Working Experience: 9th Aug 2021 – 5th Mar 2025

Responsibilities:

- Hands on experience with validation testing techniques applied in Web app validation and Mobile app Validation.
- Expertise in applying different techniques like Black box, Test Estimation, Release Coverage.
- Extensive working experience in Test documentation like Test Plan, Test Scenario, Test Data, Test execution report including Test Case creation, Bug report and Defect Handling (severity Vs priority).
- Conducted end-to-end testing on Web applications.
- Performed **API** Testing with **POSTMAN.**
- Database testing, performed CRUD operation queries in **MySQL** (Clauses, Aggregation and basic joins).
- Good exposure in Exploratory Testing.
- Agile ceremonies Sprint planning, Daily stand up, Sprint review, Sprint retrospectives and Backlog grooming.
- Executed manual testing including Functional, Regression, Retest, System, Sanity & Smoke Testing.
- Raised and tracked defects in **JIRA,** ensuring timely resolution and proper documentation.
- Skilled in log analysis, issue tracking, and troubleshooting with dev collaboration.
- Worked closely with developers and business analysts to refine requirements and resolve issues.
- Leading a team of 4 QA members, ensuring effective planning, execution, exploratory and on-time delivery of test cycles while applying appropriate testing techniques based on project context.
- Performed data validation and ensured synchronization between Pimcore and third-party systems (e.g., ERP, CRM).
- Carried out cross-browser and responsive testing to ensure consistent UI/UX across platforms.
- Worked with developers, business analysts, and product owners to clarify requirements and support sprint deliverables.
- Provided production validation support and UAT coordination for releases.
- Tested B2B features like bulk order upload, quote generation, customer-specific pricing, and approval workflows.
- Developed test cases**,** technical document, and created user manuals for client usage.
- Prepared Sprint Demos and presented to the Clients.

Skill Area	
Software Skills	Manual testing, API Testing, SQL Queries, Mobile application Testing, Basic Automation (Selenium), Android OS, Log Analysis, Linux, PIMCORE, PIM, CMS, DAM.
Tools	Postman, MySQL, Appium, Selenium Webdriver, Power BI, Command Prompt, Eclipse, Log capturing tool, Qualcomm/Spreadtrum/ MTK software Flashing Tool, Spreadtrum / MTK IMEI Writing Tool.
Methodologies	Agile, Scrum, SDLC, STLC, Waterfall
Test Management Tool	JIRA, X-ray, Confluence, TestRail, Mantis, Redmine.
Testing Expertise	Functional, Regression, Smoke, Sanity, API, E2E, Web/Mobile application Testing, Exploratory
Data Handling	Data Migration, Excel, CSV Files, Document Validation, Metrices
Operating System	Windows, Linux, Mac

(B) Senior System Engineer- Xiaomi India Pvt. Ltd.

Working Experience: 13th May 2019 – 6th Aug 2021

Responsibilities:

- Project Management and testing.
- Quality Assurance.
- Responsible for requirement analysis; efficiently coordinating with 3 team members for test planning
- Manual Testing-Functional, Regression, Retest, system, Sanity & Smoke Testing
- Hands on exposure in API Testing.
- Good application knowledge in multimedia apps like multimedia games, Media player & Voice recorder.
- Sensor Testing, Fingerprint Sensor Testing & TP Testing.
- Bug detection, reporting, and interacting with the SW development team.
- Raising the defect & tracking them to closure.
- Capturing failure logs & sharing them with the SW development team
- Hands-on exposure across Functional, Regression, UI of different Android platform smartphones.

- Execute test cases and perform tasks related to bug tracking & reporting, and prepare test reports daily
- Handling costumer case related to software issues understand the issue & get the exact issue scenario.
- Exploratory, Functional, Regression, interrupt testing, System Testing & GMS with basic automation.
- Manual Testing, Android Software Testing, mobile Application Testing, Mobile Testing.

(C) Senior Product Engineer- Lava International Pvt. Ltd.

Working Experience: Sept 2018 - Feb 2019

Responsibilities:

- Mobile Application Testing and Manual Testing.
- Hands on exposure in API Testing
- Multimedia Testing
- Worked on Android, MTK, and Spreadtrum based projects.
- Responsible for maintaining updated reports on resolved bugs.
- Coordination with vendors for new projects.
- Create test cases according to functionality
