Chowdamjollu Dineshkumar

.Net Developer

9014513303

Cjdineshkumar3027@gmail.com

OBJECTIVE

Seeking a challenging career in a creative and competitive environment where I could constantly learn, which enhances my professional skills, and enables me to contribute to the organization's growth.

EDUCATION

Bachelor of technology | JNTU | 2021
Computer Science & engineering (CSE) | 70%

TECHNICAL SKILLS

Programming Languages: C#,SQL,HTMl ,Css
Frameworks: .Net framework, ASP.net core, Entity Framework
DBMS: SQL Server, PSQL
Windows Applications : Wpf, winforms ,MVVM
Testing: xUint, MS test
Developer Tools: Git/Git hub
Methodologies : Agile(scrum),CI/CD, Solid Principles

EXPERIENCE SUMMARY

- Having **3+** Years of total Experience in **IT**.
- Having **3+** years of experience in **.Net** Development into Code development, UIDesign and testing.
- Having experience in **WinForms , WPF.**
- Have experience in development applications and support applications using technologies like **Ado.net, C#.**
- Have exposure to Database like **SQL** server.
- Familiar with different Visual studio IDEs.
- Followed - **AGILE** methodology.
- Followed -SDLC

PROFESSIONAL SUMMARY:

Working as **Software Engineer** in **Tavant Technologies** Company **August 2023 - July 2025.**
Worked as **Junior Application Analyst** in **Netcracker Technology** Company **March 2022 - July 2023.**

PROJECTS

1) Tesys Island DTM [Schneider Electric] August2023 - July 2025

CLIENT: Schneider Electric (Energy management and automation domain)

TECHNOLOGIES: C# .NET, windows applications

DESCRIPTION:

Tesys Island DTM main purpose is to be monitoring and maintaining to diagnose electrical loads that is with respect to 80 amps, and it is a combination of many devices and in that Bus-coupler is the main communication device it will communicate to the DTM (Device Type Manager) and takes information from other Devices/Avatars. We will use Modbus TCP/Ethernet IP to communicate with the DTM with bus coupler we will be creating many avatars as per the requirement for example single direction two direction with carrying loads and many applications.

RESPONSIBILITIES:

- Worked on feature development activities & Change Requests based on the design document using C#.
- Worked on Bug fixing, User Stories, User Control's using C#.
- Used Git-Hub for code collaboration and Documentation and TFS for Issue tracking.
- Worked closely with the QA and UI team and participated in deployment activities.
    - Designed and developed key **modules/screens** using **WPF &MVVM, Winforms** to enhance user experience.
    - Technology: C#, SQL, winforms, Third party tools
    - Third-party tools like FarPointWin, DevExpress, Bouncy Castle, Apache and more
    - IDE: VS2017.

2) Woolworths Retail Management System March 2022 - July 2023

CLIENT: Woolworths Group Limited (Retail Domain)

TECHNOLOGIES: C# .NET, windows applications

DESCRIPTION:

The **Woolworths Retail Management System** is a desktop-based enterprise application developed for managing daily operations across various stores, including product inventory, billing, employee management, promotions, and customer service tracking. The system was designed to enhance efficiency, reduce errors, and provide real-time data reporting to support strategic decisions across retail outlets.

RESPONSIBILITIES:

- Worked on feature development activities & Change Requests based on the design document using C#.
- Implemented **ADO.NET** for seamless communication between the application and **SQL Server** databases, including stored procedure execution, transactions, and parameterized queries.
- Built DAL (Data Access Layer) and BLL (Business Logic Layer) for maintaining clean separation of concerns.
- Handled data validation, error handling, and logging mechanisms to ensure application robustness.
- Wrote and executed unit tests and integration tests to validate data operations and UI workflows.
