Reetu Tiwari

9516743970 — tiwarireetu1995@gmail.com —

Summary — 8.6 Years of professional experience in Automation,Manual and Functional Testing. Worked as an engaging and analytical Test lead in the Agile projects by implementing Scrum development methodologies. 3.3 years of working experience in TCS (Telecom Domain built in PEGA) 1.6 year of working experience in Accenture (Health Insurance Domain) 3.4 years of working experience at DXC Technologies (Life Insurance and Health Care Domain) Experience testing with PEGA Customer Decision Hub,Case Management,Customer Order Management Provided thought-leadership to fellow team members and business partners across business and technical project dimensions solving complex business requirements. This includes scope definition, requirements analysis, functional and technical design, application build, product configuration, unit testing, and UAT and production deployment Experience in Analysis, development and Implementation of Software Applications. Proficient in Automation using Selenium from selenium web driver,Junit, Java EE, Selenium Grid, Cucumber Good Hands on over Agile Methodology and tools such as Azure DevOps, Postman, Soap UI, WCF Client,D Beaver, PostgreSQL and Jira

Skills

Development / API Tools – Postman,Swagger, Soap UI, Eclipse,Visual Studio,PEGA App,Dev Studio,CDH
Scripting Languages – Selenium, Rest Sharp,Playwright
Database Servers – SQL Server, MySQL,DBeaver, PostgreSQL
Testing – Pytest, Docker,Jenkins, TestNG
DevOps Tools – Azure DevOps, GIT ,Jira,Confluence

Experience

Tata Consultancy Services **June 2022 – Present**
Role- Pega Senior Test Analyst
Client - Vodafone,Talk Talk

- Led a cross-functional team to integrate a continuous testing pipeline using Jenkins, resulting in a reduction of build time
- Automated 300+ API tests using SoapUI and Postman, which led to identifying and fixing 50 critical bugs before production releases
- Automated 100+ UI tests cases using Selenium and fixed 34 bugs before critical releases
- Maintained project trackers to monitor testing progress and deadlines
- Supported release planning by aligning test execution timelines with deployment schedules
- Collaborated with onshore/offshore teams ensuring smooth handoffs
- Participated in Agile ceremonies and supported requirement analysis
- Managed defects and traceability using Azure DevOps and Jira
- Tested Pega integrations, data flows, and APIs with downstream systems
- Hands-on with CICD, Smoke, Regression Testing, and Visual Studio Enterprise

Accenture Solutions **Feb 2021 – June 2022**
Role - Senior Test Analyst
Client - Premera Blue Cross Blue Shield

- Drafted status reports and shared updates with stakeholders
- Created process documents, test cases, and knowledge transfer documents
- Partnered with business analysts and developers to clarify requirements.
- Conducted root cause analysis and coordinated with dev/business teams.
- Tested insurance product Lifecycle including policy and claims.
- Validated calculations and compliance aspects in insurance systems
- Developed and maintained 150+ automated test cases for APIs using Swagger, improving test coverage by 40 percent
- Identified and resolved 30+ API issues through thorough end-to-end testing, increasing API reliability by 20 percent
- Validated regulatory requirements such as HIPAA and data privacy compliance
- Conducted API and integration testing with provider and payment systems
- Facilitated Meetings with U.S. and U.K. stakeholders in stand-ups and UAT cycles

DXC Technologies **Oct 2017 – Jan 2021**
Role - Test Analyst
Client - AXA and Assure Digital

- Delivered presentations to management on project health, risks, and issues.
- Conducted review meetings and prepared MOM (minutes of meetings).
- Performed backend validation and test data creation using SQL, improving defect triaging and root cause identification.
- Validated policy administration, premium calculations, and compliance rules
- Tested end-to-end flows including new business, policy changes, and claims

- Defined user stories, acceptance criteria, and managed defect triage
- Optimized CI/CD pipelines by embedding automated test suites, reducing release validation time
- Drafted status reports and shared updates with stakeholders
- Managed critical defect triaging sessions to align priorities with business needs
- Collaborated with DevOps teams to ensure continuous integration, build validation, and smooth deployment cycles
- Consistently met tight deadlines without compromising quality.

Certifications and Publications

- **ISTQB Foundation Level Certification** (ISTQB) Aug 2025
- **Professional Scrum Master (PSM I)** – Scrum.org Oct 2024
- **Generative AI E0** – LinkedIn Aug 2023
- **TOSCA Automation Certification** – Tricentis Feb 2021
- **Implementation of Selenium Automation & Report Generation Using Selenium Web Driver & ATF** *ICAECT* 10.1109/ICAECT49130.2021.9392455 Feb 2020

Accomplishments

Star Performer Award, TCS – For consistent, high-quality QA delivery across 3 major releases.
3x GEM Awardee, TCS – For identifying logic gaps in PEGA CDH implementation.
Spot Award, DXC Technologies – For automation efforts reducing regression cycle time by 30%.
Agile Champion Award, Accenture – For leading retrospectives and improving team velocity.

Education

July 2013 – Aug 2017 **Oriental College of Technology**, Bachelor of Engineering in Computer Science (GPA: 8.5/10)
