Rishab Mishra

Enterprise Architect | Strategic Planning | Data Architecture

TOGAF certified Enterprise Architect with 7+ years in enterprise architecture , strategic planning , and technology governance. Proven track record designing solutions, blueprints, architectural patterns, and reference architectures while implementing complex, scalable enterprise systems. Proficient in establishing architecture standards, governance frameworks, enterprise data architecture, and Data Vault 2.0. Skilled at creating technology roadmaps that align IT with business strategy. Strategic leader driving digital transformation through target state architectures while maintaining operational excellence at tactical levels.

SKILLS

- Enterprise Architecture
- Strategy planning and consulting
- Architecture design and Blueprint
- Data Governance
- Data Management
- Technology Governance
- Stakeholder Management
- Requirements gathering & analysis

TECHNICAL SKILLS

EA framework	TOGAF, Zachman
Cloud	Azure, BMC, GCP
Virtualization	VMware, OVM, RedHat, Nutanix
Big Data	Google BigQuery, MapR
Data Platforms	Microsoft SQL Server, MySQL, Oracle, MongoDB, PostgreSQL, Terracotta, Redis, Apache Ignite, Enterprise Data warehouse, Dataplex, Nutanix NDB, Kafka
Tools & Technology	MSCRM 4.0\2011\2015, IIS, Active Directory, MS PDW, SSRS, SSAS, SSIS, SCCM, WAUS, Bitlocker, Azure data sync, Azure MFA, vROps, RVTools, PlateSpin, MAP Toolkit, BMC Discovery, CommVault, Doubletake, SNOW, Evault, Perfmon, PSS Diag, PAL, SQL Nexus, Debug Diag, AVIATRIX, MEGA Hopex, ARCHI, Ardoq, IDERA diagnostic manager, SCOM, Manage engine

CERTIFICATES

The Open Group Certified: TOGAF® 9 Certified (09/2020 - Present)
https://www.youracclaim.com/badges/03b7f007-ee7f-4f30-a7f9-26d91dca15f8/public_url

Aviatrix Certified Engineer: Multi-Cloud Networking Associate (09/2020 - Present)
https://www.youracclaim.com/badges/95252108-c759-4e09-b5fa-e7576ea8add6/public_url

AZ-300 : Microsoft Azure Architect Technologies (04/2019 - Present)

WORK EXPERIENCE

Technology Architect
IG Infotech(India) Pvt. Ltd. (IG Group)

08/2021 - Present *Bengaluru, India*

Achievements/Tasks

- Design enterprise data models for GCP Data Lakehouse using Data Vault 2.0 methodology aligned with medallion architecture, enabling creation of data products with seamless integration across multiple business domains while maintaining data lineage, data governance, and data quality standards for real-time trading platforms.
- Create 3-year strategic roadmaps and blueprints that align current and future state architectures with business objectives, developing data patterns, technology standards, and reference architectures to support strategic initiatives and digital transformation.
- Lead monolithic decomposition strategy by using microservices architecture, domain-driven design patterns, and strangler fig approach to incrementally transform legacy monolithic systems into cloud-native, event-driven architectures while ensuring zero business disruption.
- Established technology governance framework by defining data lifecycle processes, architecture decision records (ADRs), and Key Design Decisions (KDDs) by evaluating technology stack viability and proposing alternatives through comprehensive assessments.
- Led architecture workshops and facilitate collaboration between stakeholders to develop enterprise data strategy, ensuring adherence to architectural principles and domain architectures, and slashing data silos by 40%.

Architect
HCL Infosystems Ltd.

06/2019 - 06/2021 *Bengaluru, India*

Client - Unique Identification Authority of India, Government of India.(world's largest bio-metric project)

Achievements/Tasks

- Owned enterprise data architecture for SQL and NoSQL databases supporting 1.3 billion+ biometric records while creating conceptual, logical, and physical data models with comprehensive data governance framework and documenting solution architectures to ensure data lineage, data quality, and compliance standards.
- Collaborated in architecture governance through regular Architecture Review Boards by providing architecture assessments and insights on current state vs target state alignment while creating architecture decision records and traceability matrices linking government strategies to technology implementations.
- Designed architecture blueprints for CRM application transformation through developing reference architectures, integration patterns, and technology roadmaps along with solution designs for cross-functional requirements impacting 50,000+ users across the government platforms.
- Led architecture transformation initiatives for database migrations between distributions by defining migration patterns, data architecture standards, and build vs buy strategies while mentoring technical teams on architecture principles and best practices.
- Developed proof-of-concepts for critical enterprise services and built comprehensive business cases with ROI analysis, cost-benefit assessments, and efficiency metrics to translate strategic objectives into actionable architecture roadmaps and implementation plans.

Consultant
Gibraltar Technologies LLC (Formerly HCL Infosystems LLC)

05/2017 - 03/2019 *Abu Dhabi, UAE*

Client - Daman health insurance, Government of UAE

Achievements/Tasks

- Conducted comprehensive AS-IS architecture assessments of IT landscape, creating detailed current state architecture documentation and gap analysis for datacenter modernization and digital transformation initiatives.
- Architected data center migration strategy for transformation to new Tier-3 data center, designing migration patterns, cutover procedures, and zero-downtime architecture alongwith optimized infrastructure footprint and reduced licensing costs through workload consolidation and virtualization strategies.
- Devised disaster recovery architecture and business continuity framework across dual data centers, creating automated failover mechanisms and replication strategies that exceeded RPO/RTO requirements by 15%.
- Led stakeholder engagement across business and IT teams including C-suite executives, facilitating architecture workshops, requirements gathering sessions, and governance reviews; presented technology roadmaps, business cases, and architecture decisions to senior leadership ensuring buy-in and alignment with strategic objectives.

WORK EXPERIENCE

Assistant Manager - Datacentre Operations
HCL Infosystems Ltd.

05/2016 - 04/2017 *Bengaluru, India*

Client - Unique Identification Authority of India, Government of India.(world's largest bio-metric project)

Achievements/Tasks

- Orchestrated mission-critical operations for 105 RDBMS databases (200TB), 1500+ Windows servers, and 25+ Microsoft platform applications, ensuring 99.9% uptime through automated monitoring, automation, and incident management.
- Architected and implemented disaster recovery strategy, establishing business continuity with zero-data-loss objectives while optimizing infrastructure costs through server consolidation and virtualization.
- Spearheaded enterprise-wide Active Directory deployment across 2 data centers and 12 branches, integrating with BMC Remedy, Archer, and Cisco VPN while establishing identity management and access control frameworks.
- Ensured regulatory compliance with government security standards and audit requirements through comprehensive governance frameworks, maintaining detailed documentation and direct stakeholder engagement with senior government officials.

Senior Database Administrator
Pramati Technologies Pvt. Ltd.

07/2014 - 04/2016 *Bengaluru, India*

Client - Arthur J. Gallagher & Co.

Achievements/Tasks

- Led technical team supporting 2000+ database servers (5GB to 10TB), managing MSSQL Database Engine, SSIS, SSAS, SSRS, DQS, MS PDW, PostgreSQL, MySQL, and MongoDB platforms.
- Established DR site using Doubletake file replication, automated daily health checks via SSRS and PowerShell scripts, and administered complex transaction replication setup (8TB subscriber) between on-premise and Azure cloud infrastructure.

Senior Database Administrator
HCL Infosystems Ltd.

08/2013 - 06/2014 *Bengaluru, India*

Client - Unique Identification Authority of India, Government of India.(world's largest bio-metric project)

Achievements/Tasks

- Engineered production support for large-scale MSSQL databases (up to 30 TB) while implementing high availability solutions using clustering, log shipping, database mirroring, and Microsoft load balancing for mission-critical systems.
- Performed end-user administration tasks, delivered first-line support, and troubleshot complex issues across the Microsoft platform ensuring optimal performance and availability.

Database Administrator
Pramati Technologies P. Ltd.

01/2013 - 07/2013 *Bengaluru, India*

Client - Arthur J. Gallagher & Co.

Achievements/Tasks

- Managed 350+ SQL Server databases through multiple product lifecycle environments from development to production, implementing high availability solutions, monitoring system health, and maintaining backup/recovery procedures.
- Executed change management processes for production deployments while maintaining environment integrity, documenting all changes, and ensuring compliance with change approval protocols.

Software Engineer
Wipro Ltd.

08/2010 - 12/2012 *Bengaluru, India*

Client - Wipro Ltd - CIO operations

Achievements/Tasks

- Managed end-to-end Microsoft Dynamics CRM solution including critical upgrades, deployment, migration, and high availability configuration, while serving as system administrator lead troubleshooting IIS, MSCRM, and MSSQL issues.
- Published daily health-check reports to stakeholder groups, monitored and resolved identified issues ensuring timely resolution, and maintained consistent response to problem resolution and customer requests.

EDUCATION

Bachelor of Technology (Compter Science)

Meerut Institute of Engineering and Technology (GBTU)

08/2006 - 07/2010 *Meerut, Uttar Pradesh, India*
