Objective

Dynamic Data Engineer with 4 years of experience in designing and implementing robust ETL pipelines and data transformation processes that enhance data-driven decision-making. Expertise in SQL, Talend, and cloud platforms such as AWS and Snowflake enables the creation of efficient, scalable solutions for complex data integration challenges. Proven ability to maintain data integrity and governance while optimizing database management and reporting tools like Tableau and Power BI. Committed to driving operational efficiency and delivering high-quality data solutions in fast-paced environments.

Work Experience

Data Engineer, Girikon Solutions Private Limited, Noida ***Sep 2023 – Present***

- Developed SQL queries and views for data transformation, cleansing, structuring, normalization, and unit testing.
- Utilized Python libraries such as Pandas and NumPy to transform, cleanse, and prepare large datasets for seamless data migration and integration across multiple systems.
- Designed and implemented complex ETL pipelines using MS-SQL, Talend, and AWS Glue, including trigger-based automation for job execution.
- Created Talend jobs for Salesforce data migration, ensuring efficient and accurate data integration.
- Successfully migrated data between Salesforce instances as well as from various legacy systems to Salesforce, ensuring data integrity and seamless integration.
- Worked with Git actions for CI/CD operations and maintained version control using Git and other tools.
- Ensured data governance, security compliance, and best practices for managing sensitive data.
- Conducted regular audits and optimizations of **existing Snowflake infrastructure**, streamlining costs and improving system reliability.
- Designed and implemented a Snowflake-based data architecture integrated with AWS S3, enabling seamless batch and streaming ingestion of raw files, transforming them within Snowflake, and exposing curated data models for BI and analytics use.
- Integrated structured and unstructured data from external APIs, flat files, and databases into **Snowflake**, ensuring unified data access.
- Provided solutions using Azure, AWS, Snowflake, and GCP for cloud-based data processing and analytics.
- Supported new project requirements and conducted proof-of-concepts (POCs) for various projects.

Associate Consultant, NTT DATA Business Solutions Private Limited, Hyderabad ***Sep 2021 - Aug 2023***

- Analyzed data using SQL to generate reports for business decision-making.
- Managed AWS RDS MySQL data, optimized configurations, implemented backup strategies, and ensured data integrity -and availability.
- Utilized AWS S3 for data storage, analyzing data using AWS Athena, and connected data for visualization with Tableau.
- Developed and maintained SQL queries for data extraction from relational databases (MySQL, MS SQL Server).
- Created complex SQL queries for joining tables, performing aggregations, filtering, and sorting to support business needs.
- Developed predictive models using Python and R for data-driven decision making.
- Cleaned, transformed, and manipulated data using Python libraries like Pandas and Matplotlib.
- Also work in generation reporting using tools like PowerBI, Google Looker and Tableau.

Finance Analytics Intern, Relaxo Footwear Limited, Delhi ***Jan 2021 - May 2021***

- Managed the cash application process for B2B customers, ensuring accurate application of cash receipts and updating internal financial systems.
- Created dashboards in Power BI to visualize financial data and KPIs (revenue, expenses, profitability) for easy monitoring.
- Utilized advanced Excel features (pivot tables, vlookups, macros) to manipulate and analyze large datasets for efficient financial analysis.

Skills

- **Database:** MS-SQL, MySQL, PostgreSQL
- **ETL Tool:** Talend. AWS Glue
- **Reporting Tool**: Tableau, Power BI, Looker
- **Cloud:** AWS (RDS, S3, Athena), Snowflakes
- **Scripting Language:** Python (Pandas NumPy & PySpark), SQL
- **Migration & Integration:** Salesforce Data Migration, API integration, CI/CD in GitHub
- **Data Integration**: API integration, ETL/ELT pipeline design

Strength

- Communication
- Teamwork
- Problem-Solving
- Adaptability
- Learning new technologies

Education

PGDM in Finance & Data Analytics | IFIM Business School, Bengaluru.
Loyola Academy| Hyderabad

Certifications

AWS Certified Cloud Practitioner
Tableau Desktop Specialist
