VAMSI V

Manual, API & Database Tester – 3.2years

vamsirr3001@gmail.com | +91 8688224396 | Banglore

Carrier Objective

NOTICE PERIOD: IMMEDIATE JOINER

- Highly skilled Software Testing professional with a proven record of delivering successful software applications through comprehensive testing strategies.
- Experienced in finding and resolving critical defects and helping the team to have a smooth and defect less release process.

Profile Summary

- Software QA Engineer around 3.2 years of solid experience in Software Testing - Manual Testing, API Testing and Database Testing
- Experience in Testing the applications related to various domains like E-Commerce, Travel and Healthcare.

Work experience

- Working as a Software QA Engineer at Capgemini (Reigns Infotech Pvt Ltd) since Aug 2022 – Till Date

Education

GITAM University

Bachelor of Technology in Computer Science and Engineering

Manual/Functional Testing Skills and Overview

- Smoke Testing
- Sanity Testing
- Integration Testing
- Systems Testing
- End to End Testing
- Retesting
- Regression Testing
- Compatibility Testing
- Exploratory Testing
- Ad-hoc Testing
- SDLC/STLC
- Defect Life Cycle
- Test Plan
- Test Case Design Techniques
- Test Case Writing
- Test Data Preparation
- Test Case Execution
- Defect Identification
- Defect Debugging
- Defect Reporting
- Defect Tracking
- Defect Triage
- RTM - Requirement Traceability
- RCA – Root Cause Analysis

- Having around 3.2 years of experience in performing Functional testing for Web and Mobile applications.
- Involved in all the phases of SDLC like collecting the requirements, analyzing the requirements, Design, Testing and Delivery
- Involved in all the phases of STLC like understanding the requirements, Test Case Design, Test Case Execution
- Developed Test Scenarios, Test Cases by using different Blackbox Design Techniques like Boundary Value Analysis, Equivalent Class Partitioning, Decision Table technique, State Transition and Error Guessing
- Executed Test Cases, Found Defects/Bugs, Reported the Defects/Bugs, and Tracked Defects/Bugs till closure.
- Designed Test Plans and Test Strategy Documents
- Performed diverse types of testing like Smoke Testing, Functionality Testing, Integration Testing, Re-Testing, Regression Testing, Sanity Testing, System Testing, End-End Testing, Ad-hoc Testing, Exploratory Testing, User Interface (UI) Testing, Usability Testing and Compatibility Testing
- Prepared Requirement Traceability Matrix to ensure Test Coverage is good
- Collaborated closely with developers, product managers, and other stakeholders to understand requirements and provide feedback on test coverage, risks, and quality concerns.

API Testing Skills and Overview

- Rest API
- SWAGGER
- POSTMAN
- API Chaining
- Collection Runner
- Data Driven
- Environments
- JSON/XML
- GraphQL
- Assertions
- Soap API
- Soap UI

- Evaluated Rest API's (JSON/GraphQL) by using SWAGGER and POSTMAN tools.
- Evaluated Soap Web Services by using SOAP UI tool with WSDL formats.
- Created Collections/ Monitors / Environments in POSTMAN tool.
- Used API Chaining, Parameterization, Data Driven and Levels of Variables in POSTMAN tool.
- Added Assertions under Script tab to cross-verify the API Response

DB - Database Testing Skills and Overview

- SQL
- PostgreSQL
- Mongo DB
- Studio 3T
- DML/DQL
- Insert
- Update
- Select
- Delete
- Group by
- Having
- Joins

- Written distinct types of SQL queries to cross-verify the API Response
- Prepared test data in database needed for Testing.
- Verified Tables and index created as part of database architecture testing.

Mobile Application Testing Skills and Overview

- Interruption Scenarios
- Network Throttling
- Mobile Responsiveness Testing
- Session Related Testing
- Logs Tracking
- Emulators/Simulators

- Tested the Android Mobile application testing by using Real time device and Browser Stack
- Performed different types of Functional and Non-Functional tastings on Mobile applications.

Agile Methodology and Tools Overview

- JIRA
- AzureDevOps
- Confluence
- Figma
- Zeplin
- Test Rail
- Browser Stack
- Charles proxy
- Dev Tools

- Participated in all the Agile/Scrum/Sprint Ceremonies like Product Backlog Refinement, Sprint Grooming, Sprint Planning, Capacity Planning, Scrum Meetings, Sprint Reviews and Sprint Retrospective meetings.
- Provided Estimates by using Story Point concept.
- Provided Sprint Demo's to the stake holders along with the clients.

Strengths

- Excellent Communication
- Excellent analytical Skill
- Problem-Solving Skills
- Good Collaborator
- Individual Contributor
- Taking the Ownership

Project Details

Project3 - Shopee – E-Commerce – Singapore

Duration: Apr 2024 to till date

Tools: JIRA, TESTRAIL, POSTMAN, SWAGGER, CONFLUENCE, FIGMA, BROWSER STACK, SQL

Description:

- Shopee application is designed for the users to buy different Categories of Products
- Application supports different types of products like Laptops, Tablets, TV, Home Appliances, Air Conditioners etc.
- Application Supports Standard, Priority, Express and Weekend delivery
- Users can make the payment through CC or PAYPAL and place the order and track the order

Project2 - Nexustours – Travel & Hospitality – Mexico

Duration: Feb 2023 to Mar 2024

Tools: JIRA, TESTRAIL, POSTMAN, SWAGGER, CONFLUENCE, FIGMA, BROWSER STACK, SQL

Description:

- Nexustours application is built up for the users to book Cars and Hotels
- Application supports different types of packages like One-Way Trip, Round Trip and Multi City Trips
- Users can book the Packages by selecting Cars & Hotels and confirm the Trip

Project1 - Zi.Care – Health Care – Indonesia

Duration: Aug 2022 to Jan 2023

Tools: JIRA, TESTRAIL, POSTMAN, SWAGGER, CONFLUENCE, FIGMA, BROWSER STACK, SQL

Description:

- Zi.Care application is developed to support online doctor and patient platform
- Patients can book the appointment with the specialized doctors
- Portal will keep all the Patients Case Study Management and send different types of notifications related to consultation and medication

Roles & Responsibilities

Requirement Understanding

- Involved in Product Backlog Refinement and Sprint Grooming sessions.
- Understanding the scope of the requirement and finding the impacts
- Providing the estimates in the form of story points on Agile Poker board
- Connecting with cross functional teams to understand things clearly

Test Plan Creation

- Creating a Test plan with In-scope and out of scope items
- Preparing a Schedule chart
- Mentioning all the different Roles & Responsibilities
- Defining all the Risks & Assumptions
- Involved in Sprint Planning calls and finding the stories can be delivered based on the Sprint Velocity

Test Case Design

- Preparing the Test Scenarios and Test Cases by applying different design techniques
- Test Case Reviews with Peers, Leads and Business
- Updating the Test Cases based on the Review comments
- Preparing the Test Data required for Execution

Test Case Execution

- Executing the Test cases once changes are moved to QA environment
- Updating the Test Case status based on the outcome of execution
- Debugging the Defect to find the issue is from front-end or back-end
- Reporting the defect with all the different details
- Involving in the Defect Triage Calls to discuss the defects and track them till closure

Test Closure

- Providing Sign off once all the Test Cases are passed and all the bugs are closed
- Publishing the test case execution and defect level reports
- Preparing various types of Metrics after every Sprint
- Performing Sanity Testing on UAT and PROD for the release level stories
- Analyzing and preparing the RCA report for all the PROD defects (Defect leakage)

Sprint level meetings

- Involved in daily Scrum Calls and weekly Sprint Review Meetings
- Provided the Sprint Demos to the Clients and other Stakeholders.
- Involved in the Sprint Retrospective meetings and providing the points.
