Professional Summary

I have around 3 years of experience in developing web applications using Angular, AngularJS, C#, .NET Core, and .NET Web API. I am skilled in building responsive user interfaces with HTML, CSS, Bootstrap, SCSS, Typescript, and Angular, along with deployment and integration on Azure. My expertise includes working with databases such as Oracle, PostgreSQL, and SQL Server, handling queries, stored procedures, functions, validations, and Entity Framework. I am proficient in GitHub for version control and have experience in agile methodologies, collaborating with teams to align end-user needs, UI diagrams, and backend routes. I also hold basic knowledge in UI/UX design using Figma and have experience in resolving bugs raised by QA teams. With strong problem-solving skills, quick learning ability, and effective communication, I excel in both independent and collaborative environments.

Technical Skills

- Programming Language : C#, JavaScript, Typescript
- Data base : PostgreSQL, Oracle, SQL Server
- Certifications : Java & Sql certified.
- Cloud Technologies : Azure
- Code Management Tools : Git, Visual Studio Code, Visual Studio, Jira
- Frameworks : AngularJS, Angular, ASP .Net core, ASP .Net Web API , ASP Mvc, Html & Css

Professional Experience

Software Developer (GTET) **Feb 2023 – Current**

- Collaborated with the team lead to gather project requirements and designed UI prototypes using Figma, ensuring alignment through regular communication and feedback.
- Designed and developed web applications using Angular for the frontend and .NET for the backend.
- Build Web API controllers with Entity Framework for handling RESTful requests and responses in C# .NET.
- Developed responsive view templates using Angular, Bootstrap, CSS, SCSS, and HTML.
- Used GitHub for version control and continuous integration processes.
- Implemented Routing Mechanisms to define states and handle different application pages.
- Designed and implemented reusable Angular components leveraging input/output bindings, services, and component inheritance for modular and scalable solutions.
- Created dynamic dropdowns and data tables with sorting and RESTful searching using UI-Bootstrap and Angular.
- Utilized grid view to organize and display data, enabling admins and super admins to edit and delete records.
- Implemented Angular Services to fetch data via RESTful APIs and applied client-side validations to ensure data integrity before backend submission.
- Followed Agile Scrum methodology for efficient and collaborative application development.

Projects

Project Title: **OQB - Online Question Bank**

- **Project Synopsis**: OQB (Online Question Bank), an educational platform streamlining question paper generation for institutions. Features comprehensive user management, efficient question categorization and customizable paper creation. Implemented secure login and creation, tailored for admins, teachers and students. Enhanced productivity with robust backend logic for accurate paper generation. Received positive feedback for user-friendly interface and significant time saving capabilities
- **Tools Used:** C#, .NET, Angular, Oracle, Typescript, Web & Restful APIs, Html & CSS , Bootstrap

Project Title: **Log Books**

- **Project Synopsis**: This project aimed the digital transformation of traditional paper-based academic logbooks into a comprehensive web-based system that streamlined administrative workflows across five different logbook types: Assembly, Vice Principal, Calligraphy, Classroom Observation, and Learner Support Program (LSP). The solution improved data collection, approval workflows, and reporting capabilities while ensuring compatibility with both desktop and mobile devices.
- **Tools Used:** C#, .NET, .NET Core, Angular, Oracle, Typescript, Web & Restful APIs, Html & CSS , Bootstrap

Project Title: **Exam Analysis**

- **Project Synopsis**: The project aimed at optimizing educational practices and student learning. The project commenced with detailed exam analysis strengths the areas for improvement in student performance workshops for teachers provides aligning them with education objectives and standards. The feedback, PTM served as a crucial component. Productive between teachers and parents on students' progress and development. The Integrated approach not only enhanced teaching effectiveness but also strengthened collaboration among the schools' commitment to continuous improvement and academic excellence.
- **Tools Used:** C#, .NET, Angular Js, Oracle, JavaScript, Web & Restful APIs, Html & CSS, and Bootstrap.

Education

Sri Muthukumaran Institute of Technology – Chennai, Tamil Nadu **2018-2022**

B.E | Computer Science & Engineering | Overall: 8.19

Other Skills & Interests

- Soft Skills - Team Player, Analytical and Communication skills, Time management
- Languages - Fluent English, Telugu.
