PROFESSIONAL EXPERIENCE

GRC/Growth Salesforce, *Employer: Salesforce QA Analyst | TechnoMile India Pvt. Ltd*

Project Description: Customized Salesforce solutions for US-based clients to streamline and de-risk the contract lifecycle. Implemented AI-enabled contract management solutions to handle complex government contracting processes efficiently.

Roles & Responsibilities:

- Analyzed **User Specification Documents (USDs)** to understand detailed **system functionality, business processes, and testing requirements**.
- Designed, developed, and maintained **manual and automated test cases** covering **functional, regression, integration, GUI, and API testing**.
- Built and enhanced a **Hybrid Selenium Framework (POM + Data-Driven)** using **Java, TestNG, and Maven**, improving **regression test efficiency by 25%**.
- Automated **70% of regression scenarios** and integrated test execution with **Jenkins CI/CD** for continuous testing and reporting.
- Performed **REST API testing and automation** using **Karate and Rest Assured** with **Bearer Token authentication** to validate secure endpoints.
- Conducted **Database Testing, Integration Testing, and Compatibility Testing** across **multiple browsers and platforms** to ensure system reliability.
- Executed and monitored **daily automation runs** to validate build stability and identify critical defects early in the cycle.
- Identified, logged, and tracked **defects** using **JIRA**, collaborating with developers and business teams for **timely resolution**.
- **Mentored junior testers** on automation scripting, framework enhancements, and best practices for efficient script maintenance.
- Designed and implemented a **custom API Automation Framework** using **Karate**, generating **detailed analytical and trend-based reports** for stakeholders.
- Participated in **Agile ceremonies (Sprint Planning, Daily Stand-ups, and Retrospectives)**, contributing to quality deliverables and sprint goals.
