Vikas Mapari
Senior QA. Engineer
April 2018 - Present (7+ Years)
: +91-8080865029
:qa.vpmapari@gmail.com

Career Objective:

Results-driven and detail-oriented **Senior QA Automation Engineer** with over **7 years of professional experience** in test automation, functional testing, and QA strategy implementation. Skilled in designing and executing robust automation frameworks **(Cypress, Selenium, Cucumber, Playwright)** and ensuring high-quality delivery of high-volume, high-reliability applications. Strong ability to collaborate with product owners, analyze requirements, and provide scalable QA solutions. Adept at mentoring teams, introducing AI-driven testing strategies, and enhancing QA processes for efficiency. Seeking a challenging role to leverage my expertise in delivering error-free solutions within timelines while driving continuous improvement in QA practices.

Key Skills:

- Collaborated with product owners to review business and functional requirements and design effective testing strategies.
- Created, executed, and documented detailed test plans and test cases for UAT, integration, regression, smoke, and end-to-end testing.
- Designed and implemented scalable, reusable automation frameworks (Selenium, Cucumber, Cypress) based on BDD/TDD methodology.
- Developed and executed regression, smoke, functional, and performance automated tests across web and mobile platforms.
- Conducted cross-browser, cross-device, and mobile testing ensuring platform compatibility.
- Provided technical mentoring, QA best practices, and direction to team members.
- Facilitated testing meetings, defect reporting, tracking metrics, and delivering go/no-go recommendations.
- Integrated automated test suites in CI/CD pipelines with headless execution and reporting.
- Ensured requirements traceability with test coverage and contributed to continuous QA process improvements.
- Experience in AI-powered testing: test case generation, anomaly detection, self-healing locators, and AI visual validation.
- Completed POC implementations for Cypress and Cucumber in internal projects, successfully delivered frameworks.
- Recognized with client appreciation for successful project delivery — meeting requirements, without errors, and on time.

Technical Skills

- **Languages/Frameworks**: Java, Python, JavaScript/TypeScript, Selenium, Cypress, Cucumber, TestNG, JUnit, Playwright
- **Automation & Testing:** REST Assured, Postman, Bruno, Swagger, API Testing, MCP Protocol Testing with Playwright & VS Code
- **Performance Tools:** JMeter (basic)
- **Cloud & Monitoring:** AWS (Lambda, EC2, S3, CloudWatch), GCP (Cloud Run, App Engine, Logs), Datadog
- **Test Management & ALM Tools:** Jira, Confluence, TestRail, Xray with Jira
- **CI/CD & DevOps:** Jenkins, GitHub Actions, GitLab, Buildkite, Docker
- **Databases:** MySQL, Snowflake
- **AI Tools:** Katalon, TestRiggor, AI testing for self-healing locators, anomaly detection, and visual testing

Career Scan

- Working as Sr. QA. Engineer at Cybage Software Pvt. Ltd. Pune.
- Worked as Software Tester at Nextech Services Pvt Ltd, Pune from April 2018 to February 2022.
- Worked as Asst Prof at Siddhant COE – Pune from Oct 2007 to Feb 2015

Professional Experience

Cybage Software Pvt Ltd – Pune | www.cybage.com **(Feb 2022 – Present)**

1. Project name: Automation Tools [Group^{m}]

Implemented AI-powered test case generation and optimization to automatically create and refine test cases from Jira requirements and Looker Studio dashboard definitions.
Integrated self-healing locators using AI-based strategies to reduce maintenance from dynamic elements and iframes.
Utilized AI-driven data generation to create realistic Google Ads/DV360 datasets for validating reporting workflows.
Adopted AI visual testing tools (e.g.,Katalon, MABL, TestRiggor) to identify UI layout or dashboard rendering inconsistencies across multiple browsers.
Incorporated AI anomaly detection in automation results to highlight unexpected patterns or failures, enabling proactive issue resolution.
Developed robust Cypress and Playwright automation frameworks using TypeScript, ensuring type safety, modular architecture, and maintainability.
Leveraged TypeScript features (interfaces, generics, type definitions) to build reusable test utilities and enhance code quality.
Implemented parallel execution, cross-browser testing, and API validation workflows in Cypress/Playwright with custom TypeScript utilities.
Enhanced CI/CD integration by incorporating Cypress/Playwright test execution with GitHub Actions and Jenkins pipelines.

Client: **US/UK**
Domain: **Media Advertisement**
Tools and Technology**: Git, JIRA**

Project description:
The Automations Portal is a web-based application that provides a single platform to execute, monitor and manage the tools provided by GroupM Nexus.
Utilize a centralized system to manage reports and different GroupM automation tools. Give the consumer access to a single, easily accessible platform with all the information they need to comprehend the tools and scripts.
In the project, data processing from Google Ads, DV360, and CM360 is done using a variety of internal and external tools and looker studio dashboard reports, along with Search Engine Optimizations tools.

Roles and responsibilities:

- Creation of **automated regression test suites** along with their maintenance and expansion.
- Proficient in handling **dynamic web elements, iframes, windows, alerts, and WebDriver Waits** (implicit, explicit, fluent).
- Acted as a **self-starter**, independently contributing to QA initiatives and building **robust and flexible automation frameworks**.
- Conducted **cross-browser and cross-device testing** using WebDriver, Cypress, and Playwright.

- Wrote and executed **test cases based on product requirements**, tracked and reported issues with clear defect logs.
- Applied **QA standards, processes, and industry best practices** to resolve routine and complex issues.
- Collaborated with application teams and stakeholders to determine **automation scope, framework tailoring, and test design**.
- Ensured implementation of **standard QA processes**, conducted **script reviews**, and coordinated with client stakeholders.
- Documented and processed **test results, defect metrics, and QA dashboards** for decision-making and release readiness.
- Supported **defect management, error tracking, and root cause analysis**, improving defect closure efficiency.
- Successfully completed **POC implementations for Cypress and Cucumber** in internal projects and delivered frameworks.
- Implemented **AI tools and AI testing** (self-healing locators, AI-driven test generation, anomaly detection, and visual validation).
- Hands-on with **Jira-Xray** for requirements traceability, test coverage, and reporting.
- Leveraged **GCP (Cloud Run functions, App Engine, Logs)** for debugging, validation, and monitoring test execution.
- Introduced **MCP protocol testing using Playwright and VS Code** for continuous test improvements.
- Received **client appreciation** for successful project delivery — meeting requirements, delivered error-free, and within deadlines.

Testing tools: Manual Testing, **Selenium (Java), Cypress, Cucumber, Rest Assured, TestNG, Page Factory, Cypress, Playwright, JavaScript/Typescript, Postman/Bruno, Swagger, MySQL, GCP (Cloud Run, App Engine, Logs), Jenkins, Jira-Xray, Looker Studio Dashboards, AI Tools (Katalon, TestRiggor)**

2. Project name: Intersection AdTech

Client: USA
Domain: OOH Advertisement
Tools and Technology: Git, Datadog, Docker, PyCharm, AWS Services, Django, Build kite, TestRail.

Project description:
In project having bunch of different micro services, AWS lambda pipelines to maintain different Digital and Static inventories impressions for ads sold on out of home (OOH) advertisement.
Integrate multiple SSP's contribute in create new service or update in service for screen to run ads and bid through SSP track the impression sell and biddings. Script for Inventory onboarding in SSP's. Write lambda services for the Dynamic ads to pull third party data.
Roles and responsibilities:

- Requirement understanding
- Ensures that products meet the quality
- Check consistency across devices and software
- Test execution & reporting
- Bug reporting in Jira

Testing tools: Manual testing, White box testing, Python API automation with Request, Postman, BSP testing with ARM and Intel boards, AWS, Docker, Snowflake, TestRail

3. Project name: Intersection Order Management System

Client: USA
Domain: OOH Advertisement
Project description:
Implement the IAB OpenDirect version 2.0 API to allow users to buy the client screen impressions. As part we need to flow IAB guideline and write REST micro services and AWS lambdas to sync in screen impression data. And create a flow for screen impression buy and track client orders through automate pipeline where it checks the order status to convert in from reserved to book.
Roles and responsibilities:

- Executing scripts for testing and Maintenance and Enhancements of project.
- Ensures that project meet the quality

Nextech Services Pvt Ltd – Pune | www.nextechservices.in **(Apr 2018- Feb 2022)**

4. Project name: Agency Matrix

Client: Turborator, USA
Domain: Insurance Domain
Project description:

Turborator is developing a Web application that is platform for the individual Agent who want to expand their business across USA. Using this system Agent can Quote on behalf of Customer and provide quotes from multiple carriers to Customers. Using System Underwriter can buy policy for customer if he is ok with the provided quotes.
Roles and responsibilities:

- Analyzed business requirements and translated them into test scenarios.
- Assessed scope for automation and identified suitable areas for regression coverage.
- Designed and implemented automation scripts using Selenium (Java), Cucumber BDD, and Rest Assured.
- Performed functional, integration, and regression testing, executing scripts across builds.
- Generated and shared test execution reports with stakeholders.
- Logged and tracked defects in Jira, ensuring timely resolution.
- Conducted database validation using MySQL for backend data accuracy.
- Collaborated with developers, BAs, and stakeholders to ensure alignment on requirements and quality goals.
- Received client appreciation for successful delivery as per requirements, ensuring zero errors and meeting timelines.

Testing tools: Manual Testing, **Selenium (Java), Cucumber BDD, Rest Assured, TestNG, Jenkins, Extent Reports, Jira, MySQL, Postman**

5. Project name: Security System

Client: Cybervault Securities Solutions Pvt. Ltd
Domain: Security Domain
Project description:

Cybervault Securities Solutions Pvt. Ltd. has been the Pune's leading information security certification company since the launch of their flagship program, Certified Ethical Hacker (C|EH), which created the ethical hacking industry. Since the launch of C|EH, Cybervault has added industry-leading programs to their portfolio to cover all aspects of information security including EC-Council Certified Security Analyst (ECSA), Computer Hacking Forensics Investigator (C|HFI), Certified Chief Information Security Officer (C|CISO), among others.

Roles and responsibilities:

- Requirement understanding
- Analyze scope for manual testing
- Test scenario and Test script
- Test execution & reporting
- Bug reporting in Jira

Testing tools: Manual testing, Jira, MySQL, Postman

Trainings:

- Docker Introduction, Container, Architecture, Workflow
- Basics of Agile & Scrum
- JavaScript: Getting Started
- Python Fundamentals
- Step by Step Rest API Testing using Python
- Xray for JIRA

Education:

- Bachelor in Computer Engineering (BE), Savitribai Phule Pune University, Maharashtra
- Master in Computer Engineering (ME), Savitribai Phule Pune University, Maharashtra

Personal Details

Nationality	**:** Indian
Name	**:** Mr. Vikas Prakash Mapari
Father's name	: Mr. Prakash Mapari
Mobile number	**:** 8080865029
Address	**:** A2-604, Kumar Princeville, Borhaddewadi, Moshi, Pune - 412105,Maharashtra.
Hometown	**:** Ahmednagar.
Languages	**:** English ,Hindi ,Marathi.

DECLARATION:

I affirm that above information is true and correct to best of my knowledge.
