ASHWINI REDDY

ashwinireddy1511@gmail.com | +91 8050841524 | Bangalore India

Summary

QA Lead with 8+ years of experience in software quality assurance and test management across mobile and web applications. Expertise in testing methodologies, defect tracking, and risk management. Proven ability to lead cross-functional teams in delivering high-quality software solutions. Focused on process development and product performance enhancement to achieve business objectives.

Skills

- Test strategy and planning
- Qa leadership
- Agile methodologies
- Functional and performance testing
- CI/CD practices
- TestRail management
- Data validation techniques
- SQL databases
- Data visualization (Data Studio)
- Api testing with Postman
- Release management strategies
- Defect triage processes
- Cross-platform testing methodologies
- Knowledge of Python with Playwright

Experience

QA Lead | Mobile Premier League (MPL) - Banglore, India | 06/2021 - Current

- Led QA efforts across a diverse range of real-time, interactive, and user-facing applications on the Android and iOS platforms.
- Served as the primary QA point of contact, facilitating clear communication of testable requirements, scope, and timelines with stakeholders.
- Defined QA processes across functional, regression, API, and UI testing, ensuring quality release every sprint.
- Utilized advanced technical skills and expertise to troubleshoot complex problems and implement solutions.
- Monitoring via New Relic and Kibana post-deployments.
- Managed end-to-end release cycles, coordinating efforts with developers, PMs, and product teams.
- Mentored and guided a team of QA engineers, fostering best practices in test design, execution, and defect reporting.
- Spearheaded defect triage, achieving over 95% defect resolution prior to release.
- Wrote complex SQL queries in MySQL to support functional and regression testing.
- Implemented an automated build and deployment process using continuous integration tools such as Jenkins
- Automated deployment processes using Jenkins CI and CD pipelines.
- Lead a cross-functional team of engineers to develop highly scalable web applications using modern technologies, such as Java, ReactJS, and NodeJS.

QA Engineer | GSN GAMES - Banglore, India | 09/2018 - 05/2021

- Conducted testing of various interactive applications on mobile and web platforms, with a focus on functionality, performance, and delivering a seamless user experience.
- Working closely with designers and developers to ensure feature stability and user experience quality.
- Developed and maintained test plans and detailed test cases tailored to evolving features and multiple release cycles.
- Applied Charles Proxy to validate network performance and throttling scenarios.
- Actively participated in sprint planning, estimation sessions, and QA capacity reviews, aligning testing efforts with rapid release schedules.

- Owned and facilitated bug triage meetings, driving timely resolution by coordinating effectively with development teams.

Game Tester | Pole to Win - Banglore, India | 04/2016 - 04/2017

- Executed functionality and compliance testing for multiple gaming projects.
- Authored and updated test cases to reflect feature changes and enhancements.
- Reported and tracked bugs with detailed reproduction steps, facilitating efficient resolutions.
- Coordinated with developers to validate fixes, minimizing bug reopen rates.
- Conducted comprehensive testing on software applications for quality assurance purposes.
- Designed test cases based on software specifications and requirements.
- Participated in team meetings to discuss testing strategies, and project updates.

Education

SGBIT BELAGAVI | Belagavi | 06/2015

Bachelor of Engineering: EC
