SUMMARY

- Around 7.7 years of experience in ETL Technology with a strong background in Design, Development, Implementation and Support of ETL processes using Informatica PowerCenter, IICS, Talend open studio.
- Serving as a Team lead, responsible for managing a team of ETL developers, overseeing project delivery and facilitating requirement gathering through regular client interaction and calls.
- Extensive experience design and developing robust ETL solutions including mapping and workflow for extraction and loading data from diverse source such as relational database and flat files.
- Strong knowledge of data warehousing principles, including star schema and Snowflake schema as well as the design and management of Dimension and fact tables.
- Skilled in implementing Slowly Changing Dimension (SCD), Change data capture (CDC) and applying performance tuning strategy at various level (Source, Target, Mapping, Session)
- Proficient in using mapping parameters, variables and session parameters to create flexible and reusable ETL workflows.
- Experienced in creating a comprehensive test cases for unit and system integration testing to ensure data quality and integrity.
- Hands on expertise in Scheduling, Monitoring and troubleshooting ETL sessions using Informatica workflow Manager and Workflow Monitor.
- Adept at identifying and resolving performance issues across ETL processes, ensuring efficient data loading and transformation.
- Well- versed in the Software Development life cycle (SDLC), with focus on translating business requirement into detailed technical documentation and application design.
- Familiar with basic Unix commands and shell scripting for file validation, workflow validation, workflow automation, and managing backup processes.
- Excellent analytical and problem-solving skills, with a strong communication and interpersonal abilities.
- Regularly involved in client calls for requirement analysis, project updates and ensuring alignment between objectives and technical deliverables.

EDUCATIONAL EXPERIENCE

Master of Science (**Mathematics**) from Shivaji University, Kolhapur.

PROFESSIONAL EXPERIENCE

Working as a Senior Consultant for **Deloitte USI** from Nov 2020 to Sept 2025
Worked as an ETL Developer for **Mannara Technologies Pvt. Ltd,** in Pune from Jan 2019 to July 2020.
Previously worked as an Analyst for **Infosys Ltd** in Pune from April 2017 to June 2018.

TECHNICAL SKILLS

- ETL Tools : IDMC, Informatica Power Center, Talend Open Studio.
- RDBMS : Oracle, SQL Server, Postgres SQL
- Languages : SQL, PL/SQL
- Scheduling Tools : Control-M, Autosys

PROJECTS

Domain	Sales
Period	Jan-2025 to Present
Solution Environment	IDMC, Oracle EBS, DBeaver
Role	Senior Consultant

Description:
Emerson is a global technology and software company providing innovating solutions for the worlds essentials industries. Emerson acquired National Instruments (NI) and introduced its new Test and Measurement (T&M) business group. NI and Emerson share commitments to continuous innovation, operational excellence and sustainability. Enhancements in Oracle EBS billing system to support complex billing scenarios such as subscription-based models and automated invoicing. Implementation of Oracle CPQ Cloud solution and automated the configuration, pricing and quoting processes, improving sales efficiency and accuracy.

Roles & Responsibilities:

- Guide, Mentor and manage the ETL development team throughout the migration lifecycle.
- Collaborate with stakeholders to capture, analyze and document detailed migration requirements
- Serves as the primary point of contact for client updates, clarification and issue resolution.
- Design and oversee the end-to-end ETL migration and integration approach, including mapping, scheduling and risk mitigation.
- Develop and validate data mapping specification from Oracle EBS/PMDM to oracle CPQ.
- Review code and ensure best practices for data quality and performance.
- Proactively identify, troubleshoot and resolve migration/ Integration issues.
- To onboard new team member and groom them to get high quality deliverables for the project requirements.

Domain	Finance
Period	Oct-2022 to Dec-2024
Solution Environment	IICS, Informatica Power Center, Salesforce
Role	Senior Consultant

Description:
T. Rowe price is a leading global investment firm, the company specializes in mutual funds, retirement plans and institutional investment solutions. The company offers a wide range of financial solutions to individual and institutional client across various asset classes. Migrating business units, business groups and teams from old Salesforce data to new Salesforce data. Delivered seamless cascade process between Account and Contact data.

Roles & Responsibilities:

- Collaborated with business analysts and stakeholders to understand legacy and new Salesforce data structure, ensuring accurate mapping fields and relationships.

- Designed and developed robust ETL workflows in Informatica cloud to extract, transform and load Salesforce data efficiently.
- Tuned ETL processes for optimal performance, minimizing downtime and ensuring timely delivery of migration milestones.
- Supported unit, integration and user acceptance testing, working closely with QA team to validate data accuracy post migration.
- Documented ETL processes, mapping specification and migration steps, facilitated knowledge transfer sessions for TRP team transformations.
- Successfully delivered TRP teams transformations, including complex cascade migration for Account and Contact data.

Domain	**Health Care**
Period	Nov-2020 to Oct-2022
Solution Environment	Talend open studio, TAC, Postgres SQL
Role	Consultant

Description:

Centene corporation is a large publicly traded company and a multi-line managed care enterprise that servers as a major intermediary for both government-sponsored and privately insured health care programs. It is the second largest publicly traded corporation based in Missouri. Capitation is a payment calculation project. We are generating reports from Capitation system to pay providers using Talend jobs. The provider portal is a downstream system that allows provider to view static reports with details on CAPE's calculated output for the provider at a Summary level, Practitioner level and drilled down member level.

Roles & Responsibilities:

- Understand the requirement and functionalities of the capitation system.
- Developed Talend jobs to extract, transform and load Capitation calculation data and Manual adjustment data to generate a Web Portal payment reports.
- Owned Job deployment tasks in TAC(Talend administrative center) server.
- Created functions, tables using Postgres SQL in DBeaver.

Domain	**Sales**
Period	Oct-2019 to June-2020
Solution Environment	Informatica Power Center, Oracle 11g, SQL Server, Sql-developer
Role	Software Engineer

Description:

Falken Tires, known as a leader in high performance tire technology for cars, trucks, SUVs and crossovers, has successfully built a reputation as a full-line tire manufacturer with a long history of delivering high quality, high value products. The business goal is to understand the requirements and the scope of services and implement the possible effective solutions within the accepted criteria to the benefit of Falken (FTC). This project involves incorporating changes in ETL-Informatica that are triggered by addition of new Operation Unit(Mexico). After completion of code changes the newly added Mexico region data should be visible on reports/dashboards.

Roles & Responsibilities:

- Involved in incorporating mapping enhancements that are triggered by addition of new operation unit (Mexico)
- Updating SQLs in mappings to process new data field
- Preparing unit test plan, carrying out unit testing and producing test results for Falken's review
- Providing UAT support and fixing any errors and bugs found during UAT
- Providing Production and post production support

Domain	Sales & Marketing
Period	Jan-2019 to Sept-2019
Solution Environment	Informatica Power Center, Oracle 11g,Putty,Winscp, Unix, Sql-developer
Role	Software Engineer

Description:

Edwards Life science is the global leader in the science of heart valves and hemodynamic monitoring. Driven by a passion to help patients, the company partners with clinicians to develop innovative technologies in the areas of structural heart disease and critical care monitoring, enabling them to save and enhance lives. This project is a data warehousing project where sales and marketing data stores. The sales quantity of Heart valves from stores were collected and put into the warehousing system using Informatica. Reports are generated using SSRS/SSAS/Cognos/QlikView to meet the reporting requirements of the sales function. Data Residing in the legacy JDE OLTP is pulled using Informatica to populate the data warehouse build on SQL Server for their analysis.

Roles & Responsibilities:

- We are responsible for ETL Development (Enhancement) and Production Support.
- Using Informatica 10.x and 9.x as an ETL tool to extract data from sources systems, loaded the data into the Oracle database.
- Involved in Performance tuning of ETL programs.
- Used various transformations on data extracted according to the business rules and technical specifications.
- Extensively worked on Designer to designing and developing mappings from various transformation logic using Lookup, Expression, Source Qualifier, Update Strategy, Filter, Router, Joiner, Sorter, Aggregator and Stored procedure.
- Involved in creating, scheduling, and running batches and sessions.
- Defined Target Load Order Plan and Constraint based loading for loading data correctly into different Target Tables.
- Used different joins, sub queries and nested query in Source Qualifier transformation.

Domain	Healthcare
Period	Apr-2017 to June-2018
Solution Environment	Informatica, Oracle DB
Role	Analyst

Description:

AXIS Capital Limited is the holding company for AXIS group of companies. It offers various risk transfer products and services through subsidiaries and branch networks in Bermuda, the United States, Canada, Europe and Singapore. The company offers insurance services including property, professional lines, terrorism, marine, energy, environmental and other insurance. The reinsurance services include property, professional lines, credit and bond, and others.From a support perspective, the aim to monitor various data mart loads and create handshake between ETL and reporting jobs and maintain SLAs for downstream applications.

Roles & Responsibilities:

- Updating the mapping technical specifications on basis of new changes done for enhancement.
- Daily load monitoring.
- Resolving issues in daily/weekly load cycle.
- Following up with issue tickets.
- Preparation of test plans and unit testing.
