EDUCATION

- B.Tech in ETC from Konark Institute of Science and Technology (K.I.S.T), Odisha, BPUT, 2011, 6.9 CGPA

CORE COMPETENCIES

- Network Infrastructure Design
- Cybersecurity Measures
- Cloud Integration Strategies
- Data Privacy Regulations
- Network Capacity Planning
- Risk Management Frameworks
- Network Monitoring Solutions
- Network Configuration Management
- Network Troubleshooting Techniques

TECHNICAL SKILLS

-
- Cisco Router Asr 903, Cisco Csr 920-O, 920-I, Ncs-540, Cisco Isr 4331,Ciso 1841,Cisco 2811,Cisco - 2821 .
- Aruba 1930 ,1830 L2 Switch
- Cisco L2 Switch
- OSI MODEL
- Vlan
- switching
- ACL
- EIGRP
- OSPF
- BGP
- MPLS
- NAT

PROFILE SUMMARY

- **With 9 years of extensive experience** in networking, primarily in the telecom sector, adept at handling LAN, WAN, MPLS, and ILL networks.
- **Currently excelling as an L2 Network Engineer** at BCH Electric Ltd., demonstrating proficiency in monitoring and troubleshooting network operations.
- **Possess a strong foundation in** basic networking principles, IP addressing, OSI model, router and switch configuration, VLAN, routing, switching, ACLs, NAT, EIGRP, OSPF, BGP, and MPLS.
- **Recognized for achieving milestones** such as user bandwidth optimization and successful installation of LAN/WAN networks.
- **Leadership skills** honed through managing WiFi networks, coordinating with ISP vendors, and overseeing firewall operations.
- **Expertise in handling equipment** like Fortigate 100-F Firewall, Cisco routers (ASR 903, CSR 920-O, 920-I, 901, NCS-540, ISR 4331, 1841, 2811, 2821), Aruba switches, and Cisco L2 switches.
- **Proficient in advanced networking** capabilities related to the telecom and IT sectors.
- **Knowledgeable in basic understanding** and troubleshooting of Network Address Translation (NAT).
- **Familiar with basic understanding** and troubleshooting of Enhanced Interior Gateway Routing Protocol (EIGRP) , Open Shortest Path First (OSPF) protocol , Border Gateway Protocol (BGP) , Multiprotocol Label Switching (MPLS) networks.

WORK EXPERIENCE

BCH Electric Ltd. | Faridabad, Haryana, Delhi /India
L2 Network Engineer | June 2023 - Present

Responsibilities:

- Overseeing and resolving issues with both LAN and WAN networking infrastructure in a proactive manner.
- Diagnosing and rectifying any issues that arise in MPLS and ILL networks with efficiency.
- Utilizing advanced monitoring tools to track bandwidth usage on a per-user basis.
- Vigilantly monitoring firewall activity to ensure network security.
- Implementing and configuring new LAN and WAN networks to meet specific requirements.
- Strategically managing and optimizing performance of WiFi network devices.
- Facilitating seamless communication with ISP vendors to address MPLS and ILL network concerns.
- Executing precise installations of Windows servers to maintain network stability and functionality.
- Strategically controlling website access by implementing selective blocking and allowing protocols within the network.

Reliance Jio | Jharsuguda, Odisha/India
Backhaul / L2 Network Engineer | April 2017 to May 2023

Responsibilities:

- Implemented and commissioned Cisco routers including CSR 920 O, 920 I, ASR 903 & 901, NCS 540 & 560 series, and switches.
- Oversaw delivery and maintenance of enterprise circuits.
- Monitored MPLS backbone links and promptly alerted respective teams of any NNI/UNI link downtime.
- Upgraded and migrated links, transferring live traffic within specified SLAs.
- Scheduled quarterly preventive maintenance of IP/TX/MW/UBR equipment.
- Conducted end-to-end testing and upgraded optical nodes (10G & 100G) links.
- Developed configuration files for microwave to fiber conversion and microwave takeoff change for bandwidth upgrades, coordinating with NOC team.
- Managed additions and deletions of router, card, and SFP slots in GIS-NE portal.
- Executed RF activities including RF antenna azimuth change, mechanical and electrical tilt adjustments in the 2300, 1800 & 850 MHz frequency bands.

SOFT SKILLS

- Communicator
- Intuitive
- Analytical
- Time Management

CERTIFICATIONS

- CCNA+CCNP Enarsi from Networkings

PERSONAL DETAILS

Date of Birth: 11th March 1990
Languages Known: English, Hindi & Oriya
Address: 935/7c, Sector 7, Ncb Colony, Faridabad, Haryana, Delhi, Pin-121006

- Installed, commissioned, and aligned Ceragon microwave equipment.
- Inspected new integration sites for quality issues.
- Monitored eNodeB, small cell, microwave, and router from backend systems, resolving alarms as needed.

Tata Tele Services (Off Role) | Bhubaneswar, Odisha/India
BSS Engineer | October 2015 to April 2017

Responsibilities:

- Deployed and commissioned ZTE BTS Out Door, Indoor & IBS units.
- Installed, commissioned, and aligned NEC & CERAGONE Microwave (SDH & PDH) Equipment.
- Conducted alarm checks and performed basic configurations in ALCATEL MUX and associated equipment.
- Upgraded and configured TRX, monitored, and troubleshot alarms from OMCR.
- Provided hands-on support to field engineers from OMCR on visibility of Network Element performance-related issues.
- Analyzed OMCR reports daily to evaluate BSS network parameters such as TCH Congestion, Call Drop, and site utilization.
- Orchestrated vendor teams for ATP of BTS & Microwave.
- Executed loop-break testing of E1 from OMCR and managed E1 extension for Customer & Own BTS in PDH MW link.

Wipro InfoTech Ltd. | Bhubaneswar, Odisha/India
L1 Network Engineer (UBR INC, O&M) |January 2014 to October 2015

Responsibilities:

- Engineered configuration settings for Pine, Cisco 8600 Series, HP AMSR20/10 Series routers, and UBR equipment.
- Demonstrated foundational understanding of IP principles.
- Orchestrated Mux configuration, distinguishing Ethernet & Electrical ports.
- Spearheaded commissioning and maintenance efforts for Vodafone UBR projects, overseeing EMF and RF surveys.
- Delivered tailored connectivity solutions including PRI, NPLC, SDH, DWDM to meet specific needs.
- Implemented seamless Mini-Link connectivity between UBR and Back-end BTS.
- Scrutinized back-end bandwidth viability and node types (IP, PDH & SDH) for wireline and wireless connectivity.
- Collaborated closely with NOC for fault detection and rectification coordination.
