Kamna Singh

6363058506 | kamna.125singh@gmail.com | Linkedin

Professional Summary

- 6.10+ years of experience in development with a strong focus on TypeScipt, JavaScript, Node.js, and React.js. Optimized AWS Lambda functions for performance and cost, and integrated services with SQL databases.
- Designed and deployed scalable microservices and RESTful APIs on AWS using Lambda, API Gateway, S3, CloudWatch, and Step Functions.
- Skilled in frontend technologies: React, HTML5, CSS3, LESS/SASS
- Experience with TDD using Jest and Mocha, and CI/CD using Jenkins, GitHub Actions, and Docker
- Developed infrastructure as code (IaC) using Terraform and AWS CDK, AWS Cloud Formation for efficient cloud resource management.
- Implemented CI/CD pipelines with Jenkins, Docker, and Git; improved deployment efficiency and reliability
- **Certified AWS Developer Associate** with a strong focus on cloud-native design, performance optimization, and security best practices.

Technical Skills

Languages: Java, Springboot, JavaScript, Node JS, Typescript, React, HTML5, CSS3, LESS/SASS
Backend-Frameworks: Express.js, Hapi.js, RESTful APIs, Microservices
Infrastructure as Code:: Terraform, CDK for Terraform (CDKTF), AWS CDK, CloudFormation Languages: TypeScript, JavaScript, Node.js, Python
AWS: AWS-LAMBDA, IAM, API Gateway, Cloudwatch, Step function, KMS, VPC, Event Bridge, Terraform, Cloud formation, IAC, AWS CDK
Databases:MongoDB, SQL, Oracle (basic)
Frontend: React.js, HTML5, CSS3, Bootstrap, Responsive UI
Developer Tools: Git, Docker, CI-CD, GitHub Actions, VS Code, Visual Studio,MIRO, Azure
Test -Libraries: Jest, Mocha-Chai, TDD

Work Experience

Capgemini | *Senior Software Engineer* Feb 2023 – Present

- Engineered scalable APIs using Node.js, integrated with AWS KMS, EventBridge, and X-Ray for secure cloud operations.
- Contributed to full-stack features using React and participated in CI/CD pipelines with Docker and Jenkins.
- Built and deployed serverless applications using AWS Lambda, API Gateway, Step Functions, S3, and Cloud Watch.
- Automated infrastructure using AWS CDK and Terraform; wrote unit tests with Jest and Mocha

Deloitte USI | *Software Engineer* Jan 2022 – Feb 2023

- Implemented Spring Boot-based backend services in a microservices architecture, using Hibernate/JPA with SQL databases.
- Designed and deployed event-driven applications combining Java (Spring Boot) with AWS EventBridge, SQS, and SNS.
- Built and deployed serverless applications using AWS Lambda, API Gateway, Step Functions, S3, and CloudWatch. Automated infrastructure using AWS CDK and Terraform; wrote unit tests with Jest and Mocha.

Accenture Technology | *Software Engineer* Dec 2018 – Dec 2021

- Built and deployed serverless applications using AWS Lambda, API Gateway, Step Functions, S3, and CloudWatch. Automated infrastructure using AWS CDK and Terraform; wrote unit tests with Jest and Mocha.

Projects

Financial Cloud Management Platform | *Terraform ,Type Script, AWS* May 2018– Feb 2020

- Automated infrastructure using CDK for Terraform (CDKTF) and AWS CDK, reducing provisioning time and improving maintainability. • Developed reusable IaC components using TypeScript with CDKTF to provision Lambda, API Gateway, and Step Functions
- Developed a web-based platform enabling real-time monitoring and control of AWS cloud infrastructure for enterprise clients.
- Built backend services using Node.js, JavaScript, Hapi.js, and TypeScript, implementing RESTful APIs and microservices.
- Integrated core AWS services: Lambda, API Gateway, Step Functions, S3, KMS, IAM, EventBridge, AWS Backup, CloudWatch, and X-Ray for secure, scalable, and serverless application delivery.
- Automated infrastructure using Terraform and AWS CDK, improving deployment efficiency and reducing manual overhead.
- Developed responsive frontend modules using React, HTML, CSS, and Bootstrap for admin dashboards.
- Implemented automated testing with Jest, Mocha, and Lab-Code, improving code reliability and maintainability.

Government Biometric Migration Service | *Java,Spring boot, AWS* May 2020 – April 2023

- Designed Spring Boot APIs for biometric request validation, data encryption, and integration with AWS KMS.
- Wrote modular backend components using Type Script and tested workflows with Jest and Lab-Code
- Wrote modular backend components using Typescript and tested workflows with Jest and Lab-Code

Financial Compliance & Cloud Visibility Portal | *Node JS, AWS, Typescript, React* May 2023 – Present

- Developed backend microservices using Node.js, Express.js, and TypeScript to manage user access, policy validation, and cloud resource tracking.
- Designed and exposed Restful API to integrate with AWS accounts and external financial reporting tools, ensuring seamless data synchronization.
- Used AWS services including Lambda, API Gateway, S3, Event Bridge, KMS, and Cloud Watch for secure, serverless backend operations.

Education

Chhattisgarh Swami Vivekananda Technical University Raigarh, CG

Bachelor of Engineering in Computer Science *2014 – 2018*
