PRABHUDEVA SELVARAJ

QA Engineer

+919363754845 | dsprabhudeva49@gmail.com

Quality Assurance Professional | ISTQB Certified | Proficient in Manual and Automation Testing

OVERVIEW

Experienced QA Professional with **5.5 years** of expertise in software testing, including **3 years** in Automation and **2.5 years** in Manual Testing. Skilled in designing, developing, and executing automated test scripts using tools such as Selenium, Appium and Playwright. Proficient in functional, regression, API and performance testing across agile environments. ISTQB-certified, with a strong track record of improving product quality and accelerating release cycles through efficient test strategies.

SUMMARY

- **QA Engineer** with **5.5 years of experience** in software testing across multiple domains and technologies.
- **3 years of expertise in Test Automation** and **2.5 years in Manual Testing**, covering end-to-end test processes.
- **SQL Developer** with **2 years of experience** in designing, optimizing, and securing high-volume banking databases for loan analytics and regulatory compliance.
- Proficient in **designing and developing automation frameworks** using Selenium WebDriver, TestNG, Maven and Jenkins.
- Skilled in **API testing and automation** using REST Assured and Postman, including request and response validation and scripting.
- Strong knowledge of **software development life cycle (SDLC)** and **software testing life cycle (STLC)**.
- Hands-on experience with **functional, regression, integration, usability, smoke, UAT and Performance Testing**.
- **ISTQB Certified**, with in-depth understanding of QA standards, test design techniques, and defect prevention strategies.
- Expertise in **Agile/Scrum environments**, participating in sprint planning, daily stand-ups, and reviews.
- Familiar with **continuous integration/continuous delivery (CI/CD)** pipelines to ensure seamless test execution and faster releases.
- Experienced in using **test management and bug-tracking tools** such as JIRA, Quality Center and similar platforms.
- Ability to **write, review, and optimize test cases**, test scripts, and automation suites for maximum coverage.
- Adept at **mentoring junior testers** and collaborating with cross-functional teams to improve quality practices.
- Designed, developed, and maintained complex SQL procedures, functions, and views to support loan processing and analytics workflows.
- Optimized database performance through indexing, query tuning, and partitioning, improving reporting speed by over 50%.
- Ensured data quality, security, and compliance by implementing constraints, triggers, role-based access, and change-tracking mechanisms.
- Knowledge of **version control systems** like GitHub for managing code and test scripts.
- Strong analytical and problem-solving skills with a focus on **delivering high-quality, reliable software**.

- Excellent communication and documentation abilities to clearly report defects, metrics, and test results to stakeholders.

SKILLS

- **Testing Expertise:** Automation, Manual Testing, Functional, Regression, Integration, Smoke, Usability, UAT, Mobile, API, Performance, Load, Scalability.
- **Automation Tools:** Selenium WebDriver, TestNG, JUnit, Maven, Rest Assured, Postman, Cucumber, Appium, JMteter, LoadRunner.
- **Framework:** Hybrid Framework**,** BDD Framework, Page Object Model, Data-Driven Testing,
- **Programming:** Java, Python
- **Test Management & Defect Tracking:** Jira, Bugzilla
- **CI/CD & Version Control:** Jenkins, GitHub

CERTIFICATION

- ISTQB Certified Test Automation Engineer
- Done a certified course on C, C++ and java at NIIT.
- Currently undergoing training in HTML, CSS and JS.

ACHIEVEMENTS

- **Successfully handled two QA teams simultaneously**, ensuring product backlogs were continuously groomed, prioritized, and delivered without delays, resulting in improved sprint predictability.
- **Led manual testing efforts alongside automation**, creating and executing 1,000+ functional and regression test cases, ensuring high-quality releases with zero critical defects in production.

EDUCATION

- **Master of Computer Application** from University of Madras Distance Education.
- **Bachelor of Computer Application** from Adhiparasakthi College of Arts and Science.

EXPERIENCE

Organization	:	Tenjin Technologies Private Limited
Client	:	Spartoo UK
Domain	:	E commerce
Duration	:	September 2023 to August 2025

Roles:

- Designed, developed, and executed manual and automation test cases for web and mobile e-commerce applications.
- Performed functional, regression, integration, system, smoke, and UAT testing for critical e-commerce flows (cart, checkout, payment gateway, order management).
- Developed and maintained Selenium WebDriver automation scripts using TestNG, JUnit, Cucumber (BDD) frameworks.
- Conducted API testing using Postman, REST Assured for backend services (order, payment, shipping)

- Prepared test plans, test scenarios, and traceability matrices based on business requirements and user stories.
- Identified, logged, and tracked defects using tools like JIRA, working closely with development teams for resolution.
- Participated actively in Agile ceremonies (daily stand-ups, sprint planning, retrospectives) and contributed to continuous quality improvements.
- Supported CI/CD integration of automation scripts with tools like Jenkins, Git.
- Performed cross-browser and cross-device testing for responsive design validation.
- Generated detailed test execution reports and shared status updates with stakeholders.
- Performed manual and automation testing of web and mobile applications.

Organization : Tenjin Technologies Private Limited
Client : Insurance
Domain : Co-op Insurance
Duration : May 2021 to Aug 2023

Roles:

- Analyzed business requirements and user stories to design and execute comprehensive manual test cases.
- Performed functional, integration, regression, and exploratory testing on insurance applications (web & mobile).
- Verified policy creation, quote generation, premium calculations, endorsements, renewals, and claims workflows.
- Logged and tracked defects using JIRA, and collaborated with developers for resolution.
- Assisted in User Acceptance Testing (UAT) with business stakeholders.
- Developed and maintained Selenium WebDriver (Java) test scripts for key regression scenarios.
- Automated quote journey, claims submission, and payment flows for faster sprint regression testing.
- Integrated automated tests into CI/CD pipeline (Jenkins) for nightly builds.
- Created and executed basic API tests using Postman and Rest Assured for backend validation.
- Participated in daily stand-ups, sprint reviews, and retrospectives, actively contributing QA updates and raising blockers.
- Documented test results, prepared defect reports, and provided regular status updates to QA leads and test managers.

Organization : Lapiz Digital Services
Client : Telecommunication
Domain : Exascale
Duration : May 2020 - April 2021

Roles:

- Collaborated with stakeholders to capture business and technical requirements for exascale telecom systems.
- Designed scalable, high-performance architecture to handle massive data throughput at exascale levels.
- Implemented optimization techniques to enhance bandwidth utilization and reduce latency.

- Managed large-scale datasets for real-time processing and analytics.
- Ensured seamless integration with existing telecom infrastructure and third-party systems.
- Conducted stress, load, and performance testing to validate exascale system capabilities.
- Developed automation scripts/tools to streamline deployment and monitoring.
- Implemented robust security measures and adhered to telecom industry standards.
- Worked closely with engineering, QA, and operations teams for smooth delivery.
- Prepared technical documentation and trained teams on new systems and processes.
- Captured and analyzed business & technical requirements to design scalable telecom solutions at exascale level.
- Optimized network performance and data handling for massive throughput and low latency.

Organization : Lapiz Digital Services
Client : Axis Bank
Domain : Loan Approval Analytics Platform
Duration : May 2018 - April 2020

Roles:

- Created SQL procedures to calculate credit scores based on customer financial history.
- Structured relational databases to support loan application workflows and approval logic.
- Implemented constraints and triggers to ensure accuracy of financial transactions.
- Optimized slow-running queries and improved report generation speed by 50%.
- Automated daily, weekly, and monthly loan performance reports using SQL scripts.
- Cleaned and standardized customer data for analytics and compliance.
- Developed mechanisms to track changes in loan applications for regulatory audits.
- Worked closely with analysts to translate business rules into SQL logic
- Used Git to manage code versions and collaborate with cross-functional teams.
- Logged and resolved bugs and enhancements using JIRA.
- Implemented role-based access to sensitive financial data.
- Assisted in migrating legacy loan data to the new analytics platform.
- Supported user acceptance testing and handled production deployment issues.
- Maintained technical documentation and conducted KT sessions for new team members.
