A Sathya

Full Stack Developer | Mobile: 9515093800 | Email: sathyaa120120@gmail.com

Objective:

Full Stack Java Developer with **4.2 years of experience** in building secure, scalable web applications using **Spring Boot, Hibernate, Microservices, Angular, and React.js**. Skilled in end-to-end development, database optimization, and cloud integration. Looking for opportunities to **apply technical expertise and deliver impactful solutions** in a dynamic organization.

Professional Summary:

- Having 4.2 Years of Experience in Application Development using JAVA/J2EE Technologies, Java8, Spring Boot and Micro services, Kafka and Rest APIs.
- Experience in usage of frameworks like Spring, Spring Boot, Spring Batch, Spring MVC.
- Hands on Experience in Micro Services Architecture.
- Experience in programming using ORM framework Hibernate.
- Good Experience on OOPs, Exception Handling, Collections.
- Good Experience on Back-End tool MySQL.
- Good Experience in front -end technologies Html, CSS, and React.js.
- Hands on Experience in AWS.
- Hands on Experience in tool, to identity and fix for the Static and Dynamic analysis issues in application.
- Experience on GIT, Log4J, Maven, Tortoise SVN, Sonar Code Coverage, Mockito testcase.
- Learning new technologies with minimal time and Team Player with excellent communication skills.
- Skilled in database design, optimization, and management, with experience in SQL databases.

Professional Experience:

- Junior Software Engineer at BMS INFOSOLUTIONS PRIVATE LIMITED from July 2021 to Oct 2025.

Education:

Vellore Institute of Technology, Vellore, India- *M.Tech Integrated Software Engineering, GPA – 7.79*.

PROJECT 1: AT&T – America Telecom and Telegraph

Project Description:

AT&T is one of the largest Telecom Company in the United States of America and has a global presence. ADOPT is an online application used by the Domestic and International Clients of AT&T which provide the Network Services according to Usage of clients. Mainly this project belongs to Sales modules for sale for AT&T Networks. The user login to the site to check details like Price, Balance, Rewards, Discounts, and Statements.

Environment:

Java 8, Spring Boot, Hibernate, Microservices, REST APIs, HTML, CSS, React.js, SQL, AWS, Kafka.

Responsibilities:

- Application development and maintenance of Telecom enterprise application
- Gathering and compiling user requirements, communicating with end-users, understanding user view and gaps that exist in the current implementation
- Brainstorming on various possible solutions and coming up with design to ensure that project deliverables are met according to specifications
- Responsible for Designing and developing software systems, using analysis and mathematical models to predict and measure outcome and consequences of design.
- Responsible for fixing bugs reported in the production environment. I have to work with the client to prioritize tickets(bugs) and work on the same
- Responsible for identifying the issues in early stages of coding and fixing it.
- Resolving post go-live issues, monitoring and reporting.
- To help validate, verify, communicate, and resolve application issues through careful testing in order to maximize the benefit of IT investments and initiatives.

PROJECT 2: Elevance Health

Project Description:

Elevance Health is a leading health insurance provider focused on improving lives and communities. As a Java Developer, I contributed to building scalable healthcare applications, integrating APIs, and enhancing backend systems to support claims processing, member services, and digital health platforms in a secure, high-performance environment.

Environment:

Java 8, Spring Boot, Hibernate, Microservices, REST APIs, HTML, CSS, React.js, MySQL, AWS, Kafka.

Responsibilities:

- Delivered & implemented the project as per scheduled deadlines, extended post-implementation, and maintenance support; provided training to end-users.
- Communicated project status, issues & risks to management at defined schedules.
- Conducted onsite - offshore coordination; monitored & tracked project progress.
