Pune, Maharashtra

SUMMARY

I am an experienced Sr Software Test Engineer with over 7 years in automation and manual testing. My expertise spans various testing disciplines including Functional, Non-Functional, Globalization, and UI Testing. I have extensive experience with API Testing using tools like POSTMAN, Cypress Automation, and Rest Assured. I excel in Agile methodologies, hold strong problem-solving skills, and thrive in collaboration to enhance product quality

EXPERIENCE

Sr QA Test Engineer

IncubXperts Pvt Ltd — 04/2024 - Present — Pune, India

A technology company focusing on providing QA Testing services

- Worked on implementing and maintaining a Cypress automation framework
- Conducted test case creation, execution, and defect reporting
- Performed web testing, mobile app, and mobile browser-responsive testing
- Focused on exploratory testing to uncover defects
- Collaborated with developers to enhance product quality

QA Test Engineer

Savours Technology Pvt Ltd — 11/2022 - 03/2024 — Pune, India

A company specializing in technology services

- Worked on automation testing using Cypress
- Tested Android/iOS applications and responsive UI
- Created logs to document testing phases and defects
- Prepared test cases based on requirements
- Participated in weekly/daily status calls with clients

Automation Test Engineer

Scripts testing InfoTech — 08/2019 - 11/2022 — Pune, India

An information technology company providing testing solutions

- Performed automation testing on various projects
- Involved in executing test cases and reporting defects
- Developed automation solution for payment mode and executed scripts

Apara New Media Pvt Ltd — 12/2017 - 08/2019 — Pune, India

A media company that develops e-learning platforms

- Developed and designed usability features
- Responsible for coding and unit testing
- Performed defect fixing in IT and UAT

EDUCATION

B.E.E. & TC

Pune University — 06/2014 - 06/2014 — Pune

STRENGTHS

Problem-solving and analytical skills

Excellent problem-solving and analytical skills to handle exceptions in automation scripting using Cypress tool

KEY ACHIEVEMENTS

Achieving excellence in automation testing

Implemented and maintained robust automation frameworks using Cypress across multiple projects, which enhanced test coverage and improved software quality

SKILLS

Agile **Azure DevOps** **Apache JMeter** **Automated Testing** **BDD** **CSS** **Cucumber** **Cypress** **Ecommerce** **E-Learning** **End-To-End Testing** **Gantt Chart** **Git** **GitHub** **HTML** **Hybris** **IAM** **Java** **JavaScript** **Jenkins** **JIRA** **jQuery** **JUnit** **Manual Testing** **Payment Gateways** **PIC** **Postman** **REST** **Sanity Testing** **SAP** **SAP Hybris** **SDLC** **Selenium** **Soap** **TestNG** **UAT** **UI Testing** **Unit Testing** **Bit Bucket** **WebDriver** **Typescript**

PROJECTS

Baker Hills NextGen (LOS)

03/2025 - Present

Worked on the Baker Hill's NextGen platform, automating end-to-end testing for key modules including the Fraud Configuration section using Cypress and TypeScript. Implemented reusable functions for field validation, handled dynamic dropdowns, and integrated Alloy (Onfido identity verification flows) via API stubs. Developed stable UI/API tests for Financial Institution profile setup and fraud-related toggles, ensuring cross-environment reliability. Enhanced test coverage, reduced regression effort, and integrated with Azure DevOps CI/CD pipelines.

- **Successfully reduced manual QA effort by 70%** by implementing stable, reusable Cypress tests across fraud workflows and FI configuration, ensuring faster and more reliable regression cycles.

Med Force Enterprise Application (Regression suit)

04/2024 - 02/2025

A multi-module enterprise platform for HCP Management Holdings

- Developed a Cypress-based automation framework for UI and API testing
- Automated critical workflows, improving efficiency
- Implemented role-based access testing to verify functionalities
- Developed test cases for email workflows and client migrations
- Integrated Cypress tests with CI/CD pipelines
- Reduced manual regression efforts by 70%
- Enhanced software quality for 25+ global clients

Bay Automation (Sanity suit)

09/2024 - 03/2024

An internal e-commerce B2C application aiming at online product sales

- Developed and implemented a Test Automation TDD hybrid framework
- Conducted Sanity test operations using Selenium Web Driver
- Generated reports using TestNG and Extent Reports
- Participated in weekly stand-up and review meetings

Best AlYousufi

11/2023 - 12/2024

An E-commerce platform for buying and selling products

- Responsible for implementing and maintaining automated testing using Cypress
- Executed tests and oversaw automation testing
- Reported bugs and glitches in an agile environment

AlTannaf

03/2023 - 12/2023

A platform for buying animal feeds over the internet

- Implemented and maintained automated testing using Cypress
- Conducted tests and oversaw automation testing in an agile environment
- Reported bugs and managed defect documentation

Insurance Management

08/2019 - 11/2022

Involved in investment banking with a focus on planning and managing large projects

- Developed and implemented automated solutions using scripting languages
- Monitored automated processes and maintained solutions
- Collaborated on weekly/daily status calls with clients

ET1

12/2017 - 08/2019

An e-learning platform for various student activities and widgets

- Developed and designed usability features for the project
- Conducted coding and unit testing
- Performed defect fixing in IT and UAT
