KIREETI LAKAMSANI

NETWORK ENGINEER II

+91 9505588844 •KireetiLakamsani492152@gmail.com • Kireeti L • Hyderabad

Summary

Experienced Network Engineer with 05 years in managing Cisco Networks. Proficient in configuring Cisco Routers (7200, 7100 series) ISR (4331,4300 serice), Catalyst Switches (9200, 3650,3750,3850, 6500 series), and Cisco Meraki setups. Certified in CCNA Routing & Switching (200-125), Palo Alto Network Security, and ITIL. Accomplished problem solver, resolving L1 & L2 issues with 98% customer satisfaction.

Technical Skills

- **Cisco Router**: Installation, configuration, and troubleshooting (7200, 7100 series), ISR (4331,4300)
- **Cisco Catalyst Switches:** Configuration and troubleshooting (9200,3650,3750, 3850, 6500 series)
- **Routing Protocols**: In-depth knowledge of OSPF, BGP, EIGRP, RIP
- **Switching & Overlay Technologies**: VLANs, STP, RSTP, HSRP, VRRP, Ether-Channel, VTP, Inter-VLAN, ACL, VXLAN , EVPN
- **Network Security**: Palo Alto, Cisco ASA, Citrix Load Balancer, F5 Load Balancer, VPN (IPsec, DMVPN, MPLS)
- **Monitoring Tools**: SolarWinds, Zenoss, Zabbix, CA Spectrum, SYSLOG setup
- **Wireless Solutions**: Cisco WLC (8540, 5520, 3504), Basic knowledge of Cisco Aps,MDM
- **Network Services**: SNMP, SMTP, POP, TCP/IP, DHCP, DNS

Professional Experience

Finite HR IT Solutions **01-August-2023 TO 30-April-2025** **Network Engineer II**

- Managed Cisco networks for 05 years, maintaining seamless operations and delivering efficient solutions.
- Earned CCNA Certification, demonstrating expertise in network administration and troubleshooting.
- Resolved 95% of L1 & L2 tickets, ensuring prompt incident resolution and minimizing downtime.
- Implemented robust firewall and VPN protocols, enhancing network security and reducing vulnerabilities by 20%.
- Upgraded and configured Cisco Routers and Switches, optimizing network performance.
- Implementing, Planning and Operation Supports to Cisco Meraki Security Appliance, Switches and AP'S.
- Configure and maintain Load Balancers and have good knowledge of WAN/LAN network management and monitoring.
- Collaborated across teams, resolving 150+ incidents and achieving seamless cross-functional coordination.
- Optimized bandwidth utilization, boosting efficiency by and ensuring high-speed network performance.
- Successfully led migration and configuration of 100+ network devices, minimizing transition downtime.
- Configuring and managing SD-WAN devices and have good knowledge of monitoring and trouble shooting them.
- Swiftly resolved 75+ network device issues, maintaining uninterrupted connectivity for 200+ users.
- Generated and presented 50+ reports on network availability and bandwidth utilization, facilitating informed decisions.
- Implemented 10+ planned network enhancements, resulting in an increase in overall operational efficiency.
- Administered Antivirus McAfee Server, safeguarding systems from malware and unauthorized access.
- Provided on-call support for incidents, changes, and maintenance, ensuring 98% availability of IT services.

ANSR & Hy-Vee **20-March-2023 TO 19-July-2023** **Network Engineer II**

- Coordinated cross-team troubleshooting with application, server, and security teams to quickly isolate network vs. non-network issues, improving MTTR across incidents.
- Implemented port security, DHCP snooping, and dynamic ARP inspection on access switches to mitigate unauthorized access and man-in-the-middle attacks.
- Built proactive monitoring and alert hygiene in SolarWinds/Zabbix/CA Spectrum with custom SNMP polls and tuned thresholds, reducing alert noise and speeding incident triage
- Optimized enterprise WLAN by conducting RF site surveys and tuning Cisco WLC (RRM, channel/power plans, band steering, 802.11r/k/v) to improve coverage and roaming.
- Automated routine operational tasks (port health checks, config backups, and compliance audits) using Python/Ansible, cutting manual effort by 30–40%
- Executed firmware/IOS upgrades for large-scale switch/router fleets with minimal downtime through staged rollouts and maintenance window planning.
- Created knowledge base articles and technical SOPs to train new team members, reducing onboarding time and ensuring consistent troubleshooting practices.

Stanvac Systems **06-April-2020 TO 17-March-2023** **Network Engineer**

- Managed Cisco networks, maintaining seamless operations and delivering efficient solutions.
- Earned CCNA Certification, demonstrating expertise in network administration and troubleshooting.
- Resolved 95% of tickets, ensuring prompt incident resolution and minimizing downtime.
- Implemented robust firewall and VPN protocols, enhancing network security and reducing vulnerabilities by 20%.
- Upgraded and configured Cisco Routers and Switches, optimizing network performance.
- Configure and maintain Load Balancers and have good knowledge of WAN/LAN network management and monitoring.
- Collaborated across teams, resolving incidents and achieving seamless cross-functional coordination.
- Optimized bandwidth utilization, boosting efficiency by and ensuring high-speed network performance.
- Successfully led migration and configuration of network devices, minimizing transition downtime.
- Configuring and managing SD-WAN devices and have good knowledge of monitoring and trouble shooting them.
- Swiftly resolved 75+ network device issues, maintaining uninterrupted connectivity for users.
- Generated and presented reports on network availability and bandwidth utilization, facilitating informed decisions.
- Implemented planned network enhancements, resulting in an increase in overall operational efficiency.
- Provided on-call support for incidents, changes, and maintenance, ensuring 98% availability of IT Services.

Projects

Incident Management and Network Support

- Efficiently resolved 200+ L1 & L2 incident tickets, achieving a 95% resolution rate.
- Reduced mean time to resolution (MTTR) through streamlined troubleshooting and coordination.
- Conducted planned maintenance activities, ensuring network uptime and minimizing disruptions.
- Executed routine network health checks, resulting in 20% fewer incidents and proactive issue resolution.
- Collaborated with cross-functional teams to promptly resolve complex network issues.
- Coordinated with on-site IT support for quick resolution of hardware and connectivity problems.
- Managed ISP-related matters, maintaining backbone and off-site links for uninterrupted data transmission.
- Implemented redundant links, reducing downtime during link failures.
- Facilitated effective coordination among teams, ensuring prompt incident resolution.
- Maintained seamless network operations, contributing to a 98% customer satisfaction rate.

Education

Bachelor of Technology in (Mechanical Engineering) Sep 2012 – May 2016
(JNTU, Kakinada)

Certificates & Achievements

- CCNA Routing & Switching (200-125) Certified.
- Successfully resolved L1 & L2 escalation issues, ensuring minimal downtime and high client satisfaction.
- Played a key role in hardware migration and configuration, resulting in a seamless network transition.
- Implemented network enhancements to improve network availability and bandwidth utilization.
- Analyzed and resolved network issues, reducing network-related incidents.

Declaration

I hereby declare that the information provided in this resume is true, complete, and accurate to the best of my knowledge. I understand that any misrepresentation or omission of facts may result in disqualification from employment or termination if already employed.
