Teck Skills

Languages and Tools: Java, Selenium, Appium, TestNG, Maven, Jenkins, Cucumber, Gherkin
Framework: BDD (Behavior Driven Development)
Version Control/Collaboration Tools: Git, JIRA, Bitbucket, Confluence, Teams

Work Experience

NextGen Healthcare, Bangalore Sept 2021 - Present

Quality Assurance Engineer

- Joined Nextgen healthcare as a **QA Engineer** and Have Total **4 Years of Experience**, worked on both **Manual testing** and **Automation Testing** in Agile Methodology.
- Have expertise in testing: **Web Application**, **Mobile Application** (**iOS Application**, **iPad Application**, **Android Application**) and **Desktop Application** platform
- Have experience in **Manual Testing**: **Functional** testing, **Sanity** Testing, **Exploratory** Testing, **Integration** Testing, **Regression** Testing and **Production** testing.
- Participated in the **Software Testing Life Cycle (STLC)** including test planning, test case design, test environment setup, test execution, and defect reporting
- Created comprehensive **test cases** and **test scenarios** for mobile and **web applications** based on **requirement documents** and **user stories**
- Reported and tracked **bugs/defect** in **JIRA**, coordinating closely with Developers and product teams for resolution
- Automated test cases in **BDD frameworks** using **Java**, **Selenium**, **Appium**, **Cucumber**, **TestNG** and **Gherkin** syntax for test automation
- Utilized various locators like **XPath**, **CSS**, **ID** etc identify Ul elements efficiently across platforms
- Used **Git** for **version control** of automation scripts, enabling smooth collaboration with the QA team
- Participated in **Agile methodology** such as Stand-up, Sprint planning, Sprint retrospective and Quarterly planning etc.

Education

SJCIT Karnataka Aug 2016 - Jun 2020
B.E. in Information Science and Engineering ***CGPA: 7***

Project Work

Project Title: NextGen Mobile Solutions
Application Platform: Mobile (iOS, iPad and Android), Browser and Desktop
Project Worked: Admin Console, Cloud portal, Editone, Mobile app, EHR and PM

Description: A **user-friendly hospital management** system application which reduces the burden and helps to manage all sections of hospital like. Doctors, Patients, Nurse, Receptionist Which improves the overall processing efficiency. It is necessary for the hospitals to keep track of day-to-day activities. But keeping track of all activities and their records on paper is very difficult and time consuming so that's the reason this project is developed.

Roles & Responsibilities:

- Worked Collaborated with the product team to define and implement requirements for the hospital management system, ensuring the application met user needs.
- Designed and developed test cases and test scenarios for mobile and web applications, ensuring the functionality and usability of the system.
- Performed manual and automated testing of the system using tools like Selenium, Appium, and TestNG to ensure high-quality standards and bug-free releases.
- Created and executed test plans for all modules, including doctors' schedules, patient records, nurse assignments, and receptionist workflows.
- Developed automation scripts in Java, Selenium, and Appium to speed up testing and reduce human error.

- Identified, tracked, and reported bugs using JIRA, working closely with developers to resolve issues and enhance system performance. Participated in Agile sprints, collaborating with cross-functional teams to ensure timely delivery of each release

Awards and Certificates

- **Software Testing Course at QSpiders**
