S HARI PANDU RANGA REDDY
Contact: 8050305293
Email: pandureddy4266@gmail.com

Professional Summary:

- Having overall 4.2 years of experience in application development, Maintenance and support of applications.
- Hands-on experience in Java Spring (REST API, Spring REST, Data JPA, Spring Security, Spring Boot, React JS).
- Rich domain knowledge &comprehensive understanding of end-to-end development of various technologies like Java, JDBC, Hibernate and Spring.
- Have good working experience in microservices architecture.
- Experience in Development of Multi-tier Applications Using Spring MVC.
- Working experience with Spring Boot 2.8.
- Good Knowledge of Junit, Mockito, Maven, GIT and SVN.
- Worked on Amazon Web Services (AWS).
- Experience in Agile Scrum methodology.
- Experienced in design skills including High Level Design and Low-Level design.
- Experience In object modeling (Ex: UML).
- Good writing, communication, inter personal skills and desiring to learn new technologies and able to implement them.
- Played a key role in automating the deployments on AWS using GitHub, jenkins.
- Developed Playbooks and Roles to manage systems configuration by using ansible.
- Worked on webservers like Apache and application servers like Tomcat to deploy code.
- Extensively worked on Jenkins by installing, configuring, and maintaining for the purpose of continuous integration (CI) and for End-to-End automation for all build and deployments.
- Good knowledge in CI (Continuous Integration) and CD (Continuous Deployment) methodologies.

Professional Experience

- Worked as a **Sr. Software Engineer** at **Tavant Technologies**, Bengaluru from Dec 2024 to till now.
- Worked as a **Software Engineer II** at **Blue Yonder**, Bengaluru from June 2024 to Dec 2024.
- Worked as a **Software Engineer** at **Synechron**, Bengaluru from June 2021 to May 2024.

Technical Skills

Languages	:	Java
JEE Technologies	:	JDBC, Servlets and JSP
Frameworks	:	Spring, Hibernate
ORM Tool	:	Hibernate, Data JPA
SCM	:	GIT, GitLab
IDE	:	Eclipse, Spring Tool Suite
Cloud Services	:	Amazon Web Services
(AWS)Operating Systems	:	Linux(Red Hat), Windows

Web Server Administration	:	Tomcat
CI/CD Tools	:	Jenkins
Version Control	:	Git, Git Hub
SVN Container Technology	:	Docker, Kubernetes

Significant Projects Handled:

Project	:	**Branch IQ : Bank Branch Operations Optimization Tool**
Client	:	Indian Bank
Role	:	Developer
Duration	:	Dec- 2024 to till now
Technology	:	Java 11, Spring Boot, REST APIs, Kafka, AWS (EC2, RDS, S3), Docker, Jenkins, PostgreSQL, JUnit, React.js

Designed a performance tracking and optimization suite for bank branches covering TATs, footfall, sales targets, and transaction trends. Integrated dynamic staff rostering based on predictive analytics using real-time traffic data. Delivered a dashboard with heatmaps and regional comparisons to drive operational decisions. Deployed the platform across 100+ branches, reducing peak-time queue lengths by 35%. Built using a microservices architecture with asynchronous messaging and AWS deployment.

Responsibilities:

- Responsible for analysis of requirements and task breakdown using Jira.
- Responsible for assigned the Tasks and Reporting the client.
- Responsible for analyzing and coding the requirement.
- Responsible for Deployment (DEV, QA, PROD).
- Responsible for code Review and code cleanup Review and PR accepted.
- Worked on defects and stories related to the requirements assigned to me.
- Done POC on Junit for REST API calls and REST API with Android Integration.
- Responsible for testing the code with positive and negative test cases once the requirement development is Done.

Project#2	:	**Yard Management System**
Customer	:	Wegmans, USA
Role	:	Developer
Duration	:	June-2024 to till now
Technology	:	Java, Hibernate, Spring Boot, MySQL, Data JPA, Microservices, Java8, React.js.

Description: The objective of this project is to develop a web portal to support customers to have a clear visibility of the equipment's which are coming in and going out of the yard. The PANASONIC which is the parent organization of Blue Yonder will have the control of all the cameras those are fixed at the entry and the exit gate of the yard. Through the data captured by the cameras customers will have clear idea of equipment's that are coming in and those are already inside the yard. Through this portal customers can have clear track record of each and every vehicle visited the yard. Also trucks can enter into the yard without any delay at the entry and exit gates.

Responsibilities:

- Followed Agile Software Development with Scrum methodology.
- Involving in project modules design and implementation.
- Actively participated in team meetings and status calls.
- Involved in Analysis, Design, Coding, and testing phases of the project management.
- Engaged in development of new features, bug fixes and deployment.
- Written test cases using Junit and Mockito.
- Involved in writing user defined exceptions.
- Developed GUI for the project requirement using React JS.
- Integrated external authenticated Rest API using Rest Template.
- Developed GUI for the entire project requirement.
- Take care of Coding and unit testing activities for all the functionalities.
- Involved in HLD, DDD and Unit test logs for all the java code and documented in the Lowes KR portal.

Project#3	: **CRAS (Credit Risk Analysis System)**
Client	: Firsttennessee Bank, USA
Role	: Developer
Duration	: Dec- 2024 to till now
Technology	: Java, Spring, Hibernate, Spring Boot, Oracle, AWS, Spring Batch.

Description: The objective of this project is to develop a web portal to support Bank of Montreal operations. The solution is a muti-bank platform, since it has started with Bank of Montreal and Royal Bank of Canada but it can be offered for other banks in Canada. The BMO AFS Solutions provides control, audit and reporting functions for dealer Floor Plan and Leasing portfolios. The BMO AFS Solution also Process dealer invoice transactions and facilitates their respective payments via EDI.

Responsibilities:

- Developed microservices using Spring Boot for real-time tracking of branch KPIs.
- Integrated Apache Kafka for asynchronous traffic data processing and notification queues.
- Automated CI/CD pipeline with Jenkins and Docker, reducing manual deployment errors.
- Implemented Redis caching for faster read access to frequently queried data.
- Deployed scalable services on AWS EC2 and configured PostgreSQL via RDS.
- Built secure REST endpoints and used JWT-based Spring Security for branch admin logins.
- Created reusable Swagger documentation for 15+ APIs to aid frontend and mobile integration.
- Wrote JUnit tests for all service classes ensuring stable delivery and 92% test coverage.
- Collaborated with Agile teams to deliver modules in 2-week sprint cycles.

Academic Details

Graduated with a Bachelor of Engineering in Electronics and Communication from **S J C Institute of Technology**, Chickaballapura.
