Lokesh GP
+91 9844540542 | lokeshgp13@gmail.com | Bengaluru, India

Professional Summary

Tech-driven software professional with **8+ years of experience** in architecting and developing **cloud-native, IoT-integrated applications**. Proven expertise in designing **microservices**, **real-time communication systems**, and **device-to-cloud (AWS) workflows** using **Java**, **Spring Boot**, **REST APIs**, and **PostgreSQL**. Adept at leading solution design for healthcare and logistics platforms, integrating MQTT and BLE protocols, and building DevOps-enabled CI/CD pipelines. Collaborative team lead with a strong focus on scalable architecture, system performance, and product quality.

Core Skills

Programming Languages	Java, Kotlin, PHP.
Messaging & Streaming	Kafka, MQTT.
Cloud Technologies	AWS, SaaS, IaaS.
Backend	Spring Boot, RESTful APIs, Firebase.
Architecture	Microservices, Modular Design, API Design & Security.
IoT & Protocols	BLE, MQTT (Eclipse PAHO), Device SDK Integration.
Frontend (Basic)	Angular (familiar), ReactJS, HTML/CSS, TypeScript.
DevOps & CI/CD	Docker, Git, Jenkins.
Tools	STS, Eclipse, Android Studio, Visual Studi, MS Teams.
Databases	PostgreSQL, MySQL, SQLite, Room DB, Mango DB.
Practices	Agile/Scrum, Technical Documentation, Code Reviews.
Operating System	Windows, Linux, Mac.

Professional Experience

Wrizto Healthcare Pvt Ltd – Senior Software Engineer | Bangalore | Mar 2020 – Present

Key Responsibilities & Achievements:

- Defined scalable software architecture for IoT healthcare solutions and real-time data streaming platforms.
- Developed and maintained RESTful APIs and backend systems using **Java, Spring Boot, and PostgreSQL**.
- Integrated Bluetooth and MQTT-enabled medical devices for capturing ECG, SPO2, BP, temperature, and athlete vitals.
- Led proof-of-concept and production development for **real-time monitoring**, **cloud synchronization**, and **data analytics**.
- Implemented CI/CD pipelines for cloud deployments and streamlined containerized application delivery.
- Contributed to requirement analysis, team mentoring, technical documentation, and system testing.

Key Projects:

- **FitKit** – IoT-based health monitoring system aggregates multi-device data with Kafka-based event streaming and AWS cloud synchronization for secure, scalable processing.
- **ECG Registry (Eris)** – 6-lead ECG acquisition and transmission app with REST API backend.

- **SmaVitaKit** – Offline-capable POCD with 12-lead ECG, patient data sync, and prescription generation and Includes Kafka messaging for real-time data flow, AWS-based cloud sync.
- **Mita Athlete Tracker** – IoT platform leveraging MQTT messaging protocol for real-time vitals streaming and GPS-based location monitoring.
- **Retail Omnichannel (Tech Mahindra)** – Cloud-native PWA and backend APIs for inventory and real-time order sync across retail channels.

Consumer1st Technoservices Pvt Ltd – Software Engineer | Bangalore | Mar 2017 – Mar 2020

Key Responsibilities & Achievements:

- Developed **eCommerce platform backend** using **PHP (CodeIgniter)** with RESTful APIs and MySQL.
- Built Android and PWA applications with cross-platform support using **Ionic Capacitor** and **ReactJS**.
- Integrated payment gateways, Google Maps, and Firebase for customer engagement and logistics tracking.
- Ensured end-to-end product delivery including QA support, documentation, and deployment.

Key Projects:

- **Cfirst POS** – Inventory, billing, barcode scanning, and notification system for retail businesses.
- **eCommerce Platform** – End-to-end **web and mobile solution** for order management, fulfilment, and customer tracking using cloud APIs.

Education

Bachelor of Engineering (B.E.) – Computer Science
PES Institute of Technology, Shivamogga

Leadership & Collaboration

- Contributed to architectural decision-making, design reviews, and code quality improvements.
- Mentored junior developers and collaborated closely with QA, product managers, and stakeholders.
- Involved in PoC evaluation, tech comparisons, and prototyping for emerging IoT use cases.

Certifications & Learning

- Microservices with Spring Boot – Udemy
- MQTT Essentials – self-learned
- Docker & Kubernetes Fundamentals – in progress
