Professional Summary

Automation Engineer with 3+ years of experience in test automation, specializing in Selenium, Python, Robot Framework, and API testing using SoapUI and JMeter. Adept at creating scalable automation solutions, executing test strategies, and contributing to CI/CD pipelines. Passionate about ensuring software quality through robust test case design and efficient defect resolution.

Technical Skills

Languages & Tools: Python, Java, JavaScript, SQL, HTML, CSS, Maven

Frameworks: Selenium WebDriver, TestNG, Robot Framework, Cypress

API & Performance Testing: SoapUI, JMeter

CI/CD & Version Control: Jenkins, Git

Test Management: TestLink

Methodologies: Agile, Scrum

Professional Experience

Capgemini – Automation Engineer 2021 – Present | Pune, India

Project 1: Automation of web Application Using Cypress

Tools & Tech: Cypress, JavaScript, Node.js, Visual Studio Code, JSON, XPath, Page Object Model

-Developed and automated end-to-end test cases for web application using Cypress with JavaScript and Page Object Model.

-Validated core flows using XPath locators and fixture-based test data.

-Ensured UI functionality, navigation, and element states through dynamic and interactive Cypress tests.

-Executed and debugged tests, maintain the automation suite on git on daily basis.

Project 2: Web Application Testing (Manual + Automation)

Tools & Tech: Python Robotframework, testlink, Jenkins, Git

-Designed and executed manual test cases to validate end-to-end web application functionality.

-Developed POC and implemented automation using Selenium with Python.

-Automated regression test cases, increasing test coverage and reducing manual effort.

-Conducted defect tracking and reporting using Test Link, collaborated with developers for resolution.

Project 3: Telecom Network Call Flow Automation

Tools & Tech: Python Robotframework, testlink, Jenkins, Git

-Manually tested SIP and INAP call flows for various routing scenarios.

-Automated call flow scenarios using Robot Framework, simulating real-world telecom traffic.

-Integrated automation with Jenkins for CI/CD pipeline execution.

-Delivered detailed reports including test cases, performance metrics, and defect logs.

Project 4: API Testing (REST & SOAP)

Tools & Tech: JMeter, SoapUI, testlink, GIT

-Created and executed test cases for REST and SOAP APIs using SoapUI and JMeter.

-Automated API validation with proper error handling and logging mechanisms.

-Performed performance and integration testing, ensuring robust backend connectivity.

Education B.Tech, Electronics and Telecommunications

MGM's College of Engineering, Nanded | 2017 – 2021
