Subin Sunil Kumar

Bangalore, Karnataka, India subinsunilkumartech@gmail.com +91 6238297242 in/subinsunilkumar

SUMMARY

Senior Full Stack Developer with extensive experience in designing, developing, and deploying scalable web applications. Skilled in front-end and back-end technologies, agile methodologies, and cross-functional collaboration. Proven track record of delivering high-performance, user-focused software solutions that enhance efficiency, scalability, and overall user experience. Committed to innovation, problem-solving, and continuous professional growth.

EXPERIENCE

Senior Full Stack Software Developer

TEKsystems Global — February 2025 - Present, Bangalore

- Developed and deployed scalable end-to-end full stack web solutions using .NET 8, Python, Angular 17, and React 19.
- Architected and implemented RESTful APIs and backend microservices for secure data handling and business logic orchestration (Python, .NET 8).
- Built efficient and reusable UI components, dashboards, and interactive data visualizations using Angular 17, React 19, and TypeScript 5, delivering responsive, cross-device user experiences.
- Led cloud-native deployments leveraging Azure Cosmos DB, Blob/Table Storage, Azure Functions, and SignalR; established event-driven and serverless architectures for real-time use cases.
- Managed end-to-end CI/CD pipelines via Azure DevOps, automating testing, containerization (Docker), and safe rollout with gated deployments.
- Optimized SQL Server 2022 and NoSQL (Cosmos DB) environments for low-latency analytics; enhanced query efficiency via indexing, partitioning, and caching strategies.
- Drove integration and API modernization by transforming monolithic systems to microservices in Azure App Services; led service decomposition for scalable operations.
- Implemented secure authentication and OAuth2/Azure AD policies, enhancing authorization standards and data privacy compliance.
- Applied cost-reduction strategies for cloud storage (auto-tiering, lifecycle policies); realized up to 25% reduction in operational expenses.
- Partnered cross-functionally with DevOps and business stakeholders to ensure seamless integration, user adoption, and agile delivery.
- Contributed to Agile ceremonies, technical estimations, and rigorous code reviews; maintained release quality and delivery consistency across distributed teams.
- Mentored and upskilled junior engineers; shared full stack expertise, improving team productivity and velocity by 15%.

Senior Full Stack Software Developer

Siemens Healthineers — July 2022 - February 2025, Bangalore, India

- Led the end-to-end design, development, and deployment of Angular 14–16, .NET 6–8, and Python enterprise-grade applications, ensuring high performance, scalability, and HIPAA-compliant security.
- Built and consumed RESTful APIs in .NET for seamless client-server communication and integrated them with React 17–18 and Angular frontends.
- Architected scalable SQL Server 2022 and Azure data solutions to manage large-scale, high-velocity clinical and research datasets.
- Enabled cloud-native deployment of applications using Azure App Services, Azure Functions, Blob Storage, and Container Instances, aligning with healthcare IT infrastructure standards.
- Developed interactive, data-rich dashboards using Angular, React, and TypeScript, delivering real-time analytics to healthcare professionals.
- Automated full CI/CD workflows for applications using Azure DevOps, with gated releases, environment-based deployments, and containerization via Docker.
- Applied FHIR (Fast Healthcare Interoperability Resources) standards to ensure secure, structured, and interoperable patient data exchange.
- Improved system observability and security by enforcing role-based access control and audit trail compliance.
- Mentored junior developers and interns in Angular, React, and .NET best practices, significantly reducing ramp-up time and increasing overall delivery velocity.
- Participated in Agile ceremonies and technical planning; ensured clean code, modular architecture, and adherence to scalable software design principles (SOLID, DRY, modularity).

Full Stack Software Engineer

IPETRONIK INDIA PVT LTD — March 2020 - July 2022, Bangalore, India

- Developed, deployed, and maintained secure, high-performance web applications using Angular 10–12, .NET 5–6, React 16–17, and Azure, delivering scalable business and engineering solutions across multiple sectors.
- Designed and consumed RESTful APIs in .NET 6 for client-server data flow, integrated with both Angular and React frontends for real-time UI updates.
- Built modular, layered architectures adhering to clean architecture principles (SOLID, DRY), enabling fast delivery cycles and extensibility for future integrations.
- Implemented CI/CD pipelines via Azure DevOps and Docker for consistent build/test/deploy workflows, achieving 99.9% uptime and near-zero rollback rates across 15+ production releases.

- Optimized SQL Server 2019 for handling 1M+ records and 10+ TB of data using advanced indexing, horizontal partitioning, caching, and stored procedure tuning.
- Mentored peers and junior developers on full stack technologies and software architecture, increasing team autonomy and reducing onboarding time by 20%.
- Led architectural planning and delivery execution across projects, shortening delivery timelines by 15% through design-first implementation and reusable component strategies.
- Conducted root cause analysis and architectural code reviews, resolving over 170+ bugs and technical debts, leading to a 30% boost in system stability and code quality.
- Managed sprint execution and UAT/test case alignment, resulting in 95% on-time milestone completion under rapid iteration cycles.
- Coordinated with QA teams to implement regression and unit testing (Karma/Jasmine), reducing post-release production issues by 20%.

Software Developer Intern

Instavans Logistics Pvt Ltd June 2019 - March 2020, Bangalore, India

- Proficient in Angular 12, .NET 6, Azure, and SQL Server 2019, specializing in building secure, high-performance web applications.
- Developed and delivered applications using .NET Core 3.1, Angular 9, and SQL Server 2019 across both web and desktop platforms.
- Successfully deployed 5 web applications and 2 Windows apps using .NET and SQL Server, resulting in a 20% increase in client operational efficiency.
- Analyzed and prioritized over 50 user stories, streamlining the development process and reducing cycle time by 15%.
- Engineered robust backend services in .NET and SQL Server 2019, achieving a 25% improvement in data processing speed.
- Integrated client-driven features across frontend and backend components to better align with user needs, boosting customer satisfaction by 30%.
- Developed automated testing suites using NUnit and Jasmine, increasing test coverage and reducing post-deployment defects by 18%.
- Implemented continuous integration and delivery pipelines in Azure DevOps, accelerating feature rollouts and enhancing collaboration between development and operations teams.

SKILLS

Hard Skills:

C#, .NET, Python, Angular, React, TypeScript, React 19, Node.js, VBScript, HTML5, CSS3, JavaScript, JSON, XML, SQL, Transact-SQL (T-SQL), SQL Server, SQL Server Management Studio (SSMS), Relational Database Management Systems (RDBMS), Azure Cosmos DB, PyTest, NUnit, xUnit, MSTest, Python Unit Testing, Boost Unit Test Framework, Microsoft Azure (App Services, Azure Functions, Azure DevOps, Azure SQL, Cosmos DB, Azure Active Directory), Amazon Web Services (AWS), Google Cloud Platform (GCP), AWS Lambda, Docker, Kubernetes (K8s), Podman, Docker Compose, Docker Swarm, CI/CD Pipelines, Azure DevOps Pipelines, GitHub Actions, Jenkins, YAML Pipelines, Infrastructure as Code (IaC), Power BI, SQL Reporting Services (SSRS), Data Analysis Expressions (DAX), RESTful APIs, Web API, OpenAPI (Swagger), Microservices, Domain-Driven Design (DDD), Clean Architecture, SOLID Principles, Agile (Scrum/Kanban), Test-Driven Development (TDD), Behavior-Driven Development (BDD), Object-Oriented Programming (OOP), OAuth2, OpenID Connect, JWT, RBAC, PKI, IdentityServer, HTTPS, Encryption, Windows, Linux (RHEL, Fedora, Debian, Ubuntu), Git, GitHub, GitLab, Azure Repos, TortoiseSVN, Atlassian Jira, Polarion ALM, Visual Studio, VS Code, PyCharm, JetBrains Rider, ReSharper, Postman, Fiddler, IaaS, PaaS, SaaS

Soft Skills:

Leadership & Team Management, Critical Thinking & Problem Solving, Mentorship & Coaching, Adaptability & Resilience, Effective Communication & Active Listening, Cross-functional Collaboration, Emotional Intelligence & Empathy, Conflict Resolution & Negotiation, Time Management & Attention to Detail, Creativity & Decision Making, Interpersonal Skills, Strong Work Ethic

PROJECTS

ECOLAB3D IIOT Platform: Intelligent Water Performance Insights

TEKsystems Global

- Engineered a robust IIoT platform for intelligent water management, integrating real-time data acquisition and advanced analytics to support operational excellence in industrial settings.
- Delivered full-stack solutions using Angular 16 dashboards and .NET 8 microservices, optimizing real-time visualization and interactive analytics for millions of variable-unit sensor data points.
- Implemented secure, high-availability storage architectures with Azure Cosmos DB and SQL Server 2022, ensuring 99.9% data reliability and compliance with enterprise standards.
- Enhanced user productivity by 25% through intuitive UI/UX, role-based access, and real-time asset monitoring tools - including attendance and operational tracking for assets and workflows.
- Built advanced data visualization and reporting features, facilitating actionable insights and personalized learning modules for plant operators and operations managers.
- Automated deployment pipelines (CI/CD) using Azure DevOps, which cut release cycle times by 15% and improved update robustness.
- Established variable-unit mappings and dynamic data retrieval APIs, enabling flexible handling of diverse sensor streams and accurate, contextualized analytics.
- Applied comprehensive unit and integration testing (NUnit) to improve system stability and reduce post-release defects by 40%.

Prostate Cancer Treatment Support

Siemens Healthineers • January 2023 – February 2025

- Built an advanced Multi-Disciplinary Team (MDT) platform with a customizable, full-screen Angular 16 dashboard and .NET 8 backend to streamline clinical workflows.
- Managed over 500,000 patient records securely, ensuring 99.9% uptime and compliance with data protection standards.
- Delivered real-time visualization features that improved task completion and clinical decision-making accuracy by over 30%.
- Implemented robust role-based access control (RBAC) and audit logging to strengthen compliance and safeguard sensitive healthcare data.
- Automated CI/CD pipelines with Azure DevOps, reducing deployment effort by 20% and ensuring faster, more reliable feature rollouts.
- Enhanced usability through intuitive UI/UX design, improving platform adoption rates among clinicians and administrative staff.
- Optimized database queries and indexing strategies in SQL Server, reducing average response times by 40% and improving system scalability for high-volume healthcare operations.
- Integrated interoperability standards (FHIR/HL7) to enable seamless data exchange with third-party EHR systems, enhancing cross-system collaboration and patient care continuity.
- Led cross-functional sprint planning and code review sessions, fostering agile best practices that accelerated delivery cycles while maintaining high code quality.

Clinical Decision Support for Cardiac Chest Pain Patient Management

Siemens Healthineers • August 2022 – February 2025

- Led implementation of a multicenter trial platform with Angular/React and .NET 8 solutions, supporting more than 100,000 daily healthcare transactions.
- Automated delivery and testing pipelines for applications, reducing release cycles and improving deployment stability.
- Successfully integrated FHIR-compliant data exchange, increasing system interoperability and ensuring secure data sharing.
- Built scalable message queuing and event-driven architectures with Azure Functions to support real-time patient data processing.
- Optimized SQL Server 2022 performance for high-volume clinical data, achieving a 30% improvement in query response times.
- Designed intuitive, role-based dashboards for healthcare professionals, improving workflow efficiency and reducing time-to-decision.
- Implemented comprehensive unit and integration testing, cutting post-release defects by 25% and improving overall system stability.
- Developed advanced monitoring and alerting systems with Azure Application Insights and Log Analytics, enabling proactive issue detection and reducing downtime incidents.
- Coordinated cross-functional collaboration between clinicians, developers, and DevOps teams, ensuring alignment of technical solutions with healthcare operational needs.
- Migrated legacy .NET Framework applications to .NET 8 microservices, enhancing maintainability, scalability, and long-term system resilience.

NF1 Readout Station

IPETRONIK INDIA PVT LTD • October 2020 - July 2022

- Managed secure SFTP data transfer and visualization for a high-volume project, flagging irregular patterns in incoming sensor streams from external sources.
- Designed a high-performance data transfer and processing pipeline with .NET 6 and Azure, reducing transfer time by 25% for large-scale input from drive bays and USB sources.
- Built a scalable Angular 12 visualization portal supporting 500,000+ data points and minimal latency for real-time diagnostics.
- Leveraged SQL Server 2019 for large (10+ TB) datasets, optimizing complex queries and achieving a 30% speedup for analytical operations.
- Developed a multi-threaded .NET 6 backend for parallel data processing, increasing data throughput by 40%.
- Implemented end-to-end encryption and granular access controls to ensure compliance with security standards while handling sensitive sensor and diagnostic data.
- Integrated automated anomaly detection algorithms into the pipeline, enabling proactive identification of irregular sensor behaviors and reducing manual review effort.
- Deployed containerized services with Docker and Kubernetes, improving scalability and fault tolerance for high-volume data ingestion and processing.

Ensured secure, compliant SFTP integration for handling sensitive datasets, achieving <1% downtime and continuous availability.

ZIPRT File Visualizer

IPETRONIK INDIA PVT LTD • March 2020 - October 2020

- Developed and optimized a scalable data pipeline for ZIPRT file processing with Angular 12 and .NET 6, enabling faster and more efficient data interpretation.
- Used .NET 6 to boost data transformation speed by 30% for cloud-based repositories.
- Created interactive data visualizations - Map, Histogram, Y-T Diagram, Scatter Chart, and 3D Models - enhancing analytical insights by 25%.
- Improved backend performance utilizing C# for handling large-scale datasets, reducing data transformation time by 40%.
- Used SQL Server 2019 to efficiently process and query large volumes of structured data.
- Streamlined ZIPRT file storage/retrieval, reducing storage latency by 35% and bolstering scalability for future demands.
- Collaborated with multiple frontend teams to enable seamless API integration, ensuring end-to-end data flow across the platform.
- Enhanced deployment agility and release efficiency by 20% through optimized coordination of application components.
- Implemented robust error-handling and data validation mechanisms, ensuring accuracy and reliability in large-scale ZIPRT file processing workflows.
- Automated ETL pipelines with Azure Data Factory, reducing manual intervention and accelerating data onboarding for analytical use cases.
- Designed modular, reusable Angular components for visualization, improving maintainability and reducing development effort for future enhancements.

EDUCATION

Computer Engineering and Cloud Computing

NTTF, Bangalore, India - 2020
Score: 98% | CGPA: 9.8

12th - Biology-Science
St. Michael's Anglo-Indian Higher Secondary School, India - 2017
Score: 94.7% | CGPA: 9.47

10th
St. Michael's Anglo-Indian Higher Secondary School, India - 2014
Score: 98% | CGPA: 9.8

INVOLVEMENT

Campus Ambassador
NTTF • FnPlus • January 2019 - March 2020
- Developed and facilitated hands-on bootcamp training sessions, resulting in higher participant engagement and retention rates.
- Collaborated with industry experts to tailor bootcamp curricula to meet current employer expectations and real-world applications.
- Leveraged AWS services (Lambda, EC2, S3) to enhance Node.js application security, scalability, and cost-effectiveness.
- Implemented robust user authentication and access control systems, ensuring heightened security and compliance with data privacy standards.
- Guided student teams in Agile-driven tech projects, boosting project delivery consistency and promoting effective team collaboration.
- Coordinated and led technical talks, peer programming sessions, and hackathons to foster a culture of knowledge sharing and innovation.

Student Volunteer
St. Michaels A.I.H.S.S • NATIONAL CADET CORPS - India • June 2012 - May 2014
- Led three comprehensive training camps focused on cultivating leadership skills and team cohesion among students.
- Increased participant engagement and collaboration by 20% through structured activities and regular feedback initiatives.
- Organized five large-scale community events and school parades, strengthening both school spirit and broader community engagement.
- Achieved a 30% rise in event participation through strategic outreach and meticulous event planning.
- Pioneered mentorship programs and structured training for junior cadets, equipping them with essential, future-ready skills.
- Facilitated targeted development sessions, driving a 25% improvement in cadet performance and strategic preparedness.

CERTIFICATIONS

Cisco, Google Cloud Platform, Amazon Web Services, Microsoft Azure, Intel Corporation, Azure, Qwiklabs, Coursera – 2021
Completed extensive certifications and training in Full-Stack Development and Cloud Computing. Key accomplishments include AWS Solutions Architect – Professional, AWS Certified Developer – Associate, Google Cloud Associate Cloud Engineer, Microsoft Certified: Azure Solutions Architect Expert, Azure DevOps Engineer Expert, AWS Educate badges (Cloud Support Associate, Cloud Support Engineer), and Intel IIOT Certificate. Full-Stack certifications include MERN Stack Mastery, Full-Stack Web Development with React, Python and Django Full Stack, Node.js, Express, and Responsive Web Design. Developed strong skills in serverless computing and DevOps through training in AWS Lambda, Azure Functions, Docker, Kubernetes, CI/CD pipelines, Terraform, CloudFormation, and infrastructure management on AWS.
Also completed certifications in BigQuery, serverless web apps with DynamoDB, security fundamentals, Cisco Cybersecurity Essentials, IAM, PKI, and networking. Combined, these programs demonstrate end-to-end capabilities across application development, cloud deployment, and secure, scalable full-stack architecture.
