team Leadership: Guided and mentored developers ensured adherence to coding standards and best practices.
Architecture & Design: Defined architecture, selected tech stacks, and reviewed design decisions.
Project Planning: Estimated effort broke down tasks and aligned deliverables with sprint goals.
Code Reviews: Conducted peer reviews to ensure high code quality and maintainability.
DevOps & CI/CD: Oversaw pipeline configuration, deployment automation, and environment management.
Risk Management: Identified technical risks early and proposed mitigation strategies.
Documentation & Reporting: Maintained technical documentation and provided progress updates to management.

Project: PR&D DE (Product Research and Development Data Explore)
Role: Data Engineer
Project Description: SDP(Smart Discovery Platform) which enable engineers and scientist to access faster information which I turn enable faster decision making on their current portfolio like scaling up medicine formulation process and improved lab efficiency
Impact : PRD helped hundreds of scientists and researchers by significantly reducing their time and accelerating the medicine formulation process, resulting in savings of over $20 million.

SOUMYA VISHWANATH POTDAR
soumya.potdar2@gmail.com
+91- 8867615357

Technology Stack: Python, Boto3, PySpark, AWS services like S3, Lambda, Glue ETL, EMR, Cloud watch, SNS, SQS, EC2, IAM, API Gateway, VPC, OpenSearch Kibana, Redshift, DMS, RDS, CloudFormation, GIT, CI/CD, GitHub Actions, SQL, Snowflake, Databricks, Apache Airflow
Responsibilities:

- Gathered requirements, defined acceptance criteria, and estimated user stories.
- Developing the optimum technical solution using AWS services and python. Optimizing, reusability and modularity approach for code.
- Once the data is uploaded to s3 trigger Lamda function which will chunk files and store data info in DynamoDB and then load all documents and attachment information to AWS OpenSearch.
- Index creation, backup, Refresh, Search and Download API's to fetch data from OpenSearch.
- ABC Migration, Raising RITMs and initiating all deployment activities.

Functional Insights: Data explore platform is one stop application or a centralized hub that enables PRD users to explore and access trusted and meaningful information, across all our structured and unstructured source via the EDB

Innovation Challenge Finalist- DCT Advisor, where got a chance to understand Clinical trials.
Participated in Hackathon, Co create tech events.

2. Senior Software Engineer at Mindtree (Bengaluru) Nov 2019 – Mar2021

Project: WK- GBS Cloud

Client: Wolters Kluwer, USA
Role: Service Engineer (Developer)
Project Description:
Automated cloud resource management and monitoring using scripts and Azure DevOps.
Managed AWS services like VMs, VPCs, DNS, EFS, FSx, and IAM roles.
Implemented event-driven monitoring (network, resource, file integrity) with alerts via CloudWatch and email.

Services Worked on:
File Integrity Monitoring – Tracked file/registry changes (create, delete, modify).
Resource Service Monitoring – Automated AWS RSM with CloudWatch, SNS, SQS; integrated with OpsRamp/ServiceNow.
Network Monitoring – Controlled VPC/Subnet/LB/Transit Gateway monitoring; enforced detailed network data fetch.
DNS Management – Automated DNS zone/record operations; enforced compliance reporting.
Cloud File Storage – Automated FSx & EFS setup; enabled lifecycle, health monitoring, alerts, and audits.

Technology Stack: Python Programming, Azure Devops, AWS services like S3, Lambda, Cloud watch, Simple Email Service, Simple Notification Service, Domain Name Service, Cloud File Storage (FSx and EFS), VPC, Subnet, Network Interface, EC2, IAM, AWS CDK, Terraform
Responsibilities:

- Analysed requirements, defined acceptance criteria, and estimated user stories.
- Developed optimized, modular Python solutions tailored to customer environments.
- Used Azure DevOps for source control, YAML pipeline creation, CI/CD, and testing.
- Collaborated with the team to troubleshoot issues during development.
- Created functional test cases, peer-reviewed tasks, and documented requirements in README.

3. Officer - IT at RBL Bank (Mumbai) Jan 2018 - Nov 2019

Parent Company (Payroll Company)
IT Trainee at WK Associate LLP (Jan 2018 – Feb 2018)
Bridgelabz Solutions LLP (Feb 2017- Dec 2017)

Project: Credit card Data lake

Scope: Moving on premises data to Cloud
Technology Stack: AWS S3, Athena, EC2, EMR cluster and Hadoop - Apache Hive, Spark and ETL tool as Apache Nifi,
Apache Airflow, Kinesis, SQL, Redshift, NoSQL-DynamoDB, DMS, RDS, Apache Kafka, Kubernetes.
Responsibilities:
Built cost-efficient data lake workflows using NiFi, Hive, and Spark on AWS.
Split large files, managed tables in S3, and validated credit card data with DWH.
Automated notifications for data pipeline status.
Impact : Centralized, secure, S3 backed data store with a hive backed Big Data processing cluster ready to scale with the bank.

Project: R-One Dashboard

Scope: A single view of all enterprise data served through interactive dashboards and API access.
Technology Stack: AWS S3, Athena, EC2, EMR cluster, AWS RDS Hadoop, Apache hive, Apache Spark and Sqoop, Snowflake, Kinesis, Redshift, DBT
Databricks, Snowflake, SQL
Responsibilities:

- Built data pipelines using Sqoop, Apache Hive, NiFi, and Pentaho.
- Transferred Finacle data between MySQL, HDFS, and AWS RDS (Aurora/PostgreSQL).

Impact : This Web Application which include 4 Dashboard.

RM Dashboard – Relationship Manager Dashboard where manager can see the customer details.
CIF Dashboard – Information related to customer Current account, Savings account and Credit card.
Group Dashboard – Information related to multiple customers involved in one group.
Account Dashboard – Details of the customer account like Account number, account holder name and status etc.

Project: RBL Chabot

Scope: Online account opening through Chabot
Technology Stack: HTML, CSS and JavaScript, jQuery, Bootstrap, Typescript, AngularJS
Responsibilities: Design – Add Models, loader, as per Requirement using HTML5.
Client side validations using HTML5 and JavaScript
Functional Insights: This Web Application is used to get information about savings account like interest rate, transaction details and documents required and also it will open ABACUS savings account online through Chabot.
