HARIOM BAJPAI

EXECUTIVE SUMMARY

I am a seasoned Salesforce Developer with 6.5 years of expertise in Apex Programming, Lightning Web Component (LWC), Service Cloud and related technologies, coupled with a strong background in the experience cloud as well as Sales cloud. My strengths include Salesforce System Configuration, Lightning Development, Visualforce, Apex Programming, Triggers, Lightning we component (LWC), AURA, REST & SOAP Integrations, SOQL & SOSL, Flow Builder, Process Builder, Experience Builder, Batch Apex and Schedule Apex, Apex Sharing, Test Classes, Future Calls, Custom Settings, Custom Metadata Settings, Email Handling, Communities, CMS, Platform Events. In my current role at Accenture, I've led a pivotal Service cloud project, improving efficiency by 20% and ensuring data accuracy as well as Increasing the accuracy of email-to-case, where I handled different phases of SDLC including Requirements gathering, Analysis, Solution Designing, Development, Deployment and Maintenance, Documentation. Strong knowledge of Agile, Waterfall methodologies. Strong understanding of System architecture.

During my tenure as a Salesforce Developer at Brazen Group, I launched a successful Community cloud platform (Experience Cloud) I creating application with the help of Lightning Component, Visualforce Pages as well as I was responsible for Salesforce administrator Like – Creation of user groups and configure workflows and assignment rules, I bring a comprehensive understanding of its unique challenges and opportunities. My education in Bachelor of Technology, along with certifications in Salesforce Administrator, Salesforce Platform Developer-1, Salesforce Certified Service Cloud and, Certified AI Associate positions me as a well-equipped professional to drive success in today's dynamic business environment across all sectors.

KEY HIGHLIGHTS

- 6.5 years of IT experience in the areas of Design and Development of high scalable Applications as a SalesForce.com Developer and administrator.
- Proficiency in Agile methodologies, DevOps, and team management.
- Led pivotal Service cloud project, improving efficiency by 20% and ensuring data accuracy as well as Increasing the accuracy of email-to-case.
- As a Salesforce Developer at Brazen Group, I launched a successful Experience cloud platform Application.
- Managed Data Migration and deployment during Go-live of application.
- Designed, developed and optimized 4+ full customized application.
- Designed and built the managed package, successfully registering it on the AppExchange.
- Bachelor of Technology and certifications in **Salesforce Administrator, Salesforce Platform Developer-1, Salesforce certified Service Cloud, Salesforce certified AI Associate.**

SOFT SKILLS

- Team Management
- Data Migration (ERP).
- DevOps Practices.
- Jira
- Leadership and Communication

TECHNICAL SKILLS

- Apex class
- Lightning Web Component (LWC)
- Lightning Component (AURA)
- REST API-Integration
- Manage Package
- Platform Event Integration
- Batch, Queueable & Future Apex.
- Lightening flows
- SOQL, SOSL.
- ERP integration with SAP
- Omni Channel
- Amazon Web Services (AWS)
- SAP
- Genesys
- Service Cloud
- Sales cloud
- Community cloud
- OmniStudio

WORK EXPERIENCE ((6.5 Years)

Numeric Technologies, Bangalore, India
Sr. Salesforce Developer, May 2024 – Present

- Developed and maintained features for a Service Cloud–based project, enhancing agent productivity and customer experience.
- Created custom reusable Lightning Web Components (LWC) to dynamically retrieve and display agent information across multiple workflows.
- Designed and implemented robust Apex classes to support business logic, data processing, and seamless backend operations.
- Led inbound and outbound integrations using REST APIs, Named Credentials, and OAuth flows to connect Salesforce with external systems securely.
- Implemented Change Data Capture (CDC) to monitor and respond to real-time data changes, improving system responsiveness and data accuracy.
- Built modular Apex triggers and handler frameworks to ensure scalable and maintainable automation.
- Applied best practices in test class development, achieving high code coverage and validating critical logic paths.

Accenture, Gurugram, India
Application Development Analyst, Sep 2021 – May 2024

- Built and supported 360° Live web forms using REST API Services integration as part of Service Cloud Case lifecycle management.
- Worked on Inbound Email Handling, Inbound Email Service, Change Sets, Reports & Dashboards.
- Work on Integration between **Amazon Web Services (AWS) and Salesforce to managing Inbound, Outbound call as well as transcript and conversation.**
- Work on Email-to Case routing, notification mail, case queue-based, Skill Based, and External Based
- Assignment with the help of Omni-Channel Routing as well as normal Routing.
- Experience in designing and developing Apex Classes, Lightning Web Component (LWC) and Apex Triggers for various functional needs in application.
- Created REST API for updating the Case records and fetching data from external system.
- Also created REST callout methods to send data at particular end URLs.
- Worked with Platform Authentication Patterns (SAML, SSO, OAuth, Named Credential).
- Work on platform event end-to end connect with Salesforce and SAP using ERP with the help of Platform event.
- Work on writing complex test classes, Migrated 20 million data records to Salesforce.

Brazen Group, Noida, India
Salesforce Developer, Nov 2020 – Aug 2021

- Design and implement custom solutions on Experience Cloud (Community cloud) to meet business requirements.
- Worked on various Salesforce.com standard objects like Campaigns, Leads, Accounts, Contacts, Opportunity, Forecast, Cases, Reports, and Dashboards.
- Implemented pick lists, dependent pick lists, lookups, master detail relationships, validation and formula fields to the custom objects.
- Create a User Interface Using Lightning Component (AURA) and Lightning Web Component (LWC).
- Created 5 level custom form UI Using HTML, JavaScript, CSS.
- Integration with third-party applications: Rest, SOAP webservices.
- Worked on manage package, design, built, undergoing a full security review and successfully registering it on the AppExchange.
- Develop asynchronous apex: Schedulable, Batch, Queueable, Future.

Spraxa Solutions Pvt. Ltd. Ghaziabad, India

Software Engineer, Feb 2020 – July 2020

- Design and implement custom solutions on Sales cloud to meet business requirements.
- Worked on Sales Cloud: - created custom objects, and profiles; set their security model, profile permissions, record-level, and field-level security and also configured their sharing settings.
- Formed automation, and validations using automation tools such as Process Builder.
- Created Workflows for automated lead routing and lead escalation.
- Developed Apex classes and Triggers and linked them to manage workflows.
- Worked on UI part with flows and AURA.
- Designed and developed analytical data structures for optimized data and data clean- up with Asynchronous Batch Apex.
- Performed UAT Testing, created test class for each Apex Trigger and Handler Class, and performed Unit Tests
- Create profiles, roles and configure permissions according to organizational hierarchy requirements.
- Deployed Change Sets from Sandbox to production.

Trisect, Noida, India

Java Trainee, May 2019 – Feb 2020

- Designed and deployed Custom tabs, validation rules, Approval Processes and Auto-Response rules for automating business logic.
- Configured Profiles and Administrative permissions to grant/deny users access to platform features.
- Created Customized dashboards for the case team members to keep track of the cases assigned to them and to share insight across the company.
- Implemented pick lists, filed dependencies, lookups, master-detail relationships, validation and formula fields to the custom objects.
- Customized Marketing application to create a web to lead forms, Campaign to lead forms, assigning tasks, and managing workflows.
- Worked on List, Map, Set, Class, Variable, Constructor, Method, Instance& static.
- Worked on Java, J2EE Technologies.
- Worked on language elements like data types, variables, operators,
- numbers, strings, control flow, etc.
- Good knowledge of SQL/Relational databases like MySQL and Oracle.

Onicra Solution Pvt Ltd, India

IT Business Analyst, Nov 2017 - Jan 2019

- Involved in the complete software development life cycle including requirement analysis, design, implementation, testing, and maintenance.
- Actively involved in the analysis, detail design, development, bug fixing, and enhancement in agile methodology.
- Designed and deployed Custom tabs, validation rules, Approval Processes and Auto-Response Rules for automating business logic.
- Configured Salesforce Profiles and Administrative permissions to grant/deny users access to platform features. Created Customized dashboards for the case team members to keep track of the cases assigned to them and to share insight across the company.
- Implemented pick lists, Salesforce field dependencies, lookups, master-detail relationships, validation and formula fields to the custom objects.
- Responsible for Analyzing and Documenting New Business /Enhancement Requirements into JIRA User Stories.
- Created Data Flow Diagrams and Process Flow Diagrams to Facilitate Better System Understanding.
- Assisted in Designing and Creation of Training Material and Conducted Internal Training Sessions for Business Users on Salesforce Technology Functionalities.

EDUCATIONAL QUALIFICATIONS

- **Bachelor of Technology**
  SRMS CET Engineering College, Bareilly, India

ACHIEVEMENTS

- The Extra Mile Award (ACE Winner- Accenture Q1) (2023)
- Technical Employee of The Month – Brazen Group (2021)
